County line Kennels Mini Dachs Health Guarantee

Thank you for purchasing a puppy from County Line Kennels (CLK). We appreciate your business as we breed to preserve this loving, loyal breed of dog.

I have looked for a product that would make a difference in my pets' lives, a noticeable difference in their mood and a balance in their physical and mental health. I have found a product and wanted to add it to my repertoire of information that I give my clients. I have used this product for a year and feel very confident in its ability to prolong my pets' lives. And it so believing so strongly in this product, I have incorporated it into my health guarantee of my puppies! Your puppy has been on this product since they were six weeks of age. To ensure that everyone gets this information early, I decided to send out the information on week three of the puppies' journey to you! NuVet strengthens the immune system, promotes healthy skin and coat, offers free radical protection, supports healthy eyes and ears, and best of all, it is made in USA, since 1997. You may read all the reviews on this product, but I have used it over the past year and have found it to be the best product I have ever used! Here is my health guarantee for your puppy if you continue to use NuVet for the first year of your puppy's life.

Initial Health Exam: BUYER has three business days from the time the puppy leaves the custody of the BREEDER to have the puppy examine by a licensed veterinarian of his/her choice at the BUYERS expense to verify the general health of the puppy. The BUYER may return this puppy to the BREEDER to receive a replacement puppy if this puppy is found to have a life-threatening illness. This does not include minor illnesses requiring short-term medication. Proof of the examination and diagnosis must be provided to the BREEDER within the three-day period in order to receive any exchange of a puppy. The BREEDER reserves the right to a second opinion from our veterinarian. The BREEDER should be contacted immediately with the name and number of the veterinarian responsible for performing the exam. The veterinarian will also need to provide in writing all the results and a diagnosis. The BREEDER is not liable for any accident or injury to the puppy once the puppy leaves the BREEDER's property. The warranty does not cover viral illnesses such as Parvovirus, parasites, infections, improper bites, hernias, undescended testicles, giardia, and coccidiosis, in which all puppies have been vaccinated for. It does not cover illnesses due to the ingestion of foreign objects, food chemicals, stress related issues or physical injury. If a replacement puppy is not available, the BREEDER will place the BUYER first on the waitlist for a puppy of equal value. Every puppy leaving County Line Kennels Mini Dachs has been given their six-weeks and eight-weeks vaccinations (Distemper, Adenovirus, Hepatitis, Parainfluenza, and Parvovirus). The BREEDER also ensures that the puppy has been given Pyrantel Pamoate for the deworming process starting at two-weeks of age, administered each two weeks through eight-weeks of age. The BUYER has also been instructed to continue the deworming process through twelve-weeks of age and then follow your veterinarian advice for your adult dog once your puppy has reached adult age. County Line Kennels Mini Dachs does not guarantee size, color or exact details of future growth and development of your new puppy.

You are highly encouraged to purchase and administer daily to your puppy the NuVet Plus for perfect health and the NuVet Joint Plus for strong bones. It comes in powder form or tablet form. It is not sold by Amazon, CHEWY or PET SMART or any other random pet store. You can only order online, so you will need to order early to have it available to your puppy for his/her health. I used the NuVet Joints PLUS product for my Mini Dachshunds backs (because of their body structure) to ensure that I will never have to say an early goodbye to one of my furry family members due to IVDD which can cause serious pain that can be prolonged duration and may lead to severe damage to the spine and even paralysis. We need their bones to be strong and healthy and NuVet ensures that our puppies and adult dogs will be healthy and live with us for a long time! Please order yours today so that you will have it available once you pick up your puppy! They will love you so much for taking the time to love them enough to protect their health!

Here is the link to order yours today!
