

Product Model: PPS 690

PPS 690 is superfine precipitated silica powder with micrometer fineness. It is suitable to be added into [deforming agent](#) and various coatings.

Product properties

Appearance	White Powder
Mean Particle Size, μm	5
Weight Loss by Heating (105°C, 2h)	$\leq 2\%$
Weight Loss by Calcined (1000°C, 2h)	5.0~7.0%
Specific Surface Area	150~200
Oil Factor, g/100g	230~270
PH Value (5% water solution)	8.0~9.0
SiO ₂ Content (dry)	$\geq 99\%$
Whiteness	$\geq 97\%$
Surface Treatment	None

Package

10kg/bag

Storage

After the product is unpacked, the unused product should be tied tightly to the bag mouth and used up as soon as possible to avoid being affected by damp and affecting the product quality.
