

THE FOLLOWING VEHICLES MUST NEED FRONT BUMPER **OFF** FOR A FRONT RADAR CALIBRATION

We want to make the calibration process faster and more seamless for you!
Once the first part of the calibration is complete, the bumper
be re-installed and calibrations can continue.

Explorer, Expedition, Ecosport, Escape, Edge, Bronco, Fusion,
Mustang, Taurus
Ranger and F Series trucks have a cover that we are able to
remove and re-install.

Navigator, Aviator, Corsair, Nautilus

All Models will need Front Bumper to be removed
to preform first step of the Front Radar Calibration.
