

## Draw your own : True Classic 3 circuit labyrinth

This is a way of drawing a true classic three circuit labyrinth. It is made up of only 1 line and is actually made from the centre circuits of a classic 7 circuit labyrinth. It contains a true centre and meander.

It can be drawn, chalked, taped or laid out to any size with rope or stones, tea lights , paper cups or mown into a lawn.

It is an effective, simple labyrinth pattern for praying and walking.

It is easy to create in a home, garden, chapel or beach.

Many thanks to Lars Howlett. Used with permission
