Straight out of San Jose, California, comes the natural indie original rock & roll of The New Nothings. With a strong vibe of modern and alternative rock, The New Nothings have been compared to The Talking Heads, The B52's, Lou Reed and Tom Petty, and deliver high energy, memorable music and a rocking stage show.

"The New Nothings with our "golden buzzer" song of the week, Dulce de Leche. Of Course the top quality indie rock is as you'd expect but the genuine laugh-out-loud moments may surprise. Every day life lyrics presented with a genius comic delivery make this song the best combination of rock and humor since Frank Zappa's "Montana". - Whisky Club Review

"The New Nothings have dropped "Paso Robles"... A straightforward rocker, with hints of The Stones, Jet, and a smidge of Mellancamp, as well as their own styling, make for a tasty casserole of listening goodness. The vocals flow freely in a laid back, speaking/singing statement sort of way. Rocking, bluesy and comfortable to listen to. We like it for sure and know you will also." - A Keltstache New Music Review

"I really, really like this. I'm a sucker for quirky lyrics and you have some great ones. Little lines like "Her kisses come straight out of the dryer, folded and fluffed" makes me smile. - Drunk & Lonely, The Band
