

Pediatric & Neonatal Echocardiography Training Course Brochure

*This training course is now certified by National
Skill Development Council*

Different Levels of PNET

Delhi Child Heart Center welcomes you into the world of Pediatric & Neonatal Echo. We have divided this training course into three levels of training Level 1, Level 2 and Level 3.

Level 1: Knowledge of skills and related cardiology including anatomy/physics/all views includes Mannequin, hand movement, how to get views, Observership of cases.

Different Levels of PNET

Level 2: Hands-on and Observership; Direct supervision and one on one learning. Level II ensures you get to learn the probe movements and understand the routine of following the steps of echocardiography as a routine.

Level 3: Remote Supervision and Critique. You need to start practicing but you still need supervision. This level is meant for you to ensure understand the need to follow the sequence and you fine tune your echocardiography skills.
