## MASSIVE BEE SWARM IN ISRAEL FUELS DOOMSDAY TALK AND BIBLICAL PROPHECY CLAIMS

Millions of bees swarm homes, cars, and streets in central Israel, leaving residents shocked and sparking end-times speculation.

A massive bee swarm descended on the city of Kfar Yona, Israel, on May 18, 2026, covering homes, vehicles, trees, and streets. The swarm, believed to contain tens of millions of bees, lasted for several hours and created chaotic scenes as residents tried to take shelter.

Local beekeepers said the unusual behavior may be linked to swarming season, where bees leave the hive to form a new colony. However, the size and intensity of this swarm are rare even for this time of year.

Videos of the event quickly spread online, with many connecting it to biblical prophecy, including Revelation 9:3, which speaks of swarms of locusts in the end times.
