- A team with experienced professionals to provide high accuracy Waterjet Cutting.
- Our mission is to give our customers an efficient, cost-effective quality product.
- We understand our customer requirements and provide them the best service in Waterjet Cutting at affordable price and quickly delivery.

Specifications

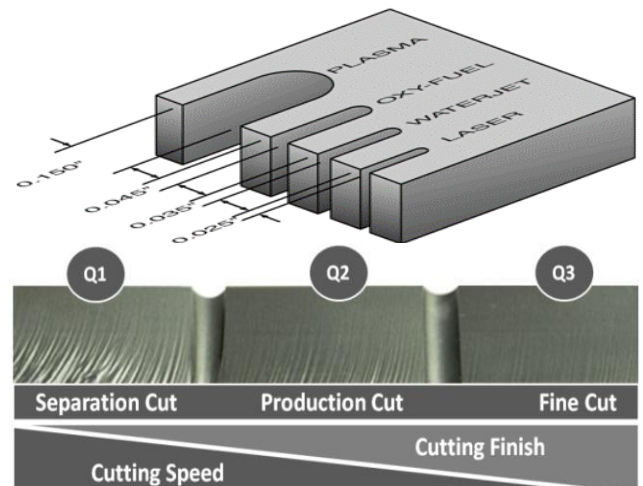

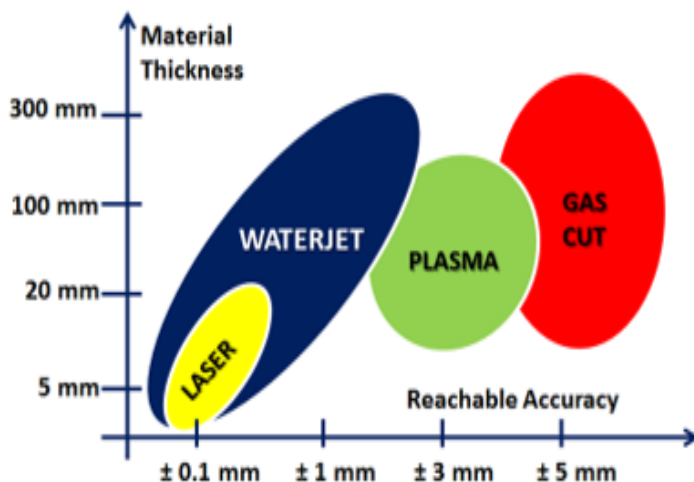

- Table Size - 3000 X 2000
- Thickness - Up to 250mm (10')
- Tolerance - Up to 0.1mm
- Load Capacity - 1500 kg/m2

Key Features

- Wide Range of Material Cutting
- Abrasive and Pure Waterjet cutting
- No Heat Affected Zone
- No Mechanical Stress

Cutting Technology

- The water jet is the perfect machine tool. Possibility of cutting virtually any material. No secondary treatment is required. Zero mechanical stress. Which allows cold cutting. Without thermal cut, which means that there is no change in density or changes in the basic characteristics of the material. And it's eliminating secondary material processing.

Applied Industries

- Engineering Industry
- Automotive Industry
- Architecture Industry
- Art & Signage Industry
- Aerospace Industry
- Construction Industry
- Rubber & Plastic industry
- Stone, Granite & Tile Industry

Materials can cut

Waterjet technology allows us to cut a vast array of products at high end thick. It can cut,
