

FREE IAM READINESS ASSESSMENT

Empowering SMBs in the DMV to Securely Adopt Cloud Solutions

Why Identity and Access Management (IAM) Matters

Cloud adoption is no longer optional—it's a competitive necessity. But many SMBs delay cloud migration due to concerns over data security, fragmented access, and compliance. This assessment helps your organization evaluate readiness and build a roadmap for a secure and seamless cloud transition.

IAM Readiness Checklist

- ☐ Identity Infrastructure (AD, Azure AD, Local Directories) documented and secure
- ☐ MFA (Multi-Factor Authentication) enforced across users
- ☐ Password management strategy implemented (avoid password sprawl)
- ☐ Regular review of orphaned or inactive accounts
- ☐ SSO (Single Sign-On) implemented for cloud and on-prem apps
- ☐ Lifecycle management for onboarding/offboarding users in place
- ☐ Compliance frameworks considered (HIPAA, SOC2, NIST, CMMC)
- ☐ Privileged accounts managed and monitored
- ☐ Cloud readiness assessment completed (Microsoft 365, Azure, Okta)
- ☐ Zero Trust security principles implemented or planned

Next Steps

After completing this assessment, schedule a free consultation with IT-SICS Consulting. Our certified experts will provide tailored guidance for your IAM journey.
