

TRANSFORMING WASTE INTO HIGH-VALUE FUELS & ENERGY SOURCE

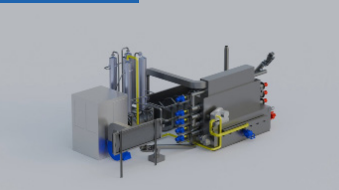

Infinite 8 Cycle is an innovative company specializing in advanced waste recycling and fuel enhancement technologies. Our mission is to transform waste into high-value fuel fractions, which can be further refined into premium products such as ether, white spirit, xylene, kerosene and ect.

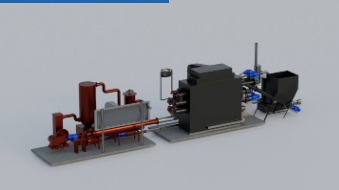

Factor 3000

Factor 1 - L

Factor 1 - LRP

Precision Vac 400

Market Potential:

- \$217B+ TAM with 1–2% penetration potential.
- Recurring revenue = 60%
- Regulatory moat: Bans on land filling/incineration accelerating adoption.
- Scalable tech: Modular plants t both German factories and Indonesian villages.

Business Model:

- Equipment Sales
- Pricing: £ 700K – £ 2.1M/unit
- Margin: 40–60% gross
- UPSIDE: Clients gain 1–2year ROI via tipping fees + product sales.

Maintenance Contracts

- Annual Fee: 50K – 200K/plant (covers parts, IoT monitoring, efficiency upgrades).
- Lock-in: 3-year contracts (90% client retention post-sale).
- Margin: 60%+ gross (recurring, high-margin, and defensible).

Team:

Our 17-member expert team combines decades of waste-tech and engineering experience, delivering scalable solutions with measurable ROI.

Funding Ask:

We seek £5M in total investment, allocated to:

- £2.5M – Factory acquisition (scalable production hub)
- £600K – Permits, Certification & process optimization
- £1.9M – Pyrolysis R&D (Factors 1–3 + electricity generating next-gen systems)”

Why Invest:

- Explosive Market Opportunity
- \$217B+ global waste-to-fuel market
- Modular plants 10x cheaper than incinerators
- High-margin streams: Equipment sales (30–50%), maintenance (60%+)
- 18-month milestones: £ 4.5 M revenue, 2 patents.
- HMRC Advance Assurance - SEIS & EIS

OUR CLIENT:

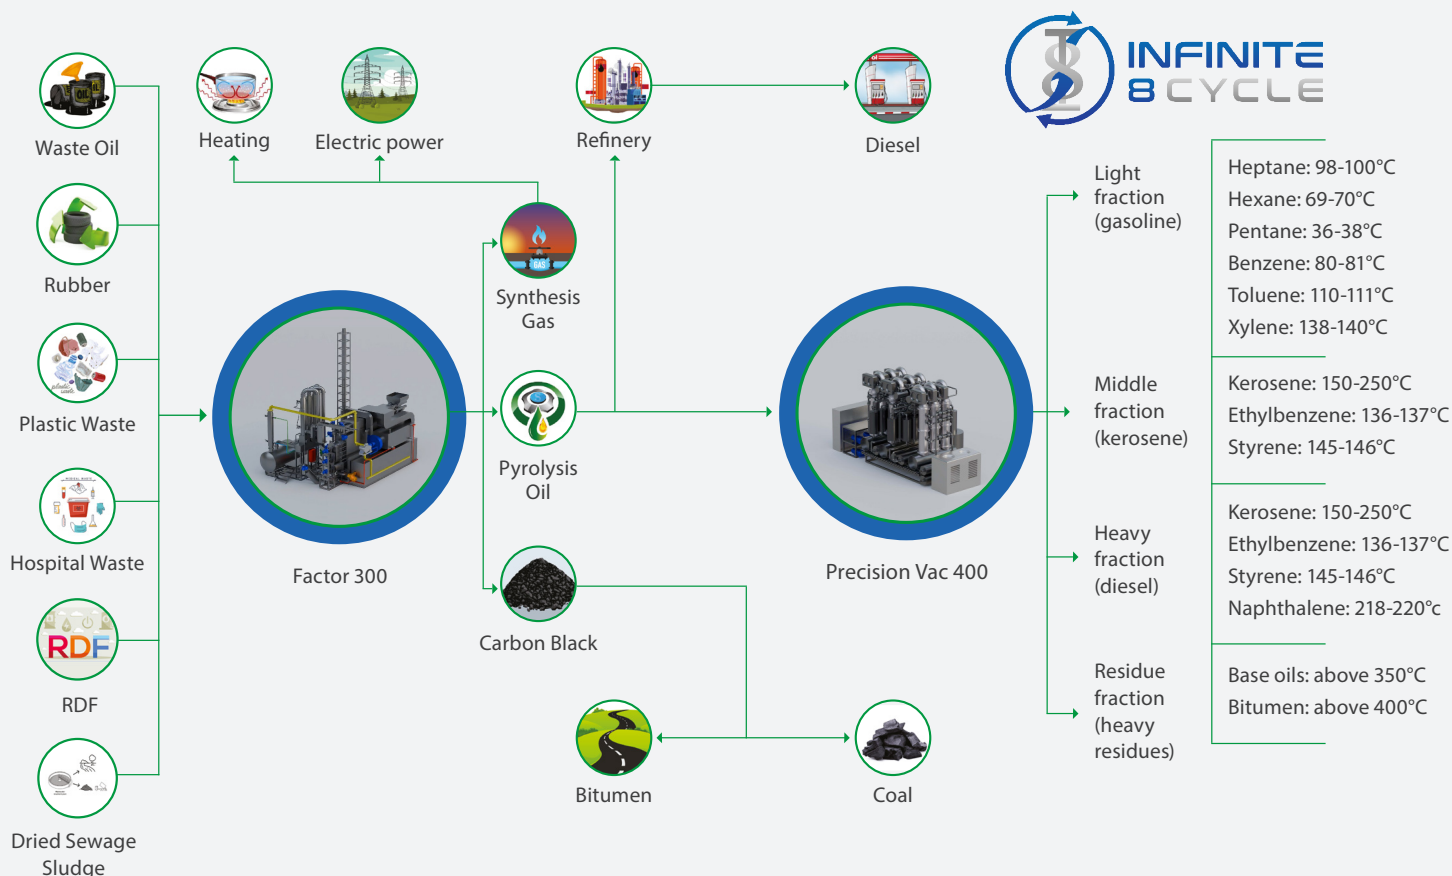

This year, you can meet us at leading waste recycling exhibitions:

- Bologna, Italy – June 10–12, 2025
- Dubai, UAE – September 15–17, 2025
- London, UK – October 7–8, 2025

We invite you to visit our booth at any of these events! Our team will be happy to provide detailed materials, demonstrations, and expert insights into our cutting-edge waste recycling technologies.

HOW IT WORKS

Waste Problem Annually (Million Tons)	Waste Oil 50 m/t	Rubber 30 m/t	Plastic 400 m/t	RDF 150 m/t	Hospital Waste 5 m/t	Dried Sewage Sludge 50 m/t
Factor 1 - L (30 T/24h) Price: £ 950 000	✓					
Factor 1 - LRP (30 T/24h) Price: £ 1,100 000	✓	✓	✓			
Factor 3000 - (72 T/24h) Price: £ 2,100 000	✓	✓	✓	✓	✓	✓

PRECISION VAC 400

PRICE: £700 000

WHAT WE CAN GET OUT OF PYROLYSIS OIL AND LIGROIN FRACTION

SYSTEM PAYBACK PERIOD 1 TO 3 MONTHS

Light fraction	Annual Price USD / Ton	Middle fraction	Annual Price USD / Ton	Heavy fraction	Annual Price USD / Ton
Heptane	\$1200 - \$1800	Kerosene	\$650 - \$850	Diesel fuel	\$950 - \$1150
Hexane	\$800 - \$1200	Ethylbenzene	\$900 - \$1200	Cumene	\$1050 - \$1300
Pentane	\$900 - \$1400	Styrene	\$1200 - \$1600	Phenols	\$1400 - \$1700
Benzene	\$700 - \$1100			Naphthalene	\$550 - \$720
Toluene	\$750 - \$1200				
Xylene	\$800 - \$1300				

Residue fraction	Annual Price USD / Ton
Base oils	\$800 - \$1200
Bitumen	\$300 - \$600
