

Activating the care extender benefit

medihelp

Medihelp rewards you for taking care of your health through the care extender benefit, activated by going for specified health tests.

Step 1

Any family member goes for any of the following:

Step 2

The claim is processed and the test results are uploaded to your health profile on HealthPrint, unlocking the applicable benefit.

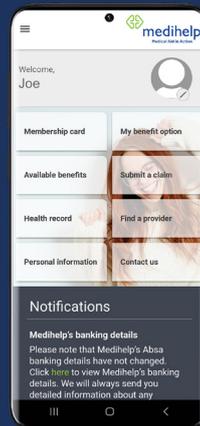

Step 3

Enjoy the additional care extender benefits that have been activated:

Added insured benefits

- A Pap smear per three-year cycle (women 21-65 years)
- A mammogram per two-year cycle (women 40-75)
- A prostate test (men between 40-75 years)
- A faecal occult blood test (FOBT) for people between 45-75 years
- One bone mineral density test per two-year cycle (women >65 years)

You can access your health record on the Medihelp app.

One extra GP consultation for the family for the year

- A combo health screening (blood glucose, cholesterol, BMI, and blood pressure) at selected pharmacy clinics in the Medihelp Preferred Pharmacy Network.

An additional **R1 000**

will be activated for the family to use for non-prescribed medicine once a combo health screening has been claimed from the added insured benefits.

Note: The care extender benefit applies to all options, except MedMove!. Benefits are paid at 100% of the Medihelp tariff.
