

Wicker & Rattan

Rattan is the most ecological natural resource . It can only be found in the rain forest as rattan needs trees for it to wrap on to reach for sunlight. This means that as long as there are trees in the rain forest, rattan will always be a sustainable raw material. Rattan furniture has always been considered outdoor furniture.

Now the modern technology has developed an alternative, an especially produced Synthetic Rattan. It looks identical to natural rattan and is ideally suited for the harshness of outdoor use.
