And Brad Cruz and his Team

There are many Benefits of having Theatre Arts in our schools. Educationally drama class develops physical, artistic, and mental skills as well as personal and social development. At UCLA a study concluded that students involved in the ARTS tend to have higher academic performance and better standardized test scores- nearly 100 points better on the SAT according to a study by the College Board. The obvious benefits: improved self-confidence, better public speaking skills, the ability to work as a team, achieve a common goal to use self-discipline and to accept feedback! I truly believed that students will receive a better education from participating in A LITTLE DRAMA!. I have enjoyed working with all the students, they are so fun and creative!

I wish you all the best!

Thank you
