

Product Model: SE 130

SE 130 is [Hydroxypropyl Starch Ether](#), a kind of rheology modifying additives to improve the workability for mortars. It can work as the [thixotropic agent](#), provides antisag or antislip properties and extend working time and port life which is significant for tile adhesive and troweling mortar.

It is specially manufactured for wide applications for dry mix mortar such as tile adhesive and tile grout, skim coat, cement or gypsum based based render etc. Typical addition level for aforementioned mortars is 0.02~0.15%.

Product properties

Appearance	white or yellowish powder
Solubility	Dissolved in cold water
Hydroxypropyl content	20% - 40%
Moisture content	≤ 11.0%
PH value	5 - 11.5
