

Removal and Installation of Flex Seals

Filter Assist provides field service to Gas Turbine (GT) power plants. Leaking exhaust gases are a safety hazard to plant personnel as well as the environment. Our engineering team will provide a field analysis of the failed inlet/exhaust part and provide a solution. If you have already bought your flex seals or would like us to get them for you...let us remove the old & install the new.

Call or Email us today & let Filter Assist help plan your next successful outage!

Product and Services Provided:

Exhaust Flex Seal Systems:

- FS-3
- FS-5
- FS-6, 6B
- FS-7B, 7E, 7EA
- FS-7F
