

Covid Tyranny Task Force

Purpose

To address issues of loss of personal freedom, risks to personal and public health, and violations of bodily integrity brought on by the planned Covid / Vaccination campaign. This will be done by any lawful and non-violent means possible.

Vision

To end the fear created by the Covid / Vaccination campaign using applications of critical thinking and appropriate actions, so that we can place our community in a position of optimal health, freedom, and mutual respect.

Meetings

Every Monday 5:30pm – 6:30pm at Food and Thought
Group Leader: Richard Schroeder rls714vy@gmail.com (253) 226-7176

Current Primary Action

A set of legal proceedings with the goal of ending the use of the diagnosis of Covid-19 on death certificates within the State of Florida. This action under the direction of BT DeVille.

Additional Action Items

Attempting to have in place at our local hospitals an early treatment protocol option for patients who find themselves hospitalized with respiratory symptoms and a diagnosis of Covid-19, with the goal of avoiding the "late treatment" Remdesivir / Ventilator protocol designed by the CDC.
Richard Schroeder heads this initiative.
