

Trac Anything - all-in-one project management, enterprise tracking solution on Salesforce.

Key Benefits

Comprehensive

An integrated set of services on one platform to manage project and expenses across your entire organization.

Stay compliant

Single source of truth enabling you to understand the true cost of acquiring and retaining project portfolios.

Rapid adoption

Intuitive to use on any device, no training is required. Used within Salesforce for rapid adoption and high engagement.

The only hybrid PMO app on Salesforce

Built natively on the world's most used, secure and scalable enterprise cloud platform.

We develop Salesforce-native business apps that are intuitive and easily integrated into your business to enhance your Salesforce experience.

We're dedicated to providing our clients with applications that reinvent the way they use the Salesforce platform in their business. We foster productivity, enable quick and convenient communication, and allow businesses to spend their valuable time working for clients, not on their admin.

Trac Anything – Project Management and Enterprise Planning on Salesforce. You can manage projects and your business with one tool. Create a project backlog & run a sprint. Track and manage everything that needs to be completed. A backlog item can be a task, user story, bug or anything that you want to work on.

SERVICES AVAILABLE

- Technical Support
- Installation and Setup
- Maintenance
- Application Support
- Guaranteed Warranty

Customizable Kanban boards to visualize progress and move items across statuses. Slice & dice with quick filters. Collaborate with your team right within the board. Bring predictability into your software development.

Trac Anything - Best-in-Class Enterprise Management, Project Portfolio Management and Enterprise Planning

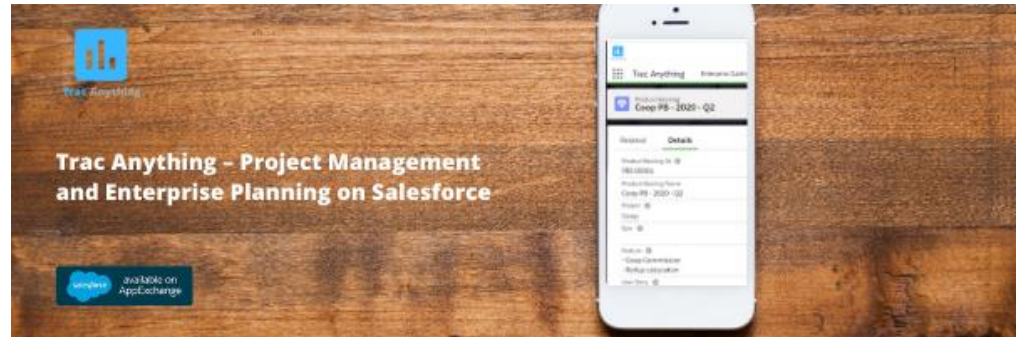

Use Cases

Incident Management.

Managing tickets and automating repetitive workflows has never been easier. The best part is, if you have a small team, you can start with Trac Anything's help desk support and scale up as your team grows.

Change Management. Plan, rollback changes with Trac Anything's web-based change management solution, and let relevant members evaluate and approve changes. Analyze and mitigate risks by assessing new changes before it's rolled out.

Asset Management. Maintain a repository of your clients' hardware and software details and monitor them automatically using Trac Anything's asset management.

Easy to integrate, simple to use. Hybrid PMO and agile delivery.

Trac Anything is a Salesforce native project management solution, built to integrate seamlessly with your Salesforce platform. The vast array of tools is agile and easily customized to your business and client needs. Ultimately, you will be more organized and get the best ROI on your Salesforce platform.

Through Trac Anything, team members can submit their weekly timesheet against any given project. Beyond Project Management's core offering, Trac Anything enables IT organizations to have a great handle on key Dev-Ops Management capabilities like Product backlog management, Sprint Schedule, and Release Schedule.

- **Meaningful business insights.** A centralized view of enterprise capital spends against project, campaign and more, that instantly calculates the direct impact on your revenue.
- **Free up time don't consume it.** Automate tedious project management processes and spend more time on work that requires talent – and contributes to company growth.
- **Focus on why you're spending.** Focus on why you're spending, not how, by putting your project plan on Salesforce.
