Printer Service and Repair

Datacom Systems, Inc. has been servicing and repairing all models of thermal printers for 26 years. Our certified state-of-the-art center will inspect, estimate and repair your printer to the manufacturers' OEM specifications and return it to you in 2 to 3 days. We specialize in the repair of direct thermal bar code printers, thermal transfer bar code printers and mobile bar code printers. We have installed and maintained **thousands** of printers and are experts in barcoding and thermal printer technology. Datacom and our support team of certified technicians provide repair services for Zebra, Sato, Intermec, Datamax and Eltron printers just to name a few.

Datacom also provides depot and on-site service contracts for all models. If your printer is out of warranty, we can add a one-year depot or on-site service agreement after the repair.

Please give us a call at 803-798-4466 or simply send an email to info@datacomcolumbia.com with your printer model and serial number. We will provide you with a RMA and instructions on sending your printer in for an estimate and repair. **It is that simple.**
