

**DOUBET RANCH
ANNUAL BULL SALE
03.31.2026**

Greetings Cattlemen! Welcome to our sale catalog for 2026. What an amazing time in the cattle business! Record cattle prices continue to be set at sales across the country. Protein is back at the top of the food pyramid. Worldwide protein demand is up another 2%. Heifer retention and herd expansion hasn't really started and many predict strong cattle prices through 2028.

We have been working hard to make cattle and their genetics that are as problem-free and functional as we can make them since 1983, and we are confident they can enhance the long-term profitability of your ranching operation. After the winter of 2025, and in certain places in 2026, the calf vigor and will-to-live of Salers and Optimizer influence cattle make them a must-have as producers build back their cow herds.

We have some of the top cattle producers in the country as our customers. If you are new to our program we'd love to add you to that list. As you will see when reading testimonials in this catalog, many of our customers have been with us for 10 to 20 years. They keep coming back because the cattle work and have made a difference in their ranching operation. As customer Joe Thomas stated in a recent article, "The Salers-influence cow makes it easy to be a better rancher." Enjoy the catalog and let us know if you have any questions. See you March 31st in Billings.

Thanks, Jim

DELIVERY

We do our best to deliver the bulls direct to your bull pen gate as part of the purchase price. In the event that delivery is greater than 600 miles, we will work with you to keep this cost to a minimum.

VOLUME DISCOUNTS

Volume Discounts are available on purchases of 5 bulls or more.

HEALTH

All bulls have been vaccinated with Merck Animal Health products. They were given Nasalgen 3 PMH, Cavalry 9, Vista Once/Vision 7 Somnus and Safe-guard dewormer. They will have passed a semen test prior to delivery to your ranch and have been BVD PI tested negative. All bulls will receive health papers for interstate shipment as needed.

GUARANTEE

All bulls sell with a first breeding season guarantee. It is rare that there are problems, but in the case there is an issue, a suitable substitute bull or credit towards next year's sale purchase will be worked out with the buyer.

SIGHT UN-SEEN

If you are interested in buying bulls but can't make it to the sale, you can buy with our Sight Unseen Guarantee. Give Jim a call or contact Curtis (303) 681-7086, Cody (720-346-8894, Justin (720) 320-3291 or Dan (406) 799-5200, and we'll be glad to get the bulls that meet your needs. We have had customers buy from 1-30 bulls on order with us and have customers for over 10 years that have never been in the bull pen. We'll guarantee you'll like the bulls when they get to your place or we'll take them back.

Celebrating 20 years

with the Wilson Family

It was January 2006, when Jim and Willard Wilson approached Sherry and I and presented us the opportunity to buy a large group of their seedstock cows. It doesn't seem like it could have been 20 years ago already. We had a group of registered cows, but this presented us with the chance to expand our numbers in a way that would have taken many years to achieve. Jim had worked to provide his customers with cattle that were right for the commercial cattleman. He also worked to have them fit what the feedlots and packer needed as well. They were in it from one end to the other with the feeder cattle brokerage business Willard, and then Jim, had worked on for years. The operation was focusing on their commercial herd and due to the size of their operation and labor limitations, the seedstock herd was offered to us.

The Wilson cow herd was built on the best genetic and phenotypic inputs they could find. While some operations were just considering the Optimizer cow, Jim knew there was an advantage to running a crossbred cow in his commercial operation. The Salers-Angus cow offered pretty much all of the things needed in the cow business. He set out to breed the best of his Salers cows to the best Angus bull he could find to create the best Optimizer cattle he could make for his customers. This breeding philosophy definitely gave us a head start when we were able to purchase those 75 pairs of registered cows. Armed with as much data as you could have, we poured over records for countless hours. I was sure we needed to concentrate on younger cows – which we did – but it was too hard to pass up on those proven producers that had been there, done that and were subject to all the culling objectives that made it such a great program, and they were still there. Optimizers to Purebreds, we bought the best of the best from their herd.

With the Optimizer cow herd and Optimizer bulls, a commercial producer has the best of both worlds in a simplified crossbreeding program. Jim knew that. He knew how good these cows were: the calving ability, calf vigor, mothering ability, fertility, longevity, unmatched grazing and range utilization on the cow side. At the feedlot: gain, health, conversion and the ability to hit the quality grade targets at a better Yield Grade than most.

I don't have many regrets, but one I do have is only buying 75 pairs instead of 100. At the time, we thought that may have been more than we wanted to bite off financially (shoulda done it). The other is not spending more time picking Willard and Jim's brain about the seedstock business. I continue to glean knowledge from Jim but I missed out on Willard's wealth of knowledge and should have been in constant contact with him.

Now, Sherry and I have the distinct honor of selling their operation bulls – many that trace way back to some of those original 75 pairs from 20 years ago. Everyone gets some help along the way and we can't thank the Wilson family enough for the opportunity they gave us!

Thank You

EPD EXPLANATIONS

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Stayability (STAY), Predicts the probability of a bull's daughters remaining productive until at least six years of age.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

2025 Non Parent EPD Averages	CED	BW	WW	YW	M	STAY	MARB	REA
	12.6	-0.4	59	87	18	15	0.10	0.60

ASA GOLD SIRE & DAM

The ASA Gold Sire and Dam program recognizes Salers breeders' top producing cows within a herd based on number of calves weaned per cow exposed and weaning weight of calves. Cows and sires can be recognized from any environment because the list is based on within herd performance.

- Gold Dams must have had a calf before they are 2.3 years of age and calve within a 395 day calving interval which allows the producers to calve heifers earlier than the main cow herd.
- Dam's must have a minimum of three natural (non-ET) calves with an average weaning ratio greater than 105.
- These are the top quality most efficient cows in a herd. Only 2% of the registered cows make the Golden Dam list.

Gold Sires - Salers bulls can earn the title of Gold Sires by siring five or more Gold Dams.

Gold dams and Sires can be identified in Salers pedigrees by an (*) behind each name in the pedigree.

GENOMIC ENHANCED EPDs

Doubet Ranch participated in the American Salers Association Cow Herd Genomic Project. We did our best to gather a tissue sample on every active cow and herd bull in our operation. Those DNA samples, along with every calf crop since, have been sent in for testing through the International Genetic Solutions group to help provide the most predictable EPDs to our commercial producers and ourselves in breeding future seedstock. In addition to genotypes the bulls in this catalog have been tested for parentage, color status, and polled status. This tool is a supplement to our very important production traits such as fertility, calving ease, mothering ability, grazing ability, and trailing ability to name a few.

The Estimated Progeny Equivalent chart below give you some indication regarding what Genomic Enhanced EPDs can mean to you when purchasing a bull who has not yet had offspring.

Estimated Progeny Equivalents is the average number of progeny records it would take to see an equivalent change in accuracy from a genomic DNA test. For example, if a non-parent animal is genotyped, the accuracy of his/her EPD is akin to an animal that has already produced 25 offspring with a weaning weight record (see table below). Overtime, these estimates will change as statistical models are improved, the number of phenotypes increases, and the information from genomic data improves.

Trait	<i>CE</i>	<i>CM</i>	<i>BW</i>	<i>WW</i>	<i>YW</i>	<i>Milk</i>	<i>STAY</i>	<i>DOC</i>	<i>CW</i>	<i>MARB</i>	<i>RE</i>
Estimated Progeny Equivalents	25+	4	22	25+	25+	19	15	25+	5	8	6

WHY OPTIMIZER?

THE HETEROSIS BENEFIT

MAXIMIZING THE ANGUS & SALERS STRENGTHS TOGETHER WITH THE OPTIMIZER

TRAIT	ANGUS	SALERS	OPTIMIZER
CALVING EASE	✓✓	✓	✓✓
CALF VIGOR	✓	✓✓	✓✓
UDDER QUALITY	✓✓	✓	✓✓
RANGE UTILIZATION	✓	✓✓	✓✓
LONGEVITY	✓	✓✓	✓✓
MARBLING	✓✓	✓	✓✓

Drastic Improvement In The Lowly Heritable Traits Like Fertility

Our current customers see major fertility improvements with our bulls as one operation running 1250 straightbred commercial cows was getting right at an 86% breed up pretty consistently. They began using our Optimizer bulls and saw this improve to 95% almost overnight for an additional 112 calves. Basically, they have another pot-load of calves to sell that could exceed \$300,00 this fall!

INCREASE IN MATERNAL HETEROSIS

Trait	%Advantage
Calving Rate	3.7% ↑
Individual Weaning Weight	3.8% ↑
#of Calves in Lifetime	17% ↑
Longevity	38% ↑
Lbs of Calf Weaning Wt for the Lifetime of the Cow	25.3% ↑

Keep your mind open, not your cows!

WHY OPTIMIZER?

No Complicated Crossbreeding Program

Use a Doubet Ranch Optimizer bull on an Optimizer cow and reap the benefits of producing fantastic progeny!

Improved Longevity

Doubet bred Optimizer cows consistently stay in production well past 10 years of age and often as long as 14 plus years. Their ability to breed back quickly year after year is unmatched and the feet and udders stay as good as you'll find.

I see it at the scale in the fall, and on the closeouts at the feedyard. The performance and the effect of the Doubet Optimizer bulls in an Angus or Red Angus cowherd is astonishing. The problem eliminator you can call the Optimizer bull. They fix the feet and leg structure, increase fertility and calving ease and have good disposition. Most importantly your steers will fill the trucks with added weaning weight every fall. I'm sure after you use an Optimizer bull or two, you'll be impressed. Everyone is. They'll help overcome any issues in your cowherd.

Every year, we contract all the Optimizer calves we can get our hands on. Our clients feeding these cattle attest to the performance they see on paper at closeout. They call and say "We want that set of calves back. They're terrific". The females are the bonus. Anyone who calves heifers knows first-hand the dramatic difference there is with Optimizer females. From a heifer to a standout cow in minutes – the transformation is amazing.

Visit the pens and study the offering at the Doubet Sale. Give us a call with any questions about the sale offering. Then, call us where you're ready to price calves or breeding seedstock.

We're always in the market. See you in Billings, March 31.

Sincerely,
Dan Deichmann

Revere

DR REVERE 317L SA#: 756894

An outstanding black, homozygous polled son of MJB Patriot 342H and going back to a MJB Velocity bred dam on the bottom side. Really good structured with tremendous length of body. The udders on the Patriot daughters are super nice. We would expect the same of Revere. Negative BW EPD, Top 10% for WW, YW and MS, Top 5% for REA.

He's lot 1 for a reason and that's all there is to it because without a doubt we believe that 92N is one of the most top tier herd bull prospects we have ever offered for sale. He has been the phenotypic standout at every point in his life and has never missed a beat. His density is big time; to put that much muscle and rib cage power into a skeleton that still ties together so effortlessly on a structural base so athletic and sound is elite. His feet are really big and shaped the way they need to be. He is the first calf of a really nice Gold Standard daughter we call Queen 111L. We will be using him heavily in our AI program. Maintaining 1/2 semen interest. **LET THE BIG DOGS EAT!**

Heifer bull. Look at the data here! He does what Revere stamps them with-extra clean made and attractive up front with a clean sheath. Love his center body and balance with tremendous proportions all the way through. His muscle pattern is spot on and his structure is tremendous. This is a really good one.

The Revere sire group is so high quality with immense depth and 5N is a highlight for sure! What makes these cattle so good in our mind is how awesome they are all the way to the ground. This bull has big, square feet and is so good in his angles and structural soundness allowing his to command attention as he circles the pen. Love his quality up front with added length of body and levelness. It is hard to put that much power into one and keep that extra look. He is out of one of our very good young cows that we will continue to build around, take a look at her nursing index! Sale feature for sure!

Heifer Bull. Lots of presence and eye appeal here! 14N has added attractiveness up front while being so big and powerful in behind his shoulder. He is one of those with open ended mating opportunities to read that heifer safe and still spread to that kind of added growth!

MJB PATRIOT 342H

Firing on All Cylinders

Travis Telford, Idaho, has his operation humming right along. The combination of genetics and the right management inputs has the operation seeing a fantastic breed up. A group of 120 head of first calving pairs rung a bell this fall when the vet found only 2 head that were open. Using 3 of our 4-year old bulls he purchased from us as yearlings on those young Optimizer cows worked like a charm. 98.3% of 2-year olds pregnant will definitely contribute to the ranch profitability. Travis, and his father-in-law, Shawn Ellis, have purchased bulls for 20 years from us. We are humbled, thankful, and proud to have been able to provide them with the genetics that excel for their operation.

Come to the auction here! Top 2 for adj weaning weight, top 2 for growth numbers, and one of the top bulls that will sell! His 114 ratio is just the beginning of everything he does right. He will definitely inject the extra performance, growth, and mass. He is shaped right and powerful making him an extra rugged beef bull. His mother, 197K, is an absolute beast of a cow! She is absolutely massive center with an incredible body shape and muscle pattern. She will be a key cow for our program as we move forward and on the short list of ET options.

Really admire this Revere son for his length everywhere! Dark red, masculine fronted bull who's shoulder lays in right and is very good structured. He carries added shape down into his stifle and flexes well off of both ends.

Cowboys gather around! We are pretty fond of this 115N bull, what an impressive beast. I don't know that we could draw one up any better to have the look and presence he commands. So stylish and eye appealing up front with a true herd bull look but he transitions back into a massive center body skeleton. So bold in his forerib and deep hearted with a great turn back into his flank. The bull has a massive top and even bigger hip while pulling all that dimension down deep into his stifle and quarter. It really doesn't matter what angle you study him from he is fantastic! Retaining 1/2 semen interest.

Heifer Bull. Very high quality bull who is heifer safe but doesn't give up any punch and power. He is moderate in his frame size with overwhelming body mass and substance. Love the center part of his rib cage with a bold forerib and an awesome turn back to his flank. He has lots of muscle throughout and handles all that dimension really well on the go, we like him!

Heifer Bull. Our very first Legend son and man what a way to start! Mom bought into Legend at OKC with Monte Rowell and we used him AI in his first year. This guy was a quick ranch favorite, particularly following weaning where he was so easy to find in the bull pen. 72N is one of the higher percentage bulls in the sale and we are awfully found of him. He puts extra look and presence into a stout and very sound package. His balance is tremendous and we love his rib and body shape. He is an outcross pedigree for us and one we are excited to watch develop!

15

Three minutes...
The calf vigor of Salers and Salers Optimizer calves is beyond belief for some that are new to using them. The calves are up and nursing in no time. Our son, Cody, uses Salers and Optimizer cattle just outside Chillicothe, Missouri. He is a huge fan of all the maternal aspects of the cattle and came to value their calf vigor during the cold snap that hit much of the Midwest this winter. He had a cow calving and decided he would time it to see how long it was before the calf was up trying to nurse. Turns out it was 3 minutes from the time the calf was out until it was up to nurse! Talk about a will to survive! An invaluable trait to have!

16

Lieutenant

ECR LIEUTENANT 307L SA#: 757367

Another top Midland Bull Test graduate that Curtis and Cate liked when picturing some of the Midland bulls. His data and phenotype were outstanding. He cleaned up our heifers natural service and you will love the calving ease in his sons. If you have a big swath of heifers just line up these sons and you'll be in great shape come next spring.

Heifer Bull. The curve bender! Take a look at that spread from birth to yearling and tell me that doesn't get you fired up! When we saw his sire at Midland we knew we had to own him and this bull is exactly why. His center body mass, muscle pattern and

dominating power is so impressive. He is huge topped and big bodied that weighs up with the absolute best of them. He does all that in a more moderate package that should keep cow size in check. He's the real deal.

Everyone who stops by can't say enough about the daughters of Gold Standard and we agree. He makes herd bulls and outstanding replacement females. The sire of the great MJB Krugerrand 379K that was the High Seller to MacDonald Ranches and the sire of the 2nd High Selling \$27,000 son at the recent GGT sale. Gold Standard is sired by one of the Top bulls from Midland Bull Test, ECR Investment 822F, who excelled in ADG and efficiency. His dam, 125F, is a Gold Dam and we consider her to be a prototype cow for the beef industry. I could go on and on about this cow and Gold Standard. The best thing to do is just buy the quality in these bulls. Top 3% for WW EPD, Top 10% for YW and Stayability.

He's got the goods! The Gold Standard cattle are outstanding. The daughters we have in production flat get it done and the sons have been well received nationwide. 78N himself is right for the times. He's the right size with an incredible body shape and center mass. His muscle pattern is wide and dimensional but it lays into him so smooth and correct. His balance and basic build is fantastic and he is super sound on his feet and legs.

Sign me up here! 24N has the look of his sire and is backed by one of the most impressive cows we have! She flat gets it done year after year and is a model cow for combining a beautiful front end with a big square hip and she breeds on her incredible feet and legs. Her proven production record back up his breeding value and man the bull himself is flat out good. Immense center body mass and power. He has a true herd bull look with that extra stoutness and muscle then pulls all that quality together on the move with tremendous structural integrity. **ABSOLUTE SALE FEATURE AND HERD BULL PROSPECT!**

“The Salers-influenced cow makes it easy to be a better rancher,” Joe Thomas, Turnell Cattle Company. Having used Salers-influenced cattle since the early 1980’s, they know first-hand how well they work. From grazing at over 12,000 feet when they were at the Pitchfork, to their current location today, they have enjoyed over 90% breed up rates for some time. “We ended up at 93.3% last fall on the cow herd and 91% bred on the heifers. Most operations struggle with the breed up on their 3 year olds. We’ve seen that as high as 97% (in 52 days).”

Killer! He has been a standout since we drove up on him and his mother in a snow storm for the first time last year. Sometimes they just are that good and you can tell immediately. There is always a short list of calves to find during summer checks and you better believe he was on that list. If you want one to turn in on your cows that is going to take your program forward, look in here. This is a true power bull with overwhelming mass and shape who is fantastic in his rib cage with added stoutness of feature and bone. Doesn't matter what angle you study him from his balance is incredible and his structure never falters. **He is ready to do big things and needs to see heavy use!**

Heifer Bull. One of the very best heifer bulls in the sale out of a really nice young cow! His mother 103J, is phenotypically one of our absolute best cows who is elite from a balance and quality perspective. Which, should be no surprise as she traces back

to 110G. Backed by such an impressive set of females makes him an immediate must see. The bull himself has the look of longevity and practically to him with correct proportions and an appropriate frame size. Really like his rib cage and muscle pattern. He has plenty of width and stoutness and man he sets it down on a really good hind leg with added foot size down at the ground. A rugged, really good bull.

Heifer bull. A really useful kind that ready with so much doability. He is so sound structured and good footed with immense center body. A proportionate and good balanced bull that is very complete.

30

Getting It Done!

Brewer Cattle Company, Clyde and Ryan Brewer, Melstone, Montana, have used our genetics for the last 20 years. “We’ve only bought bulls and used semen on bulls from you and Coleman Angus. These are the best set of heifers we have ever had on the place,” Ryan shared when I delivered their bulls last spring. They had 92% of their heifers come in heat to the AI. They love the fertility they are seeing with 80% of their cows calving in the 1st cycle. That makes for a super uniform calf crop when they start out with that many of them being similar in age and their calf buyer really appreciates it!

Heifer Bull. There may not be a single bull in the sale that we have more confidence in than this bull right here. His mother is a legend. Numerous high sellers including a feature bull last year that sold to Wade Jacobsen. 110G herself is fantastic, every ranch visitor finds her as a favorite and every bull buyers finds her sons. She has become a donor now and we will be using her heavily as we move forward. He matches her body depth and balance with as much practicality and fleshing ability as you can find. Moderate framed with a progressively wide muscle pattern. If you keep your females or like selling high quality heifer groups, I can’t think of one better.

Man I tell you what! If you are looking for some substance and mass you found him here! Heaviest weaning and dominated WW and YW! This tight sheathed Lucchese son has immense body and rib with an incredible progression of width out to his pin set. He sets to the surface square and true. His mother is an awesome structured, really good footed daughter of our 125F donor and she herself is proving to be one of the prominent young cows. Come on now!

Exchange

MJB EXCHANGE 402K SA#:750878

Exchange was a standout early on as a calf and continued to just explode as he got closer to weaning. An amazing amount of rib and volume, super big top, great feet and legs. Sired by ECR Investment 822F a top gaining, super efficient, high marbling bull out of Midland Bull Test - the same sire as Gold Standard. Exchange is out of our prolific outcross donor 122Y. MJB Sun Goddess 122Y was a Gold Dam and just makes about everything you breed or flush her to a great one. His EPDs are Top 20% WW, YW and Milk, Top 5% for Marbling.

The cowboy bull of the entire sale! If you want body, if you want dimension, if you want the growth and muscle to put in a set of steer calves that'll smash down the scales then this is the bull to buy. Maternally, he traces back to our famous 120W cow that we are still putting embryos in to this day. He is a maternal sib to our Manning bull that we used heavily for many years. Cow bull only but you'll thank us later for what he can do for you.

It's About Our Customer's Success

We are proud of what our cattle are getting done for our customers. That is why we focus on the real world results that our commercial customers are seeing with our genetics. Many of these customers have from 400 to 1500 cows, so the strength in numbers is significant. We provide these testimonials so that other commercial operations can see how well the cattle could work for them. We have a customer who says he quit telling people how good his breed up was when they would ask because people thought he was stretching things. "All they had to do is ask the vet," he says!

One of our very best, loaded with maternal legends on the top and bottom side of his pedigree! 125F is our arguably our most dominate Optimizer cow currently who we have been using heavily in our ET program. She is an all out beast built to make herd bulls. It only made sense to take her to Exchange and bring in the influence of our 122Y cow family to stack it in there. If I was calling to find the potential number one pick to make replacement females, it would be this bull and I would not think too hard about it. Structure is incredible. Body and balance are better than good. Muscle pattern is spot on. He is the real deal and his pedigree proves it.

Heifer bull. Man he is EASY TO FIND! I have always been partial to this bull because I believe his mother is about as close as we have to the absolute model cow. Her balance and body proportion so well. Her style and eye appeal is complemented by a powerful yet smooth muscle pattern and boy does she ever have a beautiful udder. Her look and quality is so evident in this General son. I mean to tell you he has that beef bull look about him! Extra rugged up front being huge bodied and huge muscled but it all lays together and fits in him extra nice. He is as big topped and big hipped as we make them but he stays square and true all the way to the ground. High quality herd building kind right here!

Krugerrands maternal brother and I think 41N comes pretty close to the herd sire who is making waves! He has been a similar standout for overwhelming power from behind. I have been so impressed for a bull calf to have as much top side shape, pin width, and depth of twist to never have gotten outside himself structurally as he has grown and matured. His athleticism is a true selling point and his body shape just enhances his immense value. His mother is a proven cow who has the best udder for teat size, shape, and placement of any cow that's ever carried the prefix. **Dominating herd bull potential.**

He has as much natural shape and power as you could want and his big forearm size starts that story. He is masculine and rugged up front and then in behind his shoulder he has an explosive shape that powers back to a huge hip and impressive rear view.

MJB DIAMOND 155D

Backed by maternal greatness! 155D is a phenotypic and genetic standout both! She is a true specimen for combining immense power and muscle with a balanced and sound structured pattern. She flat produces year after year, her 8 at 104 shows that! 55N himself is a spitting image muscle and power wise! His shape and mass is so true and his rear 3/4 view fires us up! You want your steer calves to catch their attention, he's the one to do it. **Come see him!**

A very nice General son who is good at the ground and correct in the angle of his shoulder and knee placement which allows him to be very athletic out of his front end. He has more than enough width and mass up high.

Multi-Generational

Matt Steffan, South Dakota, has continued buying bulls from us after his Dad, O.B. retired. O.B. had never been in our bull pen after 10 plus years of selling him bulls. Matt continues to purchase sight unseen and after a combined 20 years says, "We've tried other bulls, but yours just work and they have made a great cow herd."

HERD BULL. He was bred to do it and has he ever delivered. The impact that the 120W cow family has had on our operation can never be understated. We've been sitting on these embryos for a couple of years but we couldn't hold off any longer. What a home run ball with this one! Freedom, the legend, on the top side and 120W on the bottom. For us, he does not even require a footnote he is that kind of a bull. Extremely high quality. So exceptionally well balanced and powerful with all the athleticism and look to set his calves apart from the rest. Trust the process and buy this bull. He is that good.

Freedom

MAC F1 FREEDOM 150F SA#:727868

Freedom really needs no description as his contribution to our program has been legendary. He should already be known Siring top groups of bulls here at Doubet Ranch as well as MacDonald Ranches having 234 progeny recorded. He has left us with some fantastic females and is the sire of our outstanding Herd-sire, MJB Patriot 342H. His length of body, rib shape and width of top contributed to some great cattle we put back in the herd. These ET sons are out of the great Gold Dam 120W. She goes back to Barbwire who was the High Selling bull in Denver in the National Sale and one of the outstanding females we bought from Wilson's in the 29L cow. These bulls are royally bred!

A lot of bull here! I don't know that anybody runs with this one for sheer mass and center body dimension! Makes sense with the fact that his mother, 134J, is arguably the stoutest and biggest hipped cow we own who is incredibly good structured with an awesome udder. The bull has extra performance and ruggedness while still being smooth shouldered and level topped. Stays sound structured on the go.

Really nice, tight sheathed bull with extra body and fleshing ability to go with it. Just has the look of a low maintenance, easy keeping bull that is really smooth made.

DR GENERAL LEE 75L

Heifer Bull - that can make a herd bull! His tightness of sheath, head size and smoothness of shoulder give us absolute confidence in his use on heifers and yet he doesn't sacrifice anything in terms of rib, power and muscle. We are confident he can make calves that come small and yet absolutely turn it on and get after it. His structure and balance are outstanding. We read him to be one of the true sale features in the years offering!

Importance of Reproduction

We have known since at least the 1980's, that reproduction is 10 times more important than growth traits and that reproduction is 20 times more important than carcass traits. That extra calf from that extra cow getting bred is significant. For those cows that calve in the first 21 days of the calving season we gain between 20 and 60 pounds of additional weaning weight to sell. Economic studies show the single most important factor contributing to profitability is more calves born in the first 21 days of the calving season. The target of 70% or more born in the first 21 days of the calving season is often considered the gold standard to strive for.

Out of one of the most phenotypically appealing cows on the ranch! She is a beautiful female with a huge center body, ideal muscle pattern and incredible balance. Picture perfect female. 76N himself has a high level of intrigue with his posture and balance from the side and attractiveness up yet. Yet interestingly enough, he is one of the stoutest featured and biggest boned bulls in the sale that is as dimensional and opened up as the come.

TSB JASPER 16J SA#: 746665

16J was the high marbling, high performing bull we selected from TB Salers in South Dakota. You can see from his picture he is a meatwagon. Great length and depth of body, good feet and legs. We believe he will do some really good things as we continue to use him. His progeny in the sale will definitely catch your eye. Out of the Gold Dam, 120G, (signified by an asterisk next to their name in the pedigree), we are excited for the females to add their contribution. Super set of bulls out of 16J in this year's sale. EPDs are negative BW, Top 30% for YW and Milk and Top 15% Marbling.

Heifer Bull. One we think is a really good 5/8 red bull and man oh man is he just so smooth and correct in the way he is put together. His shoulder angle sets in him nice and his knee allow him to take a really good reach out of his front end. He is extra good in the depth of his heart and flank with a clean sheath and strong topline. So level out his hip with added flexibility off his hind two. Very solid bull!

Heifer Bull. Absolute hammer of a herd bull prospect!
His balance and striking quality from the side make his presence undeniable. His quality is only amplified by having a phenomenal rib and muscle pattern. He is elite in so many ways! Join in the fact that his structure is tremendous and boy you can really get excited when you realize he is also heifer safe. Massive opportunities here!

Heifer Bull. A very good Monument son that is moderate framed with extremely good proportions. Massive bodied with a bold forerib and deep heart that goes back into a deep flank. He's extra wide and dimensional everywhere. His cleanliness of sheath only enhances his breeding value. Lots of bull here.

Heifer Bull. The Juneau's have been really well received that last several years and this 107N bull is a good example of why. Incredible calving ease numbers but still masculine and rugged in person with a real breeding bull look. He's a big forearmed, long bodied bull with more than enough stoutness and power.
