

The Agiliti Group

The Agiliti Group is a leading provider of total waste management solutions, specialising in both routine and complex waste challenges. With extensive industry expertise, we deliver tailored services that ensure efficiency, compliance, and sustainability at every stage.

Operating under our dedicated division, Watling Waste, we offer specialist services in the clearance and disposal of asbestos waste, as well as soil remediation, ensuring hazardous materials are managed safely and responsibly.

Our nationwide fleet allows us to respond swiftly and effectively to projects across the UK, managing each enquiry from start to finish with a focus on reliability, cost-efficiency, and full regulatory compliance. At The Agiliti Group, we pride ourselves on providing a seamless and expert-led experience for all your waste management needs.

Why Choose Us?

When it comes to asbestos waste, there's no room for error. That's why we bring decades of industry expertise, full compliance with UK regulations, and a strong commitment to sustainability in every job we do. Whether it's one load or a fleet, you can trust our certified specialists to get it done safely and responsibly.

Expertise You Can Count On

- Our team is made up of industry veterans with 10–25+ years of hands-on experience in asbestos disposal and hazardous waste management.
- All staff are fully trained and certified, with qualifications available for review via our online documentation portal.
- We moved an average of 12500 tonnes of asbestos waste on our own wheels, making us one of the UK's largest asbestos carriers.
- Our compliance includes up-to-date Health & Safety certifications, Hazardous Waste Consignment Notes, and EA Licenses, all accessible for your peace of mind.

Full Compliance & Safety First

- 100% regulatory compliance with UK laws and Environment Agency standards.
- Digital access to all key documents via a secure client portal.
- Adherence to ISO safety standards, including COSHH and site-specific risk assessments.
- Regularly maintained, asbestos-certified fleet to ensure safe transport from pickup to disposal.

Sustainable Transport Practices

Asbestos must go to landfill — but that doesn't mean we compromise on sustainability.

- Our logistics team actively works to minimise our carbon footprint through smart scheduling.
- Use of specialised trailers allows us to reduce double journeys and increase efficiency.
- Our ongoing mission: to offset emissions and continuously improve our environmental impact—even in a non-recyclable waste sector.

Your Trusted Partner in Asbestos Disposal

Whether you're a construction firm, demolition company, or facilities manager, we provide safe, reliable, and eco-conscious solutions for every asbestos disposal challenge.

Our Container Options

Roll-On Roll-Off (RoRo) Containers

20yrd Open or Enclosed RoRo

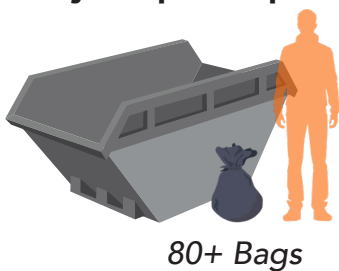

35/40yrd Open or Enclosed RoRo*

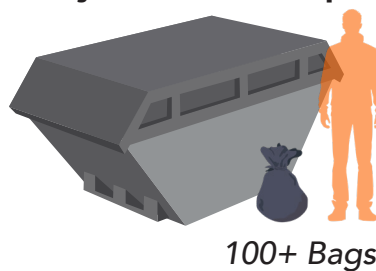

Chain Lift Skips

8yrd Open Skips

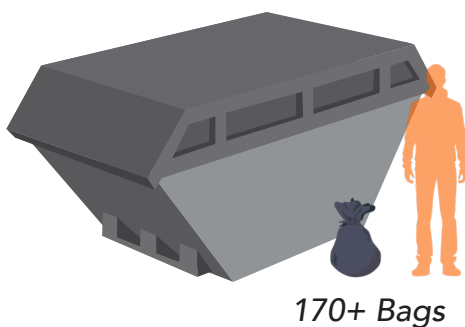

10yrd Lockable Skips

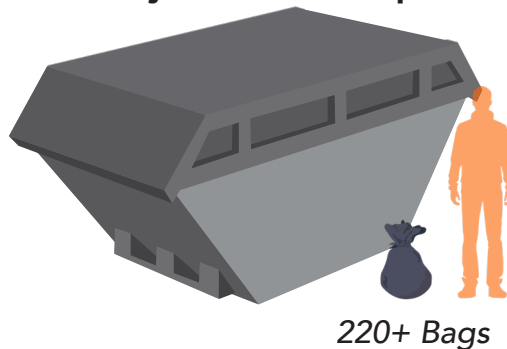

12yrd Open Skips*

16yrd Lockable Skips

20yrd Lockable Skips

We use digital technology to streamline our waste collection and disposal process, making it more efficient and transparent.

Jobs are booked electronically through our system, allowing for real-time scheduling and updates. When waste is collected, drivers capture customer signatures digitally, ensuring secure and immediate proof of service. Electronic consignment notes are generated and stored, reducing paperwork and minimizing errors. This end-to-end digital approach provides a complete audit trail, tracking every step from collection to final disposal, ensuring compliance with regulations and giving customers full visibility into the handling of their waste.

Our Fleet

We operate a versatile fleet to suit all project sizes:

Hookloaders *(Sleeper Cabs & Day Cabs with Trailers)*

Chain Lift Vehicles *(Sleeper Cabs & Day Cabs with Trailers)*

Why Choose Us?

- ✓ Full fleet of self-owned Hook-Lift & Chain-Lift vehicles
- ✓ All vehicles equipped for long-distance & efficient logistics
- ✓ Digital waste audit tracking & consignment notes
- ✓ Direct tipping facilities for streamlined disposal
- ✓ Self-delivery available for added flexibility
