Access to the property is granted as follows: The Listing Agent’s name will be placed in the call box directory and a call box code will be supplied. The Listing Agent is responsible for providing the call box code to prospective buyers, other realtors, etc. - people can gain access to the community by entering the call box code at the call box - the call box will then dial the provided number - the listing agent should verify the identity of the caller and press & hold 9 on their phone until the call disconnects at which time the gates will open for the visitor.
