MuSE-ES: guidance for engagement in evidence synthesis - complete our survey to give your feedback

MuSE
EVIDENCE SYNTHESIS

WE WANT TO HEAR FROM YOU !

We are reaching out to invite your input on an important initiative to strengthen how interest-holders are engaged in evidence synthesis.

We have prepared a draft document outlining recommended approaches to engaging interest-holders, and we are seeking your feedback to ensure it is practical, relevant, and grounded in real-world needs.

By completing this short survey, you will:

- Help shape guidance that may inform future evidence synthesis practice
- Ensure diverse perspectives are reflected in the final recommendations
- Contribute to improving the quality, relevance, and impact of research

The survey will take approximately 20 minutes to complete, and your responses will remain confidential.

Access the survey here: [**CLICK HERE FOR SURVEY**](#)

Deadline: July 10th, 2026

Your contribution will make a meaningful difference, and we would greatly value your participation.

If you have any questions, please contact Jennifer Petkovic (Jennifer.petkovic@uottawa.ca)

Thank you in advance for your time and for helping advance this important work.

MuSE Guidelines: review of barriers/facilitators published!

Our MuSE Guideline team, led by Olivia Magwood, has published a qualitative evidence synthesis assessing barriers and facilitators to interest-holder engagement in health guideline development.

The review identified 23 barriers and 28 facilitators to interest-holder engagement in guideline development.
