

Removal and Installation of Filters, Evaporative Media, and Mist Eliminators

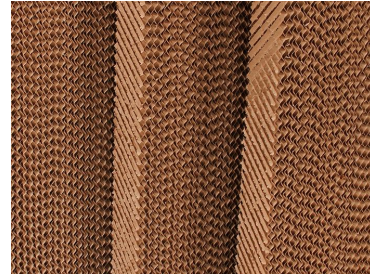

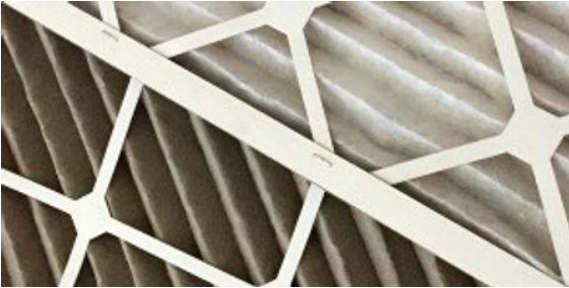

Filter Assist provides field service to Gas Turbine (GT) power plants. Air quality is critical to the life of your GT. Our products and services protect GT's from airborne particulates & contaminants from entering the inlet air stream. If you have already bought your filters, media, or would like us to get them for you...let us remove the old & install the new.

Call or Email us today & let Filter Assist help plan your next successful outage!

Product and Services Provided:

- Pre-filters and Coalescing
- Cartridge and Barrier
 - HEPA, Cylindrical, Conical, Corrugated, Synthetic Blend, Synthetic
- Filter Wraps, Evaporative Media, and Drift/Mist Eliminators
- Filter Element Changeout and Upgrades
- Evaporative and Drift/Mist Eliminators Changeout
- Technical Advisory and Inspection Services

At Filter Assist, we are committed to the highest quality service by staying true to our core values: SAFETY, EFFICIENCY, and RELIABILITY. We are a small business located in Boston, Massachusetts. We primarily serve the New England area and believe in taking care of our customers by being honest, respectful, and open with one another.
