

### *The reinvented ATP Way*

#### ATP Customer preventive maintained plan design

- ATP design your plan on various industry and conventional practices that requires life cycle of product wear and tear on preventing a system breakdown.
- The plan is based on the customers **integrated** system that is currently in place:
  - Slat belt system
  - Poly cord system
  - Tray Accumulator
  - Power roller & gravity roller
  - Elevator systems
  - Pin conveyor system
  - Bussing system
  - Food service equipment such as lowerators
- ATP is provider that validates a on an integrated system on items that are breaking down for the major issue occurs.
- Customers can customize plan; the plans are structured as:
  - Routine checks (able to choose from two weeks per month to everyone once month)
  - In the invent of components that need replacing after ATP's inspection process, ATP will outline the items in full detail before replacement.
  - ATP will bill you the component costs and with 25% discount on labor.
- Please contact our sales department at [atpconveyor@outlook.com](mailto:atpconveyor@outlook.com) for more information and free estimate!
