

The **Big Little Zygo (BLZ)** is a 'compass for the mind' that can be used to explore a range of problems. Specifically, the BLZ explores problems and solutions through five frames, including *Matter*, *Mind*, *Mood*, *Meaning*, and a *Meta-frame*. The frames are further explored with five dimensions, including Big-Little (scope), Left-Right (value), In-Out (time), Positive-Negative (value), and More-Less (Degree). The BLZ represents these frames and dimensions in a physical shape – a hypercube or tesseract that can be used to think through a problem.
