SPECIAL FEATURES

Polystyrene Mouldings

Since polystyrene moulding is free of deformation, warping, or decay due to moisture, while wood moulding and MDF moulding are weak in moisture and deform easily, polystyrene can be used in diverse applications for different spaces.

From modern style to classic

It provides for the application of diverse and unique designs by reproducing beautiful designs and antique wood texture on the polystyrene moulding, as well as providing modern designs. It also offers an excellent economic advantage over MDF or wood moulding in terms of price.

Eco-Friendly

Polystyrene is variously used for beverage containers, fridges, etc., since it complies with the food hygiene safety specification in accordance with the U.S. FDA. In particular, polystyrene is a recyclable, eco-friendly material suitable for interior moulding, as it is excellent for insulation and moisture.

In the contaminant releasing experiment of building interior decoration materials, all three components were scarcely detected on our products.
