

Fetch Blockchain Ltd ("FBL") is a global blockchain technology company developing a generalised platform solution for Treasury Management and Accounts Payable using Procura, its stablecoin. The Procura stablecoin through its Treasury Management and Accounts Payable Open-source Platform revolutionises e-procurement, auditing, financing, and accounts payable for corporates, financial services companies and governments.

Procura Stablecoin

Procura is a stablecoin being built to be pegged to the USD. The Procura stablecoin payments and settling will be managed by a soon to be announced international digital assets bank.

Procura Treasury Management and Accounts Payable Platform

Procura Treasury Management and Accounts Payable Platform is the world's first blockchain open-source solution that provides major corporates, banks / financial service companies, and governments a complete end to end integrated solution for treasury management, accounts payable, financial lending and auditing using the Procura stablecoin.

Why Now? Treasury Management & Accounts Payable are BIG BUSINESS

- The \$22 trillion business-to-business (B2B) US payments market is facing a paradox on running stone-age processes within a digital demanding world.
- Governments across the world spend on average 12% of GDP or USD 9.7 trillion on public procurement making it a key economic activity of global markets.
- The global Accounts Payable Automation Market size is expected to grow from USD 1.9 billion in 2019 to USD 3.1 billion by 2024, at a Compound Annual Growth Rate (CAGR) of 11.0% during the forecast period. The increasing demand for controlled user access to reduce frauds related to payment is one of the major factors driving the growth of the market.
- The USD 5.0 billion Invoice Discounting Industry is in need of a major automation overhaul and anti fraud technology.

Why Procura is the next Killer Stablecoin app

Procura is an open-source generalised treasury management and accounts payable platform utilising the Procura stablecoin on a many to many platform is a game changer in speed, accountability, and security across the entire Treasury management and payments supply chain.

- Fully integrated open source functions allows corporates, financial services, government agencies and developers to automate the procurement and payment supply chain with the latest technologies and innovation in banking and financial services.
- Fast as lightning payment and auditing trails on a blockchain using the Procura stablecoin keeping fund allocation and transfer of payments valid in a straight through remittance process.
- Real time automated risk mitigation provides reliable and transparent activities of suppliers giving payers the means to automate and release payments in real time to trusted suppliers that complete work orders as required.
- New supply chain to working capital is here! Procura provides innovative supply chain lending criteria algorithms to improve SME financing options.
