

One-stop LED Display Solution Supplier.

INSPIRE YOUR LIFE

Company Culture

- Mission:** LED technology embellishes a better life;
- Vision:** On the basis of creating value for customers, to realize the financial freedom of employees;
- Values:** Integrity, Focus, Equality, Win-win.

> About Us

Since founded, Shenzhen **Dotsvision** Technology Co., Ltd. is keeping providing the One-stop LED display solutions all over the world, the products covers the Stage LED Display for event use, Outdoor LED Advertising Billboard, Indoor Commercial LED Screen, Commanding Center LED wall etc.

With the Motto of "A journey of thousands of miles may not be achieved through accumulation of each single step, just as the enormous ocean may not be formed gathering every brook or stream." Dotsvision products has been exported more than 120 countries, and has accumulated more than 3,000 Project Cases, including the projects for Stage Rental, Outdoor Advertising, Shopping Malls, and Government Bureaus etc.

Besides the talented R&D team averaged above 10 years experience in the industry, the company conducts the ISO9001:2000 system, the LED display products manufactured are in conformity with the certification of UL, CE, RoHS, ETL, FCC standard. Daily 7S management standards, IQC, IPQC, FQC, QA in each step of quality control ensure the high quality of the products.

Dotsvision Will be your trustworthy partner here in China.

Application Scenarios

Super Good Flatness, 0 Gap

- 500 x 125mm module size, no cross
- Embedded module design
- Unique mask design

Flexible Setup Supported

Accurate Curve and Cube Design, with innovative curve lock at 0, ±5°, ±10°.

Anti-damage System

Longer lifetime Big welding plate design, Anti-damage protector design.

Ultrahigh Refresh Rate

Real image performance 7680Hz Advanced PCB design.

Dancing Floor Function Supported

By covering acrylic on top of the LED tiles, to realize the simple dancing floor application.

Quick Swappable Power Box, Modular Design

LED module, Casing and Power Box is indepent unit, simple and quick maintenance supported.

Application Scenarios

Light, Thin & Durable

Carbon Fiber material cabinet Design, which is more light at 7.5kgs only. Besides, the Carbon Fiber cabinet has good toughness, durability with high and low temperature, more convient for stage rental use.

Quick Maintenance

Tool-free module replacement for fast maintenance. Front or back maintenance is supported.

Higher Transparency Rate

The transparency rate up to 40%, Lower wind resistance, to realize the perfect combination of stage and art.

Good Flatness

The large LED module makes the panel seamlessly, and the LED modules are interchangeable with same cabinet.

High Refresh Rate and Grey Scale

The photos without flicker and more vivid color.

Integrated Design

Integrated power box makes the replacement and maintenance easy and efficient.

Application Scenarios

Flexible Display, Creative Solution

Dynamic creativity and ultra flexibility, which makes the stage much more attractive.

Good Flatness

The panel is seamless, and the modules are interchangeable.

Anti-damage System

The PCB with Big welding plate and the corner with anti-damage protector design.

Ultrahigh Refresh Rate

Real image performance 7680Hz high refresh rate.

Module Interlocking Design

Ensures effective alignment and flatness to present the smooth surface when modules are stacked Vertically.

Patented Flexible Module Design

LED module, Casing and Power Box is indepent unit, simple and quick maintenance supported.

Curve and Straight Setup Supported

can reach ± 15 degree and small diameter circle shape.

Die Casting Design

Light Weight, Thin, and Firm enough for hanging and stacking installation.

Power and Signal Connector

The design of the Power and Signal connector is easier to plug-in and dismantle.

Outdoor IP65 Waterproof Grade

Outdoor Application with IP65 grade, anti-dust and water.

The whole series LED modules can be replaced from both front & back side.

Front Maintenance Supported

Back and Front Maintenance cabinet to meet different scenarios.

Energy Saving

The common Cathode LED modules which power by 2.8V and 3.8V power separately, could save around 40% electricity comparing to the traditional LED wall.

IP65 Waterproof Grade

With waterproof casing and outdoor LED modules, the product withstand the rainy weather to work continuously.

Naked Eye 3D Display

Besides flat LED billboard, curve LED wall, and 90 degree setup, the 80mm x 160mm LED module can make the smaller curve panels for the naked eye 3D LED wall use.

Ultra-wide Viewing Angle

With 160°-160° ultra-wide viewing angle, the screen can be seen from various directions.

Application Scenarios

Ultra-high Brightness Design above 10,000Nits

More than 10,000Nits brightness to ensure the vivid picture even in equatorial area, and keep enough brightness for outdoor use.

IP65 waterproof grade

Both front and back with IP65 waterproof grade, support naked installation without any cladding.

Different shape LED cabinet, 3D naked eye LED wall supported

Besides normal straight setup, the LED cabinet support 90degree, curve installation also. The 40 x 320mm small LED module makes the curve more smooth, brings the perfect 3D naked eye Performance

Energy Saving

The RGB LED powered by different voltage, and optimized PCB circuit design, saving the energy up to 40% than that of traditional LED cabinet.

Hub-pin Design Aluminium Die casting LED module

The AI. Die casting LED modules and cabinet support both front or back maintenance, with the good heat dissipation, the Hub-pin design ensure the signal durability.

Slim and light design LED cabinet

The LED cabinet thickness less than 100mm(95mm), within 30kgs, EMC class B standard supported.

Higher Refresh Rate without flickers, present the best advertising effect to the audience.

Slim Aluminium Die Casting Cabinet With Fast Locks

With better heat dissipation, only 70mm thickness slim light weight cabinet. The four side of cabinet with fast locks, which makes the installation fast and also make sure the LED wall is seamless.

IP65 Waterproof Grade

With waterproof casing and outdoor LED modules, the product withstand the rainy whether, and work continuously.

Hub-pin Design LED Module

With the pin connection, the modules will be much stable than that of the ribbon cable solution.

Hide Cables Design

The power and signal cables is hidden in the chamber which makes it looks tidy and safe.

Front Maintenance Supported

Both Back and Front Maintenance with power supply and receiving card to meet different scenarios

Auto Color Calibration

Build-in flash memory IC, to ensure the color uniformity after replacing any of the LED modules.

Front Maintenance Design

Fully front maintenance with the power supply and receiving card, makes it could be close to wall installation, slim within 10cm.

Perfect Ratio of 16:9

Cabinet size at 600x337.5mm, which is 16:9 ratio, to form the 2K,4K,8K resolution accurately.

HDR Function

The HDR function bring the perfect performance with dynamic videos.

Dual-backup Design

Dual-backup design of the power and signal, making the fine pixel products more steady and reliable.

Large Viewing Angle

The viewing angle can reach 160 degree horizontally without distortion.
