Cybersecurity Compliance Checklist

By Hughes Consulting 365

Keep your IT systems secure, audit-ready, and protected from costly breaches. Use this practical checklist to spot gaps, strengthen your defenses, and stay compliant.

✓ Access Controls
☐ Are user accounts reviewed at least quarterly?
☐ Is multi-factor authentication (MFA) enabled for all remote access?
☐ Are admin privileges limited and reviewed regularly?
\square Is there a clear process to disable accounts when employees leave?
✓ Network & Infrastructure
☐ Are all firewalls and network switches kept up to date?
\square Is your enterprise server environment fully patched?
☐ Are secure site-to-site VPNs configured for all locations?
\square Do you monitor network traffic for suspicious activity?
✓ Data Protection
\square Is all sensitive data encrypted in transit and at rest?
\square Do you back up critical systems regularly, and test backups?
\square Is your backup stored securely offsite or in the cloud?
✓ Policies & Incident Response
□ Do you have an up-to-date cybersecurity policy?
☐ Is there an incident response plan in place and tested annually?
☐ Do all staff receive regular security awareness training?
Do all olan 1000, to Togalar occurry awareness training.

Compliance Readiness

□ Are you meeting requirements for standards relevant to your industry?
(Example: SOX, PCI-DSS, HIPAA, if applicable)
□ Are audit trails in place for critical systems?
□ Are third-party vendors assessed for security risks?

★ Next Step

If you spot any gaps, Hughes Consulting 365 can help you address them quickly. Book a free discovery call to review your checklist, close security gaps, and keep your operations protected.
