

WAXING PRE/POST CARE INSTRUCTIONS

Prior to your appointment:

- Please make sure you have not shaved within the past 2-3 weeks.
- You have no current skin infections in the area being treated.

AHA/BHA and BENZOYL PEROXIDE

You must stop using at least **7 days** prior.

RETINOIDS

- Topically (Differin, Retin-A, Retinol, etc.) you must stop using at least **14 days (2 weeks)** prior to appointment.
- Internally (Accutane/Isotretinoin) you must have stopped **6 months** prior to appointment.

If you've received one or more of the following **ADVANCED ESTHETICS** treatments from us, please observe the **MINIMUM** time needed before your next waxing appointment:

- DERMAPLANE - **7 days**
- SKINPEN MICRONEEDLING - **7-10 days**
- BIOREPEEL - **7 days**
- GLYMED TCA PEELS - **14 days**
- KrX LAZER PEEL - **7 days**
- OTHER PEELS - **7 days**
- MICROCHANNELING - **72 Hours**

Post care instructions:

24 hours post waxing:

- Avoid touching the area
- Do not exfoliate the area
- Do not exercise or swim
- Keep the area clean and dry
- Avoid exposing the waxed area to sun/UV light
- Lotion, deodorants, makeup, and soaps can cause irritation.

If you are planning on receiving one or more of the following **ADVANCED ESTHETICS** treatments from us, please observe the **MINIMUM** time needed before the following appointments:

- DERMAPLANE - It's ok to get dermaplaned immediately after a wax, however please notify your esthetician so we can avoid the area!
- SKINPEN MICRONEEDLING - **7 days**
- BIOREPEEL - **7 days**
- GLYMED TCA PEELS - **7 days**
- KrX LAZER PEEL - **7 days**
- OTHER PEELS - **7 days**

Allergies or Infections: If you believe you are experiencing an allergic reaction or infection, please seek medical advice as soon as possible
