

Product Model: PV 05SF

PV 05SF is superfine powder form polyvinyl alcohol, and it can be dissolved into water quickly.

Application area of PV 05SF is below.

- Textile industry: Used for Sizing material for textile, finishing agent and the raw material of vinylon.
- Construction: It's specialized in building industry as an additive or binder for cement or gypsum based dry mix mortar
- Adhesive: Paper, textile, wood etc.
- Paper making/processing
- Used as a well-fixing agent in petroleum exploitation

Product properties

Appearance	White powder
Alcoholsis degree (mol/mol)	86.0-90.0
Volatility (%)	<7.0
Ash content (%)	<1.0
Polymerization degree	400-600
Viscosity (mpa•s)	4.0-6.0
PH value	5-7

Packing

25kg Kraft paper bag
