### FILM PRODUCTS

#### Get the T-Grain Emulsion Advantages

T-GRAIN Emulsion offers a state-of-the-art technology that's specifically designed for industrial radiographic testing applications. What does that mean for you?

#### Outstanding Image Quality

With a cold, clean image tone and low noise, you get a sharp, clear image every time.

#### Convenient Processing Flexibility

The films work well in standard process cycles—but they're just as effective in longer or shorter process cycles.

#### Superb Durability

The films are static resistant, more heat resistant than conventional systems, incredibly sturdy, and you'll get fewer artifacts from handling.

#### Non-Interleaved Film (NIF)

FILM MARKERS

South & QED Lead Figures

Our manufacturing process makes a clean, sharp-edged character, free of flash and porosity. All numbers and letters are pre-packed and sold in quantities as follows:

Item	Style	Quantity
1/4" Lead Figures	Deep "V" (South) Flat Face (QED)	Pack of 100
3/8" Lead Figures	Deep "V" (South) Flat Face (South)	Pack of 50 Pack of 100
1/2" Lead Figures	Deep "V" (South) Flat Face (South)	Pack of 50 Pack of 100
3/4" Lead Figures	High Energy (South)	Each

Lead Figure Cases

Designed to hold both numbers and letters. These lead number cases are made of ABS high impact plastic and contain a polyethylene sponge inside the cover which prevents accidental mixing of numbers and letters when the cover is closed.

1" Reference Standard

Like magic... 1" reference ball attaches itself to any ferromagnetic material, making a radiographers life just a little easier. The ball can be used as a reference for measuring pipe wall.

For accurate measurement, the ball must be put as near as possible to the exact side of the pipe parallel to the image media so that the enlargement of the pipe wall is the same as that of the ball.

If the comparator or ball is not touching the pipe because of insulation, aim the source at the center of the space between the two. This will help insure an equal amount of enlargement to the ball and the pipe wall. (Think of how the source side of an elliptical 2" weld is distorted more than the film side).

Item	Description
SP*001201	1" OD Magnetic Reference Ball (Includes Certificate of Conformance)
SP*001218	1" OD Non-Magnetic Reference Ball (Includes Certificate of Conformance)

IMAGE QUALITY INDICATORS (IQI's)

South Plaque Type Penetrameters

SOUTH precision IQI's rigidly conform to and exceed requirements of each code. Lead figures identifying the IQI size are affixed to the IQI and each IQI is chemically etched identifying the specification. All IQI's are accompanied by a certificate of conformity and are traceable to the National Institute of Standards and Technology (NIST).

Item	Material Group	Material	Sizes
ASTM E1025 (E142)	1	Stainless Steel	#5, #7, #10, #12, #15, #17 and #20 #25, #30, #35, #40, #45 and #50

*\*API 1104 Specifies the use of IQI's Conforming to Requirements of ASTM E747 for Wire Type IQI's*  
*\*Additional Codes, Sizes and Material Groups are available upon request*

IQI SELECTION

All ASME sections reference ASME Secion V SE 1025 (identical to ASTM E1025). IQI selection for use is determined using Table T-276 as shown below:

South Standard Penetrameter Shims

Some codes require that shims be placed under the IQI to compensate for the thickness of a backing ring or weld reinforcement. Shims are supplied in the same materials as IQI's. They are usually available in increments of 1/16", from 1/16" thick thru 1.0". The general dimension (¾" W x 1¾" L) allows approximately 1/8" clearance on each side of the IQI they are to be used with.

QED & South Wire Type IQI's

The only IQI acceptable by API 1104 (20th Edition) and accepted as an alternative to plaque type IQI's by ASME Section V and AWS, these Wire Type IQI's are encapsulated in vinyl for durability. Available in 4 sizes (Sets A, B, C and D) and inspected with instruments calibrated and traceable to the National Institute of Standards and Technology (NIST).

ASTM E747 Wire Type IQI's are manufactured with 6 wires in each size, as shown in Table 1.

Each size IQI covers a range of thicknesses for which it is used, based on a standard 2T level of inspection.

Film Cassettes

- SOUTH - This completely flexible film holder (cassette) is easily molded around irregular shapes to ensure proper contact necessary in direct exposure technique. Made from vinyl treated paper with all edges reinforced with tape for durability, this rugged cassette is available in various sizes. Black Only.
- CLOTH - Tough, water resistant, and highly durable. Our cloth cassettes are made with the seam in the center, on the back cassette. One end of the cassettes is sealed with gaffers tape and the other includes a rubber band for easy opening and closing of the cassette.

*\*Custom Sizes are Available Upon Request*

- WARREN - "Flexible" Type Film Holders: Outer Cover made of tough vinyl impregnated fiber stock but flexible enough to contour around shapes. Comes in two colors (specify when ordering) Blue or Black. Inner film envelope made of black shoe material for light tight protection.

*\*Also Available Upon Request - WARREN - "Semi-Rigid" or "Rigid" Film Holders. Ideal for Heavy Castings*

Paint Markers

► Since the 1970's, Sakura has been developing markers and pens for use in industrial environments. Extensive research, development and user feedback have kept Sakura in the forefront of meeting the market demand for specific product performance in various industrial applications such as ship building, welding, HVAC, highway construction, aerospace, plumbing, automotive assembly, petrochemical, shipping and electronics.

► Markal Valve Action is a fast-drying liquid paint marker that provides long-lasting, wear- and weather-resistant marks that are safe for almost any surface. As the most versatile liquid paint marker in the world, the xylene-free paint reduces user health risks and is available in 18 bold and fluorescent colors for accurate mark identification.

70mm Film Storage Boxes (100 Count)

Item	Description
70mm x 100 Compartment	<p>The top and bottom of our one-hundred (100) cell film storage box is constructed of heavy (200 BP) white corrugated cardboard. The die cut design with locking tabs is easily assembled by hand without the use of tape or staples. The pre-assembled one-hundred (100) cell divider sets in the bottom of the box, over a numbered grid that automatically denotes a space for each of the one- hundred (100) film.</p> <p>The separate lid is die cut design and printed with spaces allowing for all pertinent information as to the pipeline owner, engineering company, contractor, radiography contractor, job numbers, film numbers, etc. The lid also has a printed grid that allows space to record the disposition of each weld x-rayed. This 17" x 17" x 3" storage container allows an inventory of radiographs to be taken without calculating how many odd number films each box contains.</p>

RADIATION SAFETY
WARNING SIGNS & LABELS

Radiation Signs

Our radiation signs, sun fast and sealed in two sheets of .016" vinyl, are manufactured in a variety of types. Our most popular are:

- DANGER – High Radiation Area
- CAUTION - Radiation Area Authorized Personnel Only

Available with Velcro for securing to a barrier rope or grommets on the corners of attachment to a flat surface.

PERSONAL DOSIMETRY

Electronic Dosimeters

RAD-60 ELECTRONIC DOSIMETER

RAD-60 Personal Alarm Dosimeter is a precise radiation measuring instrument for reliable detection and registration of radiation in order to ensure the personal safety of the user. It is suitable for a broad range of everyday radiation monitoring purposes in stand alone conditions.

KEY FEATURES:

- ▶ Solid state Detector
- ▶ Compact (3.1" x 2.6" x 0.8") and Lightweight (2.8 oz)
- ▶ Standard AAA Alkaline Battery (1800 Hours of Operation)
- ▶ Digital Display for Integrated Dose or Alternatively Dose Rate
- ▶ User Selectable Alarm Levels for Both Dose and Dose Rate
- ▶ Increased Buzzer Volume
- ▶ Ruggedized Clip Fixing / -4 °F to 122 °F operational, humidity up to 90% RH
- ▶ Measurement Range: Dose (0.1 mrem - 999 rem) / Dose Rate (0.5 mrem/hr - 300 rem/hr)

ADR-1 DOSIMETER READER

The ADR-1 Reader Head is designed to read and manage RAD-60 series electronic dosimeters in modern PC environment. The Reader can be used with Dose Control I Dosimetry System as well as with ADR-1/50 Dosimeter Configuration software.

DOSIMETER CONFIGURATION SOFTWARE

- ▶ Dose and Dose Rate reset
- ▶ Dosimeter configuration set-up
- ▶ Alarm levels set-up
- ▶ ID, Work code and Memo set-up

Item	Description
1233-218	RAD-60R Personal Alarm Dosimeter
1233-156	ADR-1 Dosimeter Reader. Includes: RS-232 cable and 12V power supply (No Software)
1233-163	ADR-1/50 Dosimeter Configuration Kit for RAD-60. Includes: ADR-1 Reader, ADR-1/50 Dosimeter Configuration Software, RS-232 cable and 12V power supply

DMC 3000 PERSONAL ELECTRONIC DOSIMETER

Our DMC 3000 Electronic Dosimeter represents over 25 years of real-world electronic dosimetry experience, continually refined through customer feedback.

The unique, high contrast and backlit LCD display provides a clear indication of wearer's dose and ambient dose rate for deep dose equivalent. More importantly, multiple methods (audible, visual, and tactile) are utilized to alert the wearer of alarm conditions.

The DMC 3000 provides all of this protection, for over 2500 hours of continuous use, with a single AAA alkaline battery.

KEY FEATURES:

- ▶ Loud, vibrating and dual ultrabright LED alarm
- ▶ Highly visible backlit display
- ▶ Simple 2-buttons navigation
- ▶ Additional modules (Beta, Neutron, telemetry and PRD)
- ▶ Superior X-ray and gamma energy response
- ▶ Exceeds applicable IEC and ANSI standards
- ▶ Excellent immunity to electromagnetic interference
- ▶ Designed for ruggedness and durability

MEASUREMENT RANGE:

- ▶ Dose: 0.1 mrem to 1000 rem
- ▶ Rate: 0.01 mrem/hr to 2000 rem/hr
- ▶ Saturation Indication: above 1000 rem or 1000 rem/hr

MECHANICAL CHARACTERISTICS:

- ▶ Case: Rugged, high impact polycarbonate-ABS
- ▶ Dimensions: 3.4 x 2.3 x 0.8 in max. without clip
- ▶ Weight: 3.1 oz with alkaline battery and clip

ENVIRONMENTAL CHARACTERISTICS:

- ▶ Temperature range: 14°F to 122°F
- ▶ Relative humidity: < 90% at 108°F
- ▶ Storage: -4°F to 160°F
- ▶ Shock, vibration and drop resistant (5 feet on concrete)
- ▶ Waterproof IP67

ALARM FEATURES:

AUDIBLE & TACTILE

- ▶ Alarming speaker with level of 85 dB at 12 in, frequency < 4800 Hz
- ▶ Vibrating alarm

VISUAL

- ▶ High efficiency red flash LED on front
- ▶ 3 top LEDs for Alarming (Red), gamma counting (Green), and Hp (0.07) or Neutron counting (Blue)

HANDS-FREE DOSIMETER READER - LDM 320D & LDM 320W

The LDM 320D and LDM 320W readers operate using software packages installed on computer (PC) and communicate with DMC 3000 dosimeter in hands-free data exchange mode.

When used with the DMC User software, it functions as an interface to read and write the internal data of the DMC 3000 dosimeters.

CUSTOMIZE

- ▶ Adjustable dose and dose rate alarms
- ▶ Adjustable and acknowledgeable dose and dose rate warnings
- ▶ Configurable visual and audible alarm chirp

Dosimeter Chargers and Pouches

- 750-6 Piezoelectric Dosimeter Charger can zero a variety of quartz or carbon fiber dosimeters by simply squeezing the lever of the piezoelectric generator. The charger requires absolutely no batteries...ever! By pulling the trigger, a dosimeter is easily placed in or removed from the Charger. The clamping action automatically holds the dosimeter for you. Ideal for using in Field Operations.
- 909B Dosimeter Charger - Easier charging, viewing, dosimeter protection and improved accuracy... these are the biggest reasons that the 909B Dosimeter Charger is the best value on the market today!

WOLF Developing Hangers (Clip-Type)

Clip-type hangers for tank development of sheet films. Four clips are attached to a stainless steel frame; the upper two are mounted on a bow string to keep the film taut. The interlock design of the clip results in accurate alignment of pin and hole and permits better washing in the clip areas. Larger sized have loop guides to hold the bow spring and top clips in line to maintain proper tension. Hangers hold two film - Made in the USA!

Miscellaneous Darkroom Supplies

- ▶ The Mini Comparater 7X is a handy and accurate optical measuring instrument composed of a #5 reticle. Compared with conventional magnifiers, the Mini Comparater 7X is smaller, more convenient for carrying and reasonably priced.
- ▶ MD-1 is a pocket-sized plastic scale to aid radiographers in the correct size identification of internal gas porosity and rounded indications in welds. Can be used in conjunction with the ASME codes dealing with rounded indications characteristics.
- ▶ MD-2 is a pocket-sized plastic scale to aid radiographers in the correct size identification of indications in pipe welds with outside diameters greater than or equal to 60.33 mm (2-3/8 in.). Can be used in conjunction with API 1104.
- ▶ Radiation Dose / Distance Calculator - This is a companion tool to the Radiation Exposure Calculators. This calculator estimates the hazard area associated with isotope radiographic operations. Can be used to assist auditors and radiation safety officers when checking the accuracy of radiation survey reports.
- ▶ Exposure Calculator - Available in durable plastic, exposure calculators are designed to provide rapid and precise exposure times for gamma radiography of both Cobalt 60 and Iridium 192.
- ▶ Carestream NDT Image Guide - This guide is designed to help you identify and understand a wide variety of casting and welding defects that appear on images obtained during Non-Destructive Testing (NDT).

MOBILE DARKROOMS

Lemker & Harris Darkrooms

Building Darkrooms Since 1975

Lemker & Harris is the leading manufacturer of mobile fiberglass RT darkrooms and developing tanks for the NDT service and inspection industry in the USA. We’ve been a family owned business operating since 1975.

We have three models of darkrooms in our “off the shelf” designs. They are the 6’, 8’, and 8’ Generator. All of these models include a developing tank, front foil, 26 hanger dryer, driver side cabinet, and a cabinet above the developing tanks recessed into the foil. You then have the option of whether or not you want to go with the roof mount RV Style air conditioner, or if you want us to install a standard window unit.

We are here for the long haul and stand behind what we build. Our typical unit usable life is over a decade and with proper care, we see them last even longer.

Item	Description
CR6	L&H 6' Darkroom w/ Rear Mount AC
CR8	L&H 8' Darkroom w/ Rear Mount AC (Full bed width without generator compartment)
CR8G	L&H 8' Generator Darkroom w/ Rear Mount AC (Generator compartment on driver's side)

*\*Roof Mount AC is an Available \$350 Option\**

6' Darkroom

This unit is the most popular with pipeline work. Combined with an 8’ bed, you have ample storage for anything you may not want to load into a darkroom, but need on the right-of-way.

8' Darkroom

Our 8’ units give the technician the most room inside possible for them to work. They also have the most storage inside of the unit. For plant/shop work, this unit is a go to for many companies.

8' Generator Darkroom

This is just like our standard 8’ unit, but with the exception of having a convenient storage compartment on the driver’s side to store a generator. This unit is versatile as it allows you to have the interior space of an 8’ unit with space to keep a generator for those times that there is no supplied power to hook up to.

**FREE  
INSTALLATION**

*We will install your new darkroom on your truck at no additional cost, if you pick up at our Houston facility.*

Miscellaneous Darkroom Products

L&H DEVELOPING TANKS

Our Developing Tanks are Widely Considered to be the Industry Standard

The standard design is (5) 10 gallon compartments, which we refer to as the "5 Even". This has been the design that 95%+ of companies have preferred for at least the past 15 years, but we are also happy to provide a developing tank built to your specifications to fit your needs.

Starting in late 2019, we replaced the welded stainless pipe/stud that was used to secure the lid with a serviceable stainless forged receiver with a removable stud that allows you to replace the threaded stud at any point if needed.

It is one of the many ways that we are constantly pushing ourselves to see if there is a better way for us to provide an even better product for our customers.

## INDUSTREX PROCESSORS

### *Quality Images, Efficient Output, Energy and Water Savings*

INDUSTREX M37 Plus for space-saving design and mid-volume output or the INDUSTREX M43iC for high-volume output

#### **M37 Plus Film Processor**

The tabletop INDUSTREX M37 PLUS is ideal for automatic processing in mid-volume facilities. While compact, it offers the output you need and the excellent image quality and reliability you demand.

The new INDUSTREX M37 Plus film processor incorporates all the experience and features you've come to expect from the INDUSTREX line of products for NDT applications. The processor ensures totally automatic film handling and supports nine programmable-controlled processing channels that allows for flexibility in your day-to-day NDT film production.

#### **Features Include:**

- Ease of operation with nine programmable-controlled processing channels
- 17" processing width
- Capacity of 33 sheets/hour (14" x 17") in recommended processing cycle
- Intermediate rinse rack bath system
- Automatic replenishment system for developer and fixer
- Automatic anti-oxidation and anti-crystallization cycles
- Enhanced cold water cooling system
- Unit pre-configured with connection fittings to simplify installation of optional external chiller

#### **Standard Accessories Include:**

- Two 8 gallon replenishment storage tanks
- Light tight feed-tray cover
- Table stand
- Re-locatable controller unit for operator convenience
- Spare part kit

#### **M43iC Film Processor**

Designed to meet the needs of high-volume Non-Destructive Testing customers, the INDUSTREX M43iC provides multiple processing cycles and dry-to-dry processing in as little as five minutes.

This processor also comes standard with an integrated closed-loop chiller to ensure consistent temperature in hot environments or when water supply is not temperature controlled to further enhance capability and image quality in harsh NDT environments.

#### **Features Include:**

- Up to nine programmable-controlled processing channels for maintaining preferred settings such as processing speed, developer temperature, fixer temperature, dryer temperature and replenishment rates
- High processing capacity of up to 58 sheets/hour (14" x 17") in the recommended processing cycle for improved productivity
- An intermediate fix rinse system that enhances process uniformity to both sides of the film
- Feed-tray cover that allows for room light operation
- Integrated chiller unit that maintains developer temperature uniformity in hot environments
- Low level monitoring of all tank solutions

#### **Standard Accessories Include:**

- Replenishment storage tanks
- Light tight feed-tray cover
- Re-locatable controller unit for operator convenience
- Spare part kit

## HPX-PRO Portable Digital CR System

The HPX-PRO CR system is built for high image quality, improved productivity and extreme portability. This next-generation system is lightweight (35 lbs.), portable CR imaging solution that is quick to deploy and rapidly produces high-quality images utilizing a new single-pass scan/erase protocol. The HPX-PRO's software incorporates a new user interface designed to get you set-up and imaging fast, with batch mode

capacity to keep in pace with extreme process conditions like pipeline imaging. The new software tools also provide quick image analysis and customized reporting for generating unique customer reports in seconds. From hardware to software, to deep in the field and instant image sharing, the HPX-PRO is a complete system, designed to improve productivity.

## HPX-PRO

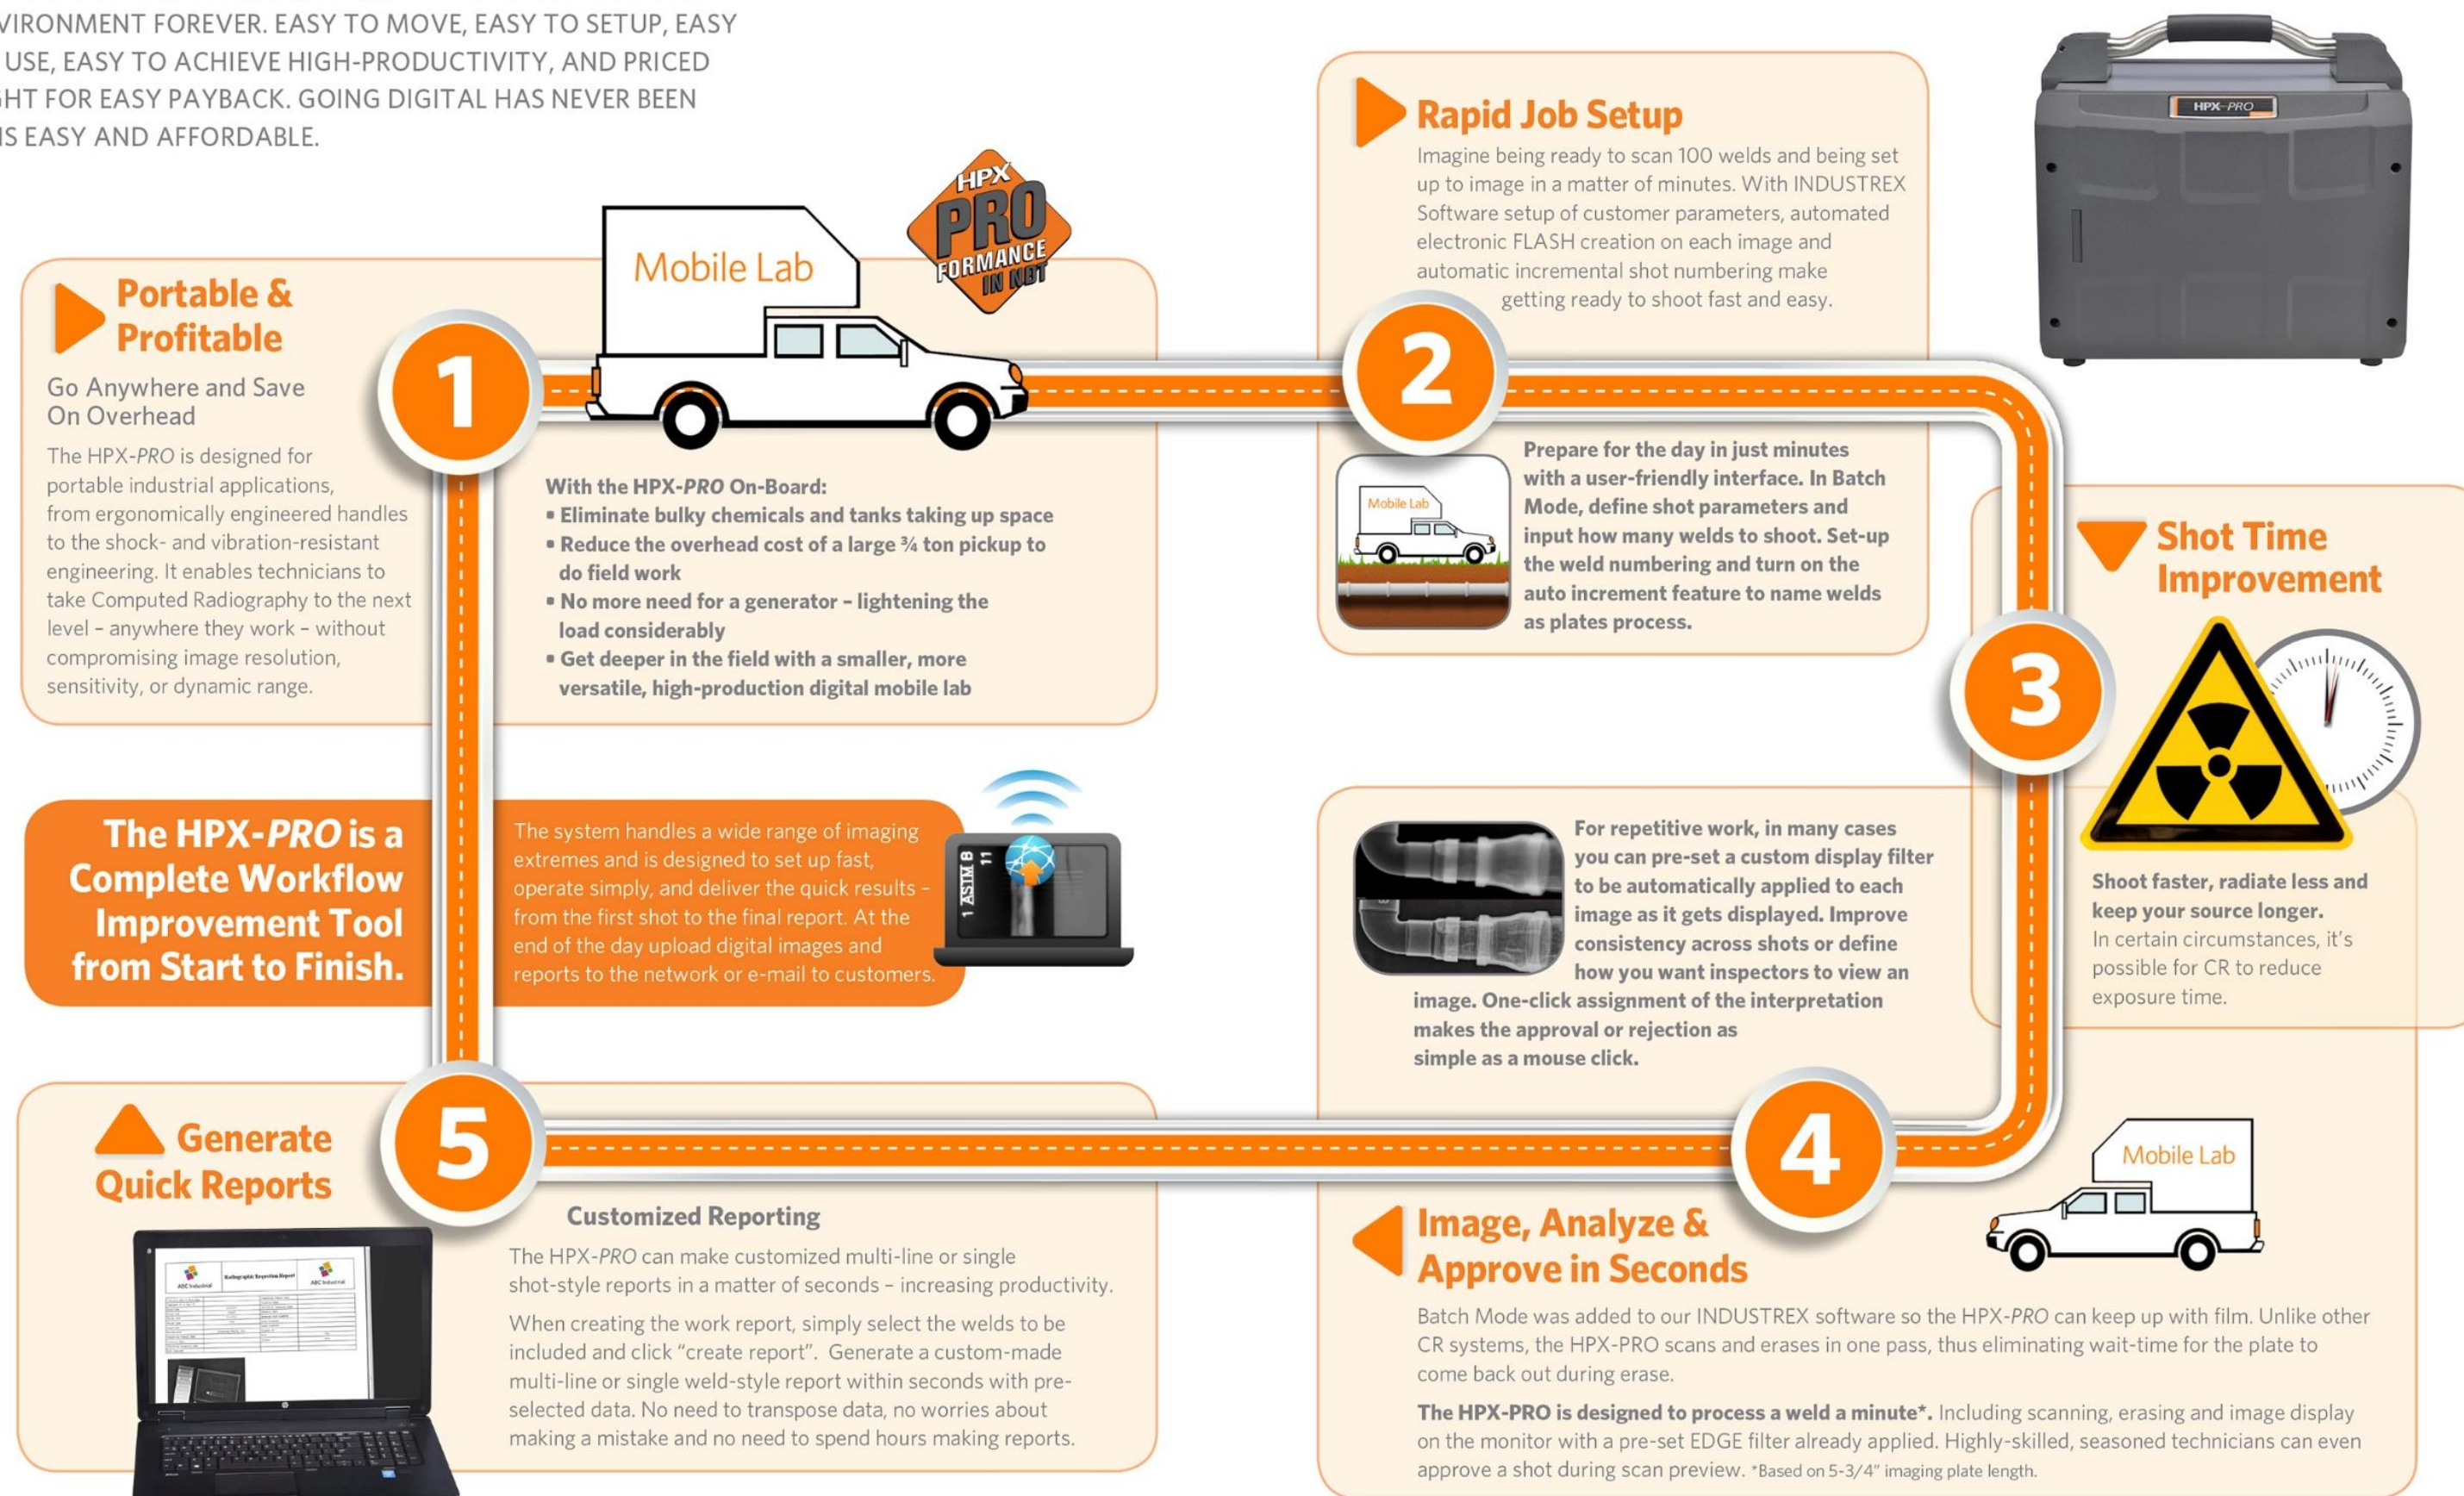

Carestream spent a considerable amount of time working in the field with mobile x-ray technicians to help improve workflow. The HPX-PRO is only one piece of the total imaging solution. From shot time to final reporting, everything had room for improvement. And we met the NDT industries challenge.

- Weighing in at just 35 lbs. and with a less than 12" width can be hand-held with ease.
- Can be operated by using a common 24v power tool battery (4 hour standby/ 45 minutes active scanning and erasing per battery)
- INDUSTREX Custom Reporting tool will help you finish your day a lot sooner, and with more productivity. Once you have all your shots done, with the click of a button you can create customer reports in a matter of seconds.

### PRO-fessional Workflow for High PRO-ductivity

THE HPX-PRO WILL CHANGE THE WAY YOU WORK IN A MOBILE ENVIRONMENT FOREVER. EASY TO MOVE, EASY TO SETUP, EASY TO USE, EASY TO ACHIEVE HIGH-PRODUCTIVITY, AND PRICED RIGHT FOR EASY PAYBACK. GOING DIGITAL HAS NEVER BEEN THIS EASY AND AFFORDABLE.

## HPX-PRO On-the-Go

## **HPX-1 Plus Digital CR System**

The HPX-1 Plus offers many improvements. Improved optics for better imaging, up to 30% faster throughput on long saturated plates (very high exposure), an improved imaging plate transport system to protect imaging plates, higher mechanical reliability and a more user-friendly DICONDE compliant software for the best experience in digital imaging.

The HPX-1 Plus is a full width CR reader capable of running extra long imaging plates. The system has a wide dynamic range with high sensitivity, making it ideal for almost any type of imaging application. Whether you're using a gamma or X-ray source, the HPX-1 Plus' high sensitivity can help reduce shot time. It shows exceptional performance in weld

applications, delivering weld-quality images consistently and dependably.

Carestream's award-winning HPX family of digital products have improved field reliability and enhanced the capabilities in the NDT marketplace. Long plate and multi-plate scanning combined with SmartErase boosts output productivity so you can get more done in a day than ever before. Our exclusive positive pressure filtered air system keeps dust and dirt out for cleaner images in both the laboratory and in remote operations. With a shock and vibration resistant design your team can image in the harshest of environments bringing a new level of confidence to digital imaging in the field.

**HPX-1** Plus

### **Ultra High Image Quality**

**Pixel Pitch:** 25µm, 35µm, 50µm and 100µm operation

**Spatial Resolution:** 50 microns or better (12 lp/mm)

**Laser Spot Size:** 20µm (measured at 85% of peak)

### **Positive Pressure Fans for Dirty NDT Environments**

Let's face it, NDT environments can be dirty. Drum and flat bed style scanners collect contaminants on the surface where they can be transported into the system or into the optical path and be imaged. HPX-1 Plus is the only CR system on the market that has positive airflow to keep contaminants outside the unit.

### **Dual Air Filters (including HEPA)**

Clean air is critical to keeping the equipment cool and the imaging areas clean. The HPX-1 Plus is the only system outfitted with dual filters to make sure the environment is kept outside.

### **Image Plate Flexibility**

HPX systems are one of the most flexible CR systems on the market capable of handling raw imaging plates, multiple plates at one time, custom cut sizes (with Plate Carrier), hard cassettes and long Plates (up to 60") without special feed guides.

### **Plate Transportation System**

The HPX-1 Plus plate transport system has always minimized contact with the imaging plate. Unlike magnetic plate drive systems that require uniquely designed imaging plates (which can be costly) or drum systems that advise using plate protective covers to avoid plate damage, the HPX-1 Plus runs plates phosphor side up with a proven transport system that won't damage your imaging plates.

### **Improved Imaging**

HPX-1 Plus' improved PMT's improve its sensitivity and reduce unwanted artifacts. CR systems often also make it possible to lower your exposure while still achieving the required sensitivity. Our adjustable PMT and Laser Power allow you to fine tune every image for optimum capture every time.

### **Powerful Software**

HPX-1 Plus is operated using our powerful INDUSTREX software that includes a host of features for measurement, custom designed EDGE Image Filters, full DICONDE compliance, and many other tools designed specifically for NDT.

CR IMAGING PLATES

The Carestream INDUSTREX improved Flex GP, HR and XL Blue Digital Imaging Plates are:

- Flexible – Wrap around most shapes
- Sharp – Better resolution than high-speed films, and a suitable replacement for many applications
- Available in Multiple Sizes – To cover a wide range of applications
- Versatile – Use in a rigid or flexible cassette
- Efficient – Phosphor plates can be erased and reused thousands of times, require less exposure than film, and provide faster image access
- Certified – All plates meet requirements for the highest system class per EN 14784-1 and ASTM E 2446

General Purpose (GP)

The general purpose imaging plate is ideal for shots where fine detail is not required. Good for profile shots. It requires the lowest dose, which helps productivity. This plate is best utilized for high energy X-ray or Gamma applications. Typical industries are securtiy, military, and castings.

Item	Size
1008564	14" x 17"

High Resolution (HR)

The high resolution imaging plate is best for applications where the best imaging quality is required. This plate produces weld quality images, and has the best detectability (contrast sensitivity) in the industry. This plate can be used for general X-ray, and Iridium or Selenium applications. Typical industries are oil and gas and aerospace.

## HPX-DR Non-Glass DDA Detector

### NEW NON-GLASS DR!

Carestream NDT once again introduces breakthrough technology for NDT field imaging with our new non-glass DR detector. The new HPX-DR Non-Glass detector design incorporates a tougher plastic material instead of glass for maximum durability against the rigors of NDT field work.

The HPX-DR Non-Glass detector virtually eliminates costly repairs for broken glass. It comes with a 2-Year warranty and a free loaner program so you can reduce downtime and the expense of purchasing redundant detectors.

The HPX-DR detector is unique in design – coming standard with a rugged, weatherproof enclosure perfect for remote field work. Unlike other panels that claim a weatherproof design when used inside their protective carrying case, this detector has an IP57 enclosure rating without the protective case! With the HPX-DR you can stop wrapping your DDA panel in bags and keep working in rain, snow, mud or whatever Mother Nature throws at you!

- **REDUCED EXPOSURE** - DDA panels are highly sensitive. Combine this with the ability to do frame averaging and you will likely be able to reduce your exposure time and still capture the sensitivity needed for your critical inspection task.

- **FASTER** - Uses no disposable media in the process, eliminating cassette loading and unloading time, developing, processing and reloading for the next shot. The HPX-DR detector offers quick start up and calibration, and rapid image display after acquisition. Produce high quality digital images in seconds for immediate analysis.

- **EASIER** - The HPX-DR detector is lightweight and compact with an all-weather design that is simple to operate. In the lab, it can be operated on a powered tether and in the field it can run 100% on battery. With the 'hot swap' feature the panel can remain on when changing batteries, increasing uptime.

- **WIRELESS** - The HPX-DR detector can operate completely wireless giving the user full freedom of movement and minimizing set-up time on site. This is especially helpful for rope access teams looking for minimal weight, high sensitivity and a powerful wireless connection.

- **139 $\mu$  Pixel Pitch**
- **139 $\mu$  Spatial Resolution**
- **GOS DRX Standard Scintillator**
- **Portable at 12.5 lbs (5.7 Kg)**
- **Heavy Duty Shielding**
- **Exposure Range up to 3 MeV**

#### HIGH RESOLUTION OUTPUT IN THE LAB OR IN THE FIELD

Protective cover for lab use increases detector load limit up to 340 kg. (750 lbs.).

Mount kit with pipe cleats to reduce stress on the detector for pipeline imaging.

# X-RAY SYSTEMS & TUBES

**MANUFACTURER OF LIGHTWEIGHT,  
PORTABLE X-RAY MACHINES**

## Portable Pulsed X-Ray Generators

Golden Engineering X-ray generators are based on Pulsed X-ray technology. Pulsed X-rays generate a high intensity X-ray burst (pulse) in a very short period of time (10 to 50 nanoseconds depending on the model). The operator varies the overall dose of each exposure by changing the pulse setting. The pulse rate varies from 10 pulses per second to 25 pulses per second depending on the model. The generators can fire up to 200 pulses before a four-minute rest period.

Pulsed X-ray technology has inherent advantages for field operation compared to conventional constant potential X-ray machines or radioactive sources.

Golden X-ray generators are compatible with Conventional Radiographic Film, Computerized Radiography (CR) or Digital Radiography (DR) inspection systems. This provides users with the flexibility to develop a complete radiographic system best suited to their individual needs.

### KEY BENEFITS:

- Convenience - Minimal disruption to normal on-going operations
- Portability - Applications often require X-ray be transported and used in remote locations with no access to power
- Safety - May require inspections within a relatively close proximity to personnel. Golden Engineering Pulsed X-ray generators contain no radioactive material. Minimal leakage to side and rear of the machine and minimal exposure time reduces standoff distance around the machine and reduces the possibility of accidental exposure.
- Durability - Rugged design can be used in a variety of environmental conditions and temperatures between -10 to 120 Degrees F°

## XR200 X-RAY GENERATOR

The XR200 is a 150 kV, single-package, pulsed x-ray generator used by military, law enforcement and industrial personnel for radiographic examination of various items.

Item	Model	Description
1220230	XR200	XR200 X-Ray (80 Char) 20V Kit 110V - Includes: XR200 Generator, 2 - 20V DeWalt Batteries, 110V Charger, Cable & Case

## XRS3 X-RAY GENERATOR

The XRS-3 is a 270 kV, battery powered, pulsed X-ray generator. The XRS-3 is the most versatile unit because it provides exceptional penetrating ability, up to 1" of steel.

The compact design features a battery pack, sturdy glass tube, high voltage head and electronic controls in a single package that weighs less than 13 pounds.

It can withstand extreme environments including arctic and desert conditions.

Item	Model	Description
1320230	XRS3	XRS3 X-Ray (80 Char) 20V Kit 110V - Includes: XRS3 Generator, 2 - 20V DeWalt Batteries, 110V Charger, Cable & Case

## XRS4 X-RAY GENERATOR

The XRS4 is a 370 kV, battery powered, pulsed X-ray generator.

Two features unique to the XRS-4 include a robust aluminum housing, and a bellows located in the handle. Both of these features improve the durability and longevity of the generator.

Weighing close to 19 pounds the XRS4 is significantly larger and heavier than other Golden Engineering generators. However, a 370 kV generator that penetrates more than 1.5 inches of steel and weighs less than 25 pounds is still considered extremely portable by industry standards.

## PXS EVO Series

### BUILT TO LAST

Designed and built in Denmark; the PXS EVO systems are comprised of the best components and assembled with the utmost care – making them reliable, long lasting and a sound investment. They are fitted with a high quality metal ceramic X-ray tube and the robust composite casing now protects all vital parts even better. The systems meet the IP65 standard, making them fully operational in dusty and wet conditions.

### SMARTER WORKFLOW

The ergonomic design and the low weight makes the PXS EVO systems easy to handle and re-position. A broad temperature range from -4°F to 122°F makes the EVO systems reliable and ensures smooth operation even in extreme environments. The intuitive interface allows for a smarter workflow.

### HIGH PERFORMANCE

Built to meet the highest international safety standards, each unit is individually tested and measured for safety and accuracy. The PXS EVO systems features focal spots from 1.0 mm to 3.0 mm and ranges from 750 W to 900 W constant potential X-ray power ensuring high performance, shorter exposure times and high resolution results.

### EVO CONTROL

The ergonomic design and shoulder strap makes the CONTROL EVO easy to handle and re-position. All information is clearly displayed on the 6.5" LCD color screen. The unit features an exposure calculator and has an intuitive interface with a wide range of advanced functionalities – equalling a smarter workflow.

Portable X-ray generators from Comet are light, of high-quality and have been designed for flexible field inspection, in all types of industrial environments. We build our products with years of experience, skilled engineers and components of the highest quality. The combination of our new PXS EVO tube heads and CONTROL EVO is the key to a significantly improved workflow.

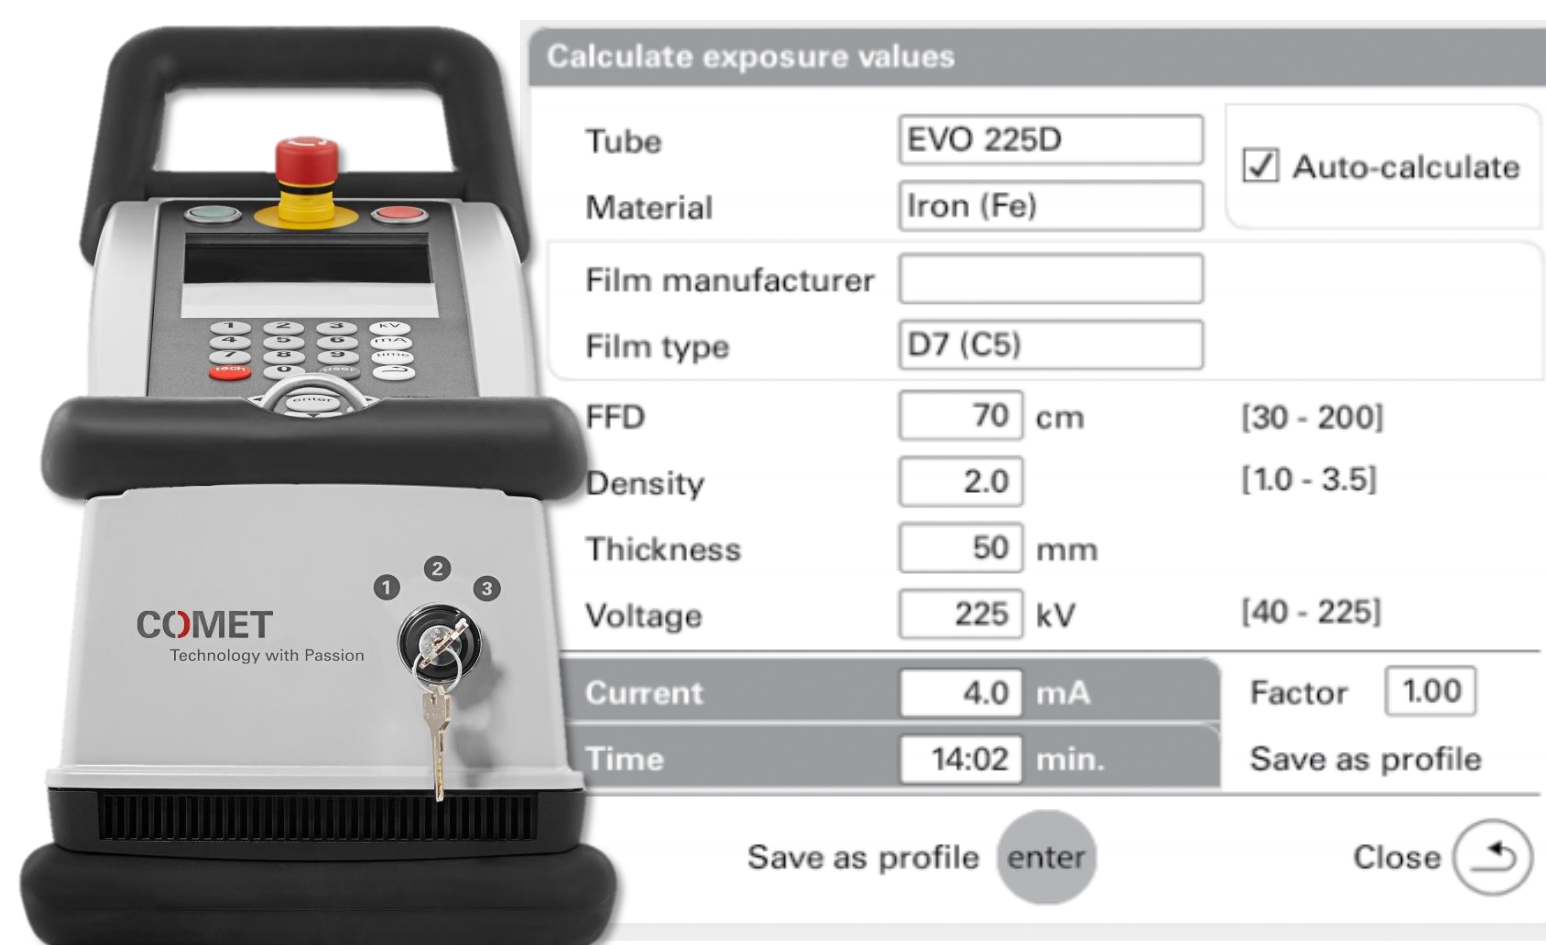

### PXS EVO DIRECTIONAL

The combination of our new PXS EVO tube heads and CONTROL EVO is the key to a significantly improved workflow. Because the units are lighter, they are faster to handle and reposition.

### PXS EVO PANORAMIC

The panoramic 38° x 360° X-ray beam, and the combination of up to 300 kV and 750 W, makes the PXS EVO a perfect choice for weld seam inspection of cylindrical vessels and pipes.

The re-engineered three-part lead belt is easy to mount and has as standard a 38° x 60° slit option allowing for directional use if required.

### EXPOSURE CALCULATOR

The advanced built-in exposure calculator ensures fast exposure calculations and uniform results. It can calculate the minimum required film focus distance optimising the exposure time. It accommodates the use of a wide range of films, materials and settings.

### PXS EVO WATER-COOLED

Special inspection jobs, may require special solutions. The water-cooled PXS EVO directional X-ray systems, offer 24/7 operation in ambient temperatures up to 86°F.

All directional PXS EVO tube heads are available in a hybrid cooled version, based on a water-cooled anode combined with an air cooled cathode end. The EVO series directional tube heads are available in 160-300 kV versions, all available with 1.0 mm small focal spot and the 225-300 kV variants also with 3.0 mm focal spot, in order to cover a broad range of applications.

COMET Industrial X-Ray develops and manufactures metal/ceramic X-ray sources, and the related components, for the non-destructive examination of materials in the automotive, aviation pipeline and steel industries, and also for the stationary and mobile inspection of baggage and cargo at airports and borders.

COMET constantly works to improve and simplify X-ray technology and is a trusted engineering partner to well-known companies. COMET's innovative technology has become the basis for an unprecedented combination of performance and compactness that offers customers a new realm of possibilities in the development of their end systems.

## INDUSTRIAL X-RAY TUBES

Comet unipolar and bipolar X-ray tubes are available for different industrial applications. The product range features metal ceramic tubes and ceramic tubes, from the smallest portable unit up to 600kV fixed systems.

### UNIPOLAR TUBES

Comet's unipolar tubes are used in demanding industrial applications. The top areas are non-destructive testing, food inspection and thickness gauging.

### BIPOLAR TUBES

The advantages of Comet bipolar tubes are high power, small dimensions, low weight, and rugged design.

## HIGH VOLTAGE X-RAY GENERATORS

Comet Industrial X-ray generators are built for remarkably stable performance. Our generators are designed to meet the demanding requirements of industrial X-ray applications. They are the ideal workhorse for both film and real-time applications. All generators are factory-configured and pretested.

### iVARIO GENERATORS

Our latest future-orientated iVario generators feature an even more flexible, modular design, and have been engineered to serve the tube in the best possible way.

The generator contains the tube library, with optimized tube profiles (ramp-up and ramp-down profiles) that guarantee the longest possible lifespan for the tube and the best module (tube-generator) integration level.

Visualized tube diagrams with power levels allow to actively manage the tube lifetime. The intelligent, fully customizable arc-handling system reacts to the frequency of arcs - this protects the generator, maximizes the tube's lifespan and maximizes potential uptime. In addition, the accurate filament control prevents the filament current overstress.

### XRP GENERATORS

COMET Industrial X-ray generators are perfectly matched for highly stable performance. The high-frequency XRP generator has been designed to meet the tough requirements of modern industrial X-ray applications. The XRP generator is the ideal workhorse for both radiographic and real-time applications.

## COMET ACCESSORIES

What Comet provides next to main business: Besides tubes and generators, we are pleased to offer all of the necessary components for a customized X-Ray module.

### INDUSTRIAL COOLERS / CHILLERS

A top-quality cooler is vital to the safe and reliable operation of your X-ray system. We supply a variety of coolers ideally balanced to work with Comet X-ray tubes.

### HIGH-VOLTAGE SPRING LOADED CABLES

Comet supplies high-voltage cables in a variety of rated voltages and lengths. The advantages of the spring-loaded cable are higher up-time, lower installation costs, lower maintenance costs, and reduction in cable failures. The replacement of the elastomeric spring with a mechanical spring ensures constant pressure in the receptacle with a pressure indicator, ease of installation, and a reliable supply of power.

## COMET CONTROLLER

The iVario generator can be controlled by the 19" external controller, which communication is based on the newly developed Ethernet Protocol. It comprises touchscreen panel, key switch, buttons and lamps as well as rotary knob. There can be an emergency stop incorporated into the controller.

## MATERIAL ACCESSORIES

### Applicators & Centrifuge Tubes

- Magnaflux Centrifuge Tubes are individually Calibrated to monitor the precise concentration of magnetic particles in suspensions made with Fluorescent and Visible magneticle particles as per ASTM E709, ASTM E1444 or ASME Section V.
- Type 2000 Magnetic Stripe Card is used for instantly evaluating the performance of the fluorescent wet-method bath as per ASTM E-709 & ASTM E-3024. This card can be used to quantitatively evaluate the performance of the fluorescent materials by displaying the number of indications that can be observed after the material has been applied to the stripe.

## TEST PIECES

- Magnetic Flux Indicator Strip - Flexible indicators used to detect directional orientation during the magnetic particle testing process. Each indicator contains three milled slots with widths of .0075", .009" and .010" that share a common depth. The indicators are manufactured from permeable magnetic steel sandwiched between two brass plates and designed for repeated use in setting and monitoring magnetic field strength in wet and dry MPI applications.
- Ketos Ring - System Performance Test Piece - The tool steel ring is manufactured to AS-5282 requirements to demonstrate magnetic particle system performance. A progressive series of sub-surface holes are used to verify equipment performance at different amperages using HWDC or FWDC waveforms.
- The Notch Defect Test Bar - System Performance Test Piece - The MPI test bar is a standardized test piece conforming to NAVSEA T907A-AS-GIB-010/271 requirements to demonstrate magnetic particle system performance. The test bar includes both surface and sub-surface defects in two directions to verify both circular and longitudinal fields using AC or DC waveforms.
- The MTU-3 Test Block is used to check the sensitivity of magnetic particle materials.

## PORTABLE COIL

### Parker Portable Coil

The Parker PL-10 Portable Magnetizing Coil (9 7/8" inside diameter) is designed for magnetic particle inspection of ferrous metal parts. The coil allows for the use of either dry powder or wet fluorescent inspection media and may be used for demagnetizing as well.

The coil is molded in a tough black polyurethane material and comes equipped with the standard foot switch or a optional hand switch and 10' yellow neoprene power cord. The sealed electrical connection box has a 2" x 5" flat base allowing the coil to stand in a vertical position.

Item	Description
PL-10H	Parker 10" Portable Magnetizing Coil with Hand Switch, 115VAC with Carrying Case
PL-10F	Parker 10" Portable Magnetizing Coil with Foot Switch, 115VAC with Carrying Case

## PORTABLE POWER PACK UNITS

The Portable Power Packs are convenient and economical inspection units that are used in a wide range of magnetic particle applications that require only moderate power. They are ideal for large or heavy parts, in-service mobile equipment or job-site welds.

### BENEFITS

- Find surface defects with AC current; switch cable connection to half wave DC (HWDC) for near-surface flaws
- Locate defects in any direction using prods, central conductor, coil (wrap part with 3-5 turns of cable)
- Infinitely variable current control

### FEATURES

- Demagnetize your parts in AC mode by slowly turning the current dial to zero
- Built-in automatic-reset circuit breaker
- May be used as the main power source for the Magnaflux MAG Kit modular bench inspection system

## M-SERIES MOBILE POWER PACKS

The M-Series mobile power pack portable current generators facilitate testing of large and abnormally heavy parts with magnetic particle inspection. Magnaflux understands some parts cannot be moved so the magnetizing station needs to be brought to the part. The M-Series offers a solution by providing an adaptable mobile unit. These units feature AC or Half Wave DC output.

*M-Series magnetic power packs are available in three configurations:*

### STANDARD FEATURES:

- Digital Meter Display
- 2 Bus bars for connection
- Push button switch for AC output
- Push button switch for HWDC output
- Push button switch for mag
- Momentary - mag as long as button is pushed
- Push button switch for demag
- One touch auto cycle
- Switches to decaying AC automatically
- Push button switch for pulse
- 1/2 second on, 3 seconds off for 30 seconds
- Infinitely variable current control
- 2 Fixed / 2 Swivel (with locks) Heavy-duty casters
- 115 Volt convenience Outlet (10 amp)
- PLC circuitry and thermal overload for circuitry protection
- Flow through cooling for heat dissipation
- Solid state switching (AC to HWDC)
- 7% Duty cycle (maximum output with 1/2 minute ON time)

## MAGNAFLUX WET BENCH

### A-Series

#### Magnetic Wet Benches w/ AC Magnetization

The A-Series magnetic benches provide Alternating Current magnetization for finding surface defects during wet method magnetic particle inspection. The two outputs are independently adjustable to set each magnetic field, circular or longitudinal.

##### Features:

- ▶ 5% duty cycle of 0.5 seconds on, 10 seconds off at maximum output
- ▶ Allen-Bradley PLC
- ▶ Simple touch-screen operator interface
- ▶ External pump system for particle bath agitation, circulation and application

### AD-Series

#### Magnetic Wet Benches w/ AC and DC Magnetization

The AD-Series magnetic benches provide 4,000 amps of Alternating Current and 5,000 amps of Direct Current magnetization for finding surface and sub-surface defects during wet method magnetic particle inspection. The two outputs are independently adjustable to set each magnetic field, circular or longitudinal.

##### Features:

- ▶ 5% duty cycle of 0.5 seconds on, 10 seconds off at maximum output
- ▶ Allen-Bradley PLC
- ▶ Simple touch-screen operator interface
- ▶ External pump system for particle bath agitation, circulation and application

### D-Series

#### Magnetic Wet Benches w/ 3-Phase FWDC Capability

The D-Series is one of our most powerful wet magnetic benches. Providing 3-phase Full Wave Direct Current, this MPI equipment offers maximum magnetization for finding surface and sub-surface defects with clearer indications while using minimal power.

The two outputs are independently adjustable to set each magnetic field, circular or longitudinal.

##### Features:

- ▶ Allen-Bradley PLC
- ▶ Simple touch-screen operator interface
- ▶ External pump system for particle bath agitation, circulation and application
- ▶ Integrated ultra-low frequency, reversing, step-down DC demagnetization 1-touch control

### MD-Series

#### Multi-Directional Magnetic Wet Benches for AC, HWDC or 1-Phase FWDC Magnetization

The MD-Series multi-directional magnetic bench offers Alternating Current, Half Wave Direct Current and 1-phase Full Wave Direct Current for time-saving multidirectional magnetization which can find defects in all orientations with one mag-cycle.

The two outputs (contact and Flux Flow coil) each offer AC, HWDC or 1-Phase FWDC, and are independently adjustable to balance the magnet field intensity.

##### Features:

- ▶ 5% duty cycle of 0.5 seconds on, 10 seconds off at maximum output
- ▶ Allen-Bradley PLC
- ▶ Advanced touch-screen operator interface
- ▶ External pump system for particle bath agitation, circulation and application
- ▶ 1,000 customer-programmable techniques

### Universal WE

#### Multi-Directional Magnetic Wet Bench

The Universal WE magnetic wet bench is multi-direction magnetic wet bench designed to completely magnetize the surface of parts up to 35 inches long in a single shot. Potentially cutting inspection time in half because the part can be inspected in both directions at once. The Universal WE offers 200 - 2,000 Amps AC for contact shots and 1,500 - 15,000 Amp-turns AC for coil shots. The two outputs are independently adjustable to set each magnetic field, circular or longitudinal.

## EQUIPMENT ACCESSORIES

### 4/0 Cables & Connectors

We offer a range of cables and connectors to allow you to outfit your magnetic bench or electromagnetic current generator to suit your specific parts and process. Whether you are testing a large investment casting or doing mag particle inspection in a difficult to reach location, these heavy-duty cables and connectors will help you set-up your MPI machine just the way you need.

4/0 cables are essential for P-series, M-series, and CSV-series power packs. Cables can be used to flow magnetizing current through a large part or structure, or wrapped around pipes and long weldments for longitudinal magnetization. QED 4/0 cables are available in standard welding grade or heavy-duty grade with extra insulation and tinned conductors. Cables are factory terminated in a variety of lengths and a choice of standard lug connections or heavy-duty quick connect fittings.

### Prods & Clamps

These handheld electrodes and contact clamps are convenient for conducting sectional magnetic particle inspections, like welds, castings or forgings, or testing parts that cannot be inspected on a wet horizontal bench, such as large fabrications, tubing, bars and tubular assemblies like aircraft mounts and fuselage sections.

### Copper Contact Pads & Conductors

Copper contact pads come in a variety of shapes, sizes and types to make sure your magnetic bench is outfitted correctly for the parts you inspect.

Copper braided contact pads prevent arc burn by helping maintain proper electrical contact between test parts and contact heads. Choose a solid pad if you are inspecting parts with flat ends, pick a braided pad if your parts have rounded or irregular shaped ends.

Central Conductors - Solid Copper Bar Rods provide circular magnetization of hollow parts. Three standard sizes are available and custom sizes are available upon request.

#### **Available Copper Contact Pads Include:**

- Replacement Copper Braid Contact Pad - 4.75" x 7.50"
- Copper Braid Contact Pad - 4.75" x 10.50"
- Copper Double-Braided Contact Pad with V-Block. Heavy braid provides contact over greater surface area. Built with neoprene, the V-Block base centers and supports test parts. The pad can be reversed to provide two wear faces. Fits all standard sized MPI units.
- Copper Double-Braided Contact Pad with Clip. Same performance as the V-Block but clips over headstock of smaller MPI units.

### Lead Contact Pads

This range of copper and lead contact pads come in a variety of shapes, sizes and types to make sure your magnetic bench is outfitted correctly for the parts you inspect. Contact pads prevent arc burning, and ensure good, reliable electrical contact between the headstock and part.

Choose a solid pad if you are inspecting parts with flat ends, pick a braided pad if your parts have rounded or irregular shaped ends.

#### **Available Lead Contact Pads Include:**

- Lead Contact Plate - Duplicates original headstock/tailstock contact plates. The soft lead provides excellent contact with test part - 6.75" x 6.625" x .25" Thick
- Lead Copper Braid Contact Plate - Copper impregnated lead contact plate that lasts 10 times longer than lead contact plates - 6.75" x 6.625" x .25" Thick

### Equipment Adapters

Make sure your MPI bench works with every part you need to inspect with this range of equipment adapters. From large, heavy parts to small pieces like bolts, screws, and pins, QED equipment adapters help you get more out of your magnetic bench by helping you make it work for a wide variety of parts.

- Steady Rests - Used to support and stabilize long or heavy parts such as crankshafts during the inspection process.
- Contact Block - Permits remote testing of parts that are too heavy or too large for processing on unit. When clamped between head and tailstock, the block supplies magnetizing current to remote prods or clamps through flexible cable.
- Small Parts Adapters - Permit the use of standard wet horizontal test units for inspection of small parts such as bolts, screws, pins, etc. Mounted directly to either the head or tail stock the solid copper adaptors maintain adequate clearance to proper clamping action.

LPI ACCESSORIES
MATERIAL ACCESSORIES

LPI Applicators & Sprayers

► DEMA Injector Kit - For spraying Hydrophilic Emulsifier. The emulsifier is drawn into the water stream by the Dema valve, emitting an emulsifier/water spray. The Dema Injector allows the penetrant user to process parts with the Hydrophilic method without adding large dip tanks.

Table with 2 columns: Item, Description. Rows include M2400B, B8100PL, B8100CB, SP\*001693, SP\*001694, 520090, and SP\*001695.

Monitoring Devices & Wiping Cloths

- Refractometer - Easy to use device to measure the concentration of the Hydrophilic Emulsifier remover in water and is required to meet Pratt and Whitney and GE concentration specifications for Hydrophilic removers.
- Hydrometer - Water Based Developers are designed for optimum performance within a specific concentration range. To control the concentration, the specific gravity is measured using the Hydrometer. If the reading is high, the concentration is high and water is generally added. If the reading is low, developer is added to the bath.

Table with 2 columns: Item, Description. Rows include 300, 513829, 5857, and RAGS-50.

TAM PANEL & CLEANING UNIT

Hoffman Precision Star TAM Panels

The Panel is made from a 0.100" stainless steel plate. Half of the test surface is hard coated with 0.003" hard alloy chrome. Five crack centers are evenly spaced in the hard coated strip. The crack centers are circular patterns forming a star. The un-plated side is grit blasted to Ra = 2.0 roughness for washability / background tests.

- Kit Includes:
- Hoffman TAM Panel with Transparent Storage Box
- Calibration Certificate (includes measurements and 5 photos)
- Foil print, glued on the storage box (includes measurements and 5 photos)

- TAM Panel Approvals:
- Pratt & Whitney TAM 146060
- Delta Air Lines / MTU Maintenance
- Rolls Royce / General Electric

Table with 2 columns: Item, Description. Rows include SP\*001637, SP\*001638, SP\*001639, and SP\*001640.

Ultrasonic Cleaning Unit & Solution

Quickly and professionally clean your test panels with the desktop ultrasonic cleaning unit. It completely removes excess penetrant from indications as well as the surface of the panel. We recommend using Met-L-Chek 300LF or equivalent for proper cleaning.

Includes: Normal Frequency, Sweep & Degas Functions, Operator Temperature Controls, Digital Ultrasonic Timer, Basket, Cover and Side Handles
Specifications: Ultrasonic Frequency - 40,000Hz, Tank Material - Stainless Steel, Temperature Controlled Heat for best cleaning performance, Unit Size - 10" L x 6"W x 9.5"H, Tank Dimensions - 9"L x 5.5"W x 4"H, Tank Capacity - 3/4 Gallon

ADDITIONAL LPI PANELS/BLOCKS

NiCr Twin Cracked Test Panels

NiCr Panels are used to compare new and used penetrants and can also be used for comparing performance of different penetrant materials or different processing techniques. Each sets consists of a pair of identical panels marked A and B with manufacturer's Certification and Crack photograph.

These panels are made by plating hard Nickel Chromium alloy on a 2mm thick brass substrate and stressing the panel in tension. The hard NiCr coating is brittle in comparison to the brass substrate so that the cracks created in the plated layer are limited to the thickness of the NiCr layer. The panel is then cut in half perpendicular to the direction of the cracks thus creating a matching pair of virtually identical cracks of controlled depth.

Specification Compliance: ASTM E1417, AMS 2647D, ISO 3452-3 & JIS Z 2343-3

Additional LPI Test Panels & Blocks

- ▶ WTP-1 SHERWIN Wash Test Panel is used to run monthly removability testing as required by ASTM E1417 and MIL-STD-6866. The panel is made of stainless steel measuring 4" x 6" and 0.090" thick with two parallel, "medium rough" strips, each 6" x 1.5" separated by a smooth 1" strip.
- ▶ WTP-2 SHERWIN Wash Test Panel is used to run removability tests. The 1.5" x 2" panel is made from 16 gauge 301 or 302 stainless steel, by grit blasting with 80 mesh aluminum oxide grit and 60 psi of air pressure. The roughened surface that is produced is free of scratches and blemishes.
- ▶ ADP-1 SHERWIN Aqueous Developer Test Panel is used to check the fluorescence and coverage of soluble and suspendable aqueous developers as per ASTM E1417. The panel is made of aluminum measureing 3" x 10".
- ▶ Cracked Aluminum Test Blocks compare sensitivity of different penetrants or sensitivity of new and used penetrants. This is done by processing one half of the block with used penetrant and the other half with fresh penetrant. A 1/8" wide groove separates the blocks two sides to facilitate side-by-side penetrant comparison.

Item	Description
WTP-1	SHERWIN Wash Test Panel (Removability as per ASTM E1417 & MIL-STD-6866)
WTP-2	SHERWIN Wash Test Panel (Removability)
ADP-1	SHERWIN Aqueous Developer Test Panel (as per ASTM E1417)
CAB	Cracked Aluminum Test Block

*\*Cracked Aluminum Test Blocks are meant for one-time use as once the penetrant gets in the crack it is very difficult to completely clean.*

LPI MEASURING AIDS

Crack Comparators

Crack comparators are used to measure the actual size of indications identified during the liquid penetrant inspection process.

## SPECTRO-UV HANDHELD

### UVISION 365 Series NDT Inspection Lamps

These lightweight, yet rugged lamps boast an IP65 rating, making them dust-tight and water resistant. Using a state-of-the-art heat sink, the uVision is mechanically cooled without the need for fans. In addition to the three powerful UV-A (365 nm) LEDs, it has a convenient white light LED for illuminating work areas. Compliant versions have embedded microprocessors to keep lamps within specifications. There are multiple power-source options as well.

# OVERHEAD LED UV-A LAMPS

## MAGNAFLUX OVERHEAD

### ST700 Stationary Inspection LED UV Lamp

The ST700 projects an ultra-wide, even beam of UV-A light straight onto the inspection area, allowing for quick examination of parts with minimal part handling. The high intensity beam makes indications stand out bright and clear, speeding up the inspection process. The ST700 is certified to NDT standards for LED UV lamps and certified for Aerospace Prime and OEM specifications for emission spectrum and beam profile.

The IP65 aluminum case stands up to harsh environments and a range of mounting and angling options allow it to be set up anywhere in the inspection process; from mag benches to wash stations.

#### KEY BENEFITS:

- ▶ High intensity compliant UV-A illumination
- ▶ 20" x 26" wide, uniform beam profile at 36"
- ▶ IP65 sealed construction prevents damage from water, vapor or dust
- ▶ Angled mounting brackets
- ▶ No internal fan necessary
- ▶ No hot-spots in the beam profile
- ▶ Aerospace prime and OEM certified
- ▶ Certified to ASTM (E2297 & E3022), Airbus (AITM6-1001), Rolls Royce (RRES 90061) & NADCAP

## SPECTRO-UV OVERHEAD

### EDGE 13 SERIES UV-A LED Panel Lamps

#### UV-A LED PANEL LAMPS

The first overhead LED UV-A lamp to guarantee an IP65 rating, compliance, and gang-ability.

#### KEY FEATURES:

- ▶ Gangable – link lamps together using single power source for greater coverage area
- ▶ IP 65 rating: the lamp is dust-proof and water-resistant
- ▶ Wide areas of coverage for optimal fluorescent response
- ▶ Integral black-light filters (EDG-13SBLC and EDG-13HC)
- ▶ Long-lasting UV-A lenses protect against solarization
- ▶ Versions Available Certified to ISO 3059, ASTM E3022, Airbus (AITM6-1001) & Rolly Royce (RRES 90061)

Item	Description	Certified to	UV-A Intensity	Visible Light	UV-A Coverage
EDG-13T	EDGE 13	ISO 3059	6,500 $\mu\text{W}/\text{cm}^2$	< 1 fc / 11 lux	17" x 15"
EDG-13H			15,000 $\mu\text{W}/\text{cm}^2$	< 2 fc / 22 lux	18" x 16"
EDG-13HC		ISO 3059 & ASTM E3022	8,500 $\mu\text{W}/\text{cm}^2$	< 1 fc / 11 lux	24" x 22"
EDG-13SBLC		ISO 3059, ASTM E3022 & RRES 90061	4,700 $\mu\text{W}/\text{cm}^2$		14.5" x 13"

*\*UV-A Intensity, Visible Light and UV-A Coverage ratings are all measurements at 15" from light source*

### EDGE 4 Wash Station Lamp

The EDGE 4 is a flood lamp engineered specifically for wash stations. It provides a very wide area of coverage without a high intensity. The IP65-rated housing allows the lamp to work in wet and dirty environments. Heat sinks keep the lamp cool without the need for a fan, so no dust or water can enter. Four UV-A LEDs provide a wide, uniform beam that is highly consistent and reliable.

#### KEY FEATURES:

- ▶ Ideal for Wash Stations
- ▶ IP65 rated – rugged housing is dust-proof and water resistant
- ▶ Heat-dissipating housing. Fan-less and cool running
- ▶ 4 UV-A LEDs with long-lasting UV-A lense
- ▶ Adjustable mounting bracket
- ▶ Meets EN ISO 3059 on UV-A output for the removal of excess penetrant

Item	Description	Certified to	UV-A Intensity	UV-A Coverage
EDG-4W	EDGE 4	ISO 3059	1,400 $\mu\text{W}/\text{cm}^2$	22" x 22"

# LIGHT METERS

## SPECTRO-UV LIGHT METERS

### AccuPRO Series

The AccuPRO (XP-2000) readout unit features a single dual-wavelength sensor detector designed to measure both ultraviolet and visible light and is compliant with ASTM E2297.

### KEY FEATURES:

- ▶ Accurate readouts for UV-A irradiance as well as visible illuminance
- ▶ Overall accuracy greater than ± 5% per NIST standards
- ▶ One-touch PEAK with reset functions
- ▶ User-defined power save and automatic shutoff
- ▶ Mult-wavelength sensor directly attached to meter
- ▶ Convenient on-board recharging
- ▶ Powered by four rechargeable "AAA" nickel-metal hydride batteries (Included)
- ▶ Comes complete with AC charger and padded carrying case

Item	Description
XP-2000	AccuPRO Dual Sensor (UV-A/VIS), Complete with (4) Rechargeable "AAA" Nickel-Metal Hydride Batteries, AC Charger and Carrying Case

### AccuMAX Series

#### The MOST Advanced, Microprocessor-Controlled Readout System

The AccuMax XRP-3000 is compact, lightweight and battery-operated for convenient use in the factory, field or any other location where measurements need to be taken. Measures both ultraviolet and visible light. Complies with ASTM specifications for MPI and FPI. Specially engineered for NDT applications.

### KEY FEATURES:

- ▶ Microprocessor-controlled readout unit with dual-wavelength sensor detector
- ▶ Superior bandpass interference filter
- ▶ Choice of direct or USB connection between sensor detector and readout unit
- ▶ Excellent cosine response
- ▶ Sealed sensor housing and USB connection with water-resistant adapter

### XS-555/L Luminance Sensor

The perfect accessory for the AccuMAX Series meter. Ideal for technicians performing radiographic examinations. Meets ASTM E1742 standard.

The AccuMAX XS-555/L luminance sensor detector measures the brightness of a visible light source and, unlike many competitive units, allows the user the choice of displaying the results in three distinct units of measure: candelas per square meter (cd/m2), candelas per square foot (cd/ft2) and footlamberts (fL).

### SPECIFICATIONS

## REFERENCE STANDARDS

Block Type	Description	Alloy	
IIW-Type 1	Used for calibration of shear and longitudinal transducers, and verification of shear wedge exit point and refracted angle. Can also be used for resolution and sensitivity checking. In accordance with: IIW (International Institute of Welding) and ASTM E164.	1018 Steel/ 7075 Aluminum 304 Stainless Steel Wooden Case	
IIW-Type 2	A modified version of the original IIW-Type 1 design. Includes a 2.0" radius x 0.250" deep cut-out superposed on the 4.0" radius for distance calibration. Also includes numbers 3, 5 and 8 through holes (3/64", 5/64" AND 8/64" diameter) for sensitivity testing or surface wave inspection, and distance calibration marks to the 2.0" hole. In accordance with International Institute of Welding, ASTM E164 and U.S. Air Force NDI Manual T.O. 33B-1-1 specifications.	1018 Steel/ 7075 Aluminum 304 Stainless Steel Wooden Case	
Angle Beam	The Angle Beam Block also known as a "Rompas" block or simply "Angle Beam" is the ASTM and U.S. Air Force substitute for the DSC block for distance, beam index, refracted angle and sensitivity calibration. Block is 1.0" thick, contains a 1.0" radius opposite a 2.0" radius, and a 5/64" diameter x 0.375" deep flat-bottom hole.	1018 Steel/ 7075 Aluminum 304 Stainless Steel Wooden Case	
QED 5-Step Block	This 5-Step block comes in thicknesses of 0.100", 0.200", 0.300", 0.400" and 0.500". NOTE: Variations of this block are available if additional steps are preferred. Also, larger step faces are offered for use with large diameter transducers. In accordance with ASTM E797.	1018 Steel 304 Stainless Steel Plastic Case	
4-Step Block	This 4-Step block comes in thicknesses of 0.250", 0.500", 0.750" and 1.000". NOTE: Variations of this block are available if additional steps are preferred. Also, larger step faces are offered for use with large diameter transducers. In accordance with ASTM E797.	1018 Steel/ 7075 Aluminum 304 Stainless Steel Wooden Case	
TIPSY	Special Step Block for thickness and linearity calibration. This versatile block contains eight (8) steps. Set it down on one side and get the 1.0, 2.0, 3.0 and 4.0" steps. Then "TIP" it over and get the 1.5, 2.5, 3.5, and 4.5" steps.	1018 Steel/ 7075 Aluminum 304 Stainless Steel Wooden Case	
DSC	AWS-type block used for shear wave distance and sensitivity calibration. Contains a 1.0" radius opposite a 3.0" radius. The 3.0" radius includes a 0.375" deep x 0.032" wide radiused slot. Also contains a 0° reference point for checking exit point on wedge, and a 0.125" diameter through hole and corresponding markings at 45°, 60°, and 70° for measuring actual refracted angle. In accordance with ASTM E164 and AWS 6.16.1B.	1018 Steel/ 7075 Aluminum 304 Stainless Steel Wooden Case	
NAVSHIP	Used for distance amplitude correction, sensitivity levels and flaw depth information. Contains six 3/64" diameter side-drilled through-holes at distances of 0.25" to 2.75" in 0.25" increments. MTDs are engraved near both scan edges on one face. In accordance with MIL-STD-271G Figure 9, and NAVSHIPS Specification 0900-006-3010/Section 6.	1018 Steel/ 7075 Aluminum 304 Stainless Steel Wooden Case	
AWS Resolution	Also called an RC block, the AWS Resolution Reference Block is used for checking resolution capabilities of angle beam transducers. Contains three sets of 0.0625" diameter through-holes for 45°, 60° and 70°. In accordance with AWS Welding Highway and Railway Bridges specification D2.0, and Structural Welding Code ANSI/AWS D1.1.	1018 Steel/ 7075 Aluminum 304 Stainless Steel Wooden Case	
IOW Beam Profile	Used for beam profile measurement of angle beam transducers and measurement of transducer angles. Contains nine 1.5mm diameter x 22mm deep side drilled holes. In accordance with British Standard 2704 requirements.	1018 Steel/ 7075 Aluminum 304 Stainless Steel Wooden Case	
DC	AWS-type block used for shear wave distance calibration. Contains a 1.0" radius overlaying a 2.0" radius on a 180° segment. In accordance with ASTM E164 and BRR/AWS X-1 specifications.	1018 Steel/ 7075 Aluminum 304 Stainless Steel Wooden Case	
SC	AWS-type block used for shear wave sensitivity calibration. Contains two 0.062" diameter through holes. In accordance with ASTM E164 and BRR/AWS requirements.	1018 Steel/ 7075 Aluminum 304 Stainless Steel Wooden Case	
DS	AWS-type block used for longitudinal distance and sensitivity calibration. Contains a 2.0" high section between two 4.0" sections. In accordance with AWS requirements.	1018 Steel/ 7075 Aluminum 304 Stainless Steel Wooden Case	
ASME Basic 3/4" x 6" x 7" Long Version	Used for establishment of primary reference responses for UT examination of welds. Block contains three side-drilled holes at 1.5" deep minimum at 3/32" diameter. Hole locations through the thickness are 1/4, 1/2, and 3/4T. Also contains two EDM notches measuring 2%T deep x 1/4" max wide x 1.0" long min. In accordance with ASME Sec V Art. 4 Fig. T-434.2.1.	1018 Steel/ 7075 Aluminum 304 Stainless Steel Wooden Case	

ULTRASONIC COUPLANT

GENERAL PURPOSE

- Echogel® 20 is an economical, basic-use couplant in medium-thick gel viscosity for ultrasonic inspections, like flaw detection/sizing and thickness gauging, where salt cake or metal corrosion salts are present. It provides good corrosion inhibition and resists viscosity breakdown on salt-caked boilers and other corroded materials.
- Ultragel® II is an industry-leading, high-performance, ultrasonic couplant for flaw detection and sizing, thickness gauging, flow metering and acoustic emission testing. This general-purpose medium viscosity gel is known for its outstanding performance, excellent corrosion protection, thixotropic properties and comprehensive range of specifications and approvals.
- UT-X® Powder is a cost-effective couplant powder for flaw detection and thickness gaging applications where ferrous corrosion inhibition is required. UT-X Powder retains viscosity on salt caked boiler tubes, corroded pipe, structural steel, steel billets, welds and ship plate. Mixed with water at the inspection site, its compact and lightweight packets are easy to transport to a job site or to store as an emergency couplant for unanticipated shortages.

NDT technicians trust Magnaflux to supply couplant for ultrasonic testing that enhance sound transmission from the transducer to the test part to produce reliable non-destructive inspection results in flaw detection, thickness gauging, flow metering and acoustic emission testing.

HIGH TEMPERATURE

- Sono 600 is a versatile, multi-purpose couplant with a wide operating temperature range for flaw detection, thickness gauging and acoustic emission testing in petrochemical, power generation, automotive, aerospace, food processing equipment and pharmaceutical manufacturing.
- Sono 1100 provides coupling for high-temperature thickness gauging and will maintain acoustic coupling at high temperatures beyond 15 seconds to give ample time to obtain thickness readings. In most cases, the signal strength increases with time to the point of the couplant’s thermal decomposition.

# INSPECTION POINT SEALS

IPS's patented Inspection Port, is the cost-effective way to access piping and vessels when performing CUI inspections. Our silicone and EPDM rubber ports are made with exacting standards and deliver the quality and craftsmanship you deserve.

Our patented locking ridges keep the sealing flanges secure and keep moisture out. We provide a watertight seal without screws, O-rings or caulk significantly reducing installation time. Unlike some of our competitors, the fastening mechanism does not require bending or subsequent compromising of the fastening materials. Our seals fit smooth, embossed or corrugated jacketing without the use of special tools. Even our caps are well thought out, attaching to the seal flange with a high quality stainless steel, crimped sleeved lanyard to prevent cap loss.

## INSPECTONLABELS

Inspection labels are specially designed to identify Thickness Measurement Locations (TML's) on non-insulated piping and vessels. Our UTL-2 and 3 inspection labels have protected write-on areas for recording TML numbers, line numbers, etc. All labels are UV stable and resistant to most solvents, oils and household chemicals.

## MANDREL AND HOLE SAWS

The fastest and easiest way to cut accurate holes for installation of inspection plugs is with powered hole saws, and QED supplies the best. These aren't cheap hardware store saws, but heavy-duty industrial saws by Greenfield Industries. The mandrel separates from the cutting cup so you dont have to throw out the whole thing when the edge wears out; simply thread on a new cup and you're back in business.

- ▶ Blu-Mol Bi-Metal Hole Saws are of heavy-duty bi-metal construction for longer service life. 4/6 variable tooth provides faster, smoother cuts. Recommended for aluminum jacketing.
- ▶ RemGrit Carbide Grit Edge Hole Saws are made of tungsten carbide particles bonded to alloy steel for cutting extremely hard and abrasive materials. Recommended for stainless steel jacketing. Resists snagging.

THICKNESS GAUGES  
EHC-09 "Monochrome" Series Thickness Gauges

Danatronics most popular thickness gauges are those in our EHC-09 series. With thousands of units in the field, our durable, custom molded case with raise rubber keypad is IP54 rated and has proven it can handle your toughest jobs (this is bad help fix). The EHC-09 series is available in 6 models to suit every budget and application. What's best is our simple upgrade path where all gauges are capable of quickly and easily (directly from the keypad) adding any software options. Features include a graphic display with multiple languages, vibrate on alarm, fast minimum, echo to echo to ignore coatings, 100K reading Datalogger with export to excel, B-scan and live A-scan with waveform adjust.

Standard EHC-09 Wave Series includes: Ultrasonic thickness gauge, DKS-537, 5 MHz 0.375 inch diameter potted cable, operational manual, Data XL interface program, couplant, and transport case. See chart below for standard inclusions for each gauge.

Danatronics ECHO Thickness Gauges

The perfect size of fit and function! Hold the ECHO in your hand and you will agree no detail has been overlooked and the ergonomics are unmatched by any thickness gage in the industry! The new ECHO series comes in 3 configurations; ECHO 9, ECHO 8 and ECHO 7. ECHO 9 is our corrosion gauge using dual transducers, ECHO 7 is our precision gauge with 1 micron resolution using single element transducers and ECHO 8 is the ultimate unit combining both dual and single element transducers.

The ECHO series has a remarkable sunlight readable 3.5" color display, up to 32 Gb of micro SD memory, built-in rechargeable high capacity Li Ion battery all packaged in a custom case designed for IP67 rating. Not sure which model to choose? Don't worry, the ECHO series is fully capable of field upgrades directly from the keypad so you will never be stuck with an obsolete product or experience any downtime. ECHO Series can measure from .020" to 23" in steel in corrosion mode or as thin as .006" in steel when configured as a precision gauge.

Standard Inclusions: ECHO series ultrasonic thickness gauge, DKS-537, transducer up to 10 MHz, LM-06 cable, 2oz bottle of couplant, operation manual, Data XL interface program, USB cable, Charger Adapter, Transport Case \*A transducer is included with each model.

DAKOTA ZX Series Thickness Gauges

The ZX Series of thickness gauges are packaged in an all aluminum case making them the most durable gauges on the market. The features included in the ZX Series offer a quality tool that will meet or exceed your application requirements. Our 5 year limited warranty indicates how we feel about the reliability and durability of the ZX Series gauges.

Applications: Corrosion & Pitting, Tube & Pipe, Tanks, Boilers, Glass, Variety of Applications

ZX Series Kits Include: Ultrasonic thickness gauge, selectable transducer, couplant, manual, plastic carrying case, certificate of calibration and AA batteries. PC software and data transfer cable included with data logging gauges. PC software available for download from website.

FLAW DETECTORS  
DAKOTA, Danatronics & SONATEST

The DAKOTA DFX-8 Series Flaw Detector & Thickness Gauge

The DFX-8 series by Dakota is both an Ultrasonic Flaw Detector & a Multi-Mode Ultrasonic Thickness Gauge all in one quality instrument. The DFX-8 features an easy-to-use interface, a fantastic test range (from 0 inches to 100 feet), is lightweight (4.5 lbs) and cased in rugged IP-65 metal housing, making this machine a top-notch fully loaded instrument that doesn't skimp on quality.

Standard Inclusions: DFX-8 Series Flaw Detector including 4 GB SD internal & up to 64 GB external SD slot, lithium ion battery, battery charger, transport case, operating manual with DakView PC software & USB cable. Also features DAC, AWS, TCG, DGS sizing toolkits and a 4oz bottle of couplant.

The Danatronics ECHO FD Flaw Detector

Mechanically the ECHO FD has been designed from the ground up to offer the latest in ergonomic design. ECHO FD has a convenient rubber boot with stand, 4 point chest harness, padded strap and even a finger hole for the ultimate in instrument balance. We even designed in the ability to use a magnetic pipe stand. All keys can easily be reached with your thumb and the keys are raised rubber keypad with superior tactile feedback. The "F" keys light up for alarm and charging conditions.

Standard Inclusions: ECHO FD including 2 GB SD card, li-ion battery, battery charger, transport case, manual with Data XL, USB cable, DAC, AWS software, API 5U, 2 gates, B-Scan, 2oz bottle of couplant and rubber booth with padded wrist strap and stand.

Sonatest WAVE Interactive Flaw Detector

What if you could tailor the settings on your UT device and alter it to your own process and people's needs? An instrument where all the useful parameters are pre-set and available in less than two clicks? Now you can.

Introducing WAVE by Sonatest. It integrates the latest technologies available in order to create a revolution in the ultrasonic non-destructive testing equipment market.

Not only is it innovative, but the customisable interface also optimises the daily workflow, and a unique and embedded interactive scan plan, with ray-tracing capability and simulation tools, consolidates your results.

Its wifi capability allows you to access it anywhere in the field, eases data transfer, application installation and manages calibration date and software version.

Utouch Technology

The Sonatest Utouch Technology allows your device to operate in the same way as a mobile phone. Combined with rugged components and an intelligent algorithm which makes the distinction between couplant and finger, the Sonatest WAVE is the first true industrial touch-screen device on the market.

TRANSDUCERS AND WEDGES

DAKOTA, Danatronics, Olympus, SONATEST & Technisonic

QED offers a complete range of high performance, high technology ultrasonic transducers for thickness measurement, general flaw detection and Phased Array applications.

Each transducer is made to exact standards regarding acoustical, electronic and mechanical properties. Our transducers are tested thoroughly, typically at three stages of manufacture. A complete range of transducer types are available with a variety of connector styles, case configurations, frequencies and element sizes.

VISUAL MEASURING DEVICES WELDING GAUGES

- Hi-Lo Welding Gauge - Measures root weld space, eliminates rejects - improves productivity
- Bridge Cam Gauge - Angle of preparation, 0-60 degree. Measuring: excess weld capping, depth of undercut, pitting, fillet weld length & throat size and misalignment
- V-WAC - Undercuts/Pits to 1/4 Inch, Crowns to 1/4 Inch by 1/64 Inch Increments (Tolerance .006")
- Pipe Pit Gauge - Range is 0 to 1/2" in 1/64" & .010 Increments. Arm can be locked in place at any dimension
- Automatic Weld Size Gauge - for accurate measurement of butt fillet type welds. Check reinforcement, throat and determine the leg size of the fillet weld
- 7-Piece Fillet Weld Gauge Set - Check Fillet Leg and Throat size, 1/8" to 1"

VIDEO INSPECTION SYSTEM WOHLER VIS 700 HD Inspection System & Accessories

The Wohler VIS 700 inspection camera offers exactly what professionals have been waiting for: razor sharp high definition images, a focus function for precise inspection, and now wireless locating. The Wohler VIS 700 is the ideal inspection camera for waste water pipes, flue gas and ventilation lines as well as NDT and plumbing applications.

Fully Digital Camera System

A new digital high-resolution sensor assures amazingly sharp images. With the Wohler VIS 700, professionals are able to plan their maintenance services on the basis of clearly visible facts. The displayed level indication ensures you to keep orientation in the pipe. The camera display shows the camera head position and angle for ease of navigation. The home function allows you to realign the camera head straight forward when needed. HD images are displayed for you on the brilliant, touch screen high-resolution monitor.

The Wöhler VIS 700 inspection camera is designed to transmit live video data to smart devices via Wireless LAN. While conducting an inspection, you have the option to stream live images and videos on a smartphone or tablet. You can also save all footage to an SD card for reviewing at a later time.

Individual Control of Sharpness

The focus function via touch screen or joystick makes it possible to precisely control the depth of focus. A simple tip on the joystick ensures a precise, crystal clear image on the screen. Additional settings and extras, such as the touch screen keyboard, are accessible by tapping the touchscreen monitor.

# HARDNESS TESTING

## TELEWELD

### BRINELL HARDNESS TESTING

Telebrineller hardness measurements are a direct comparison to a known physical reference and therefore, measurements are not subject to inaccuracies due to; alloy, thickness, geometry, position, etc., that are common with many other portable testers.

Item	Description
BHNTS	Telebrineller Complete Set; Includes five (5) bars of selected hardness; Microscope; Computer; Bar Holder; Calculation Pad, all inside Carrying Case
BHNXXX	Telebrineller Test Bars (Available in 145-350 Hardness)
239-24	Halteman Filletester (Designed for Brinell Hardness Testing of fillet welds and other hard to reach areas)

## PHASE II

### PORTABLE HARDNESS TESTER

State of the art, digital portable hardness tester is designed to test the hardness of large hard metal parts. Loaded with useful functions only found on high priced models the PHT-1800 portable hardness tester is clearly setting a new industry standard by being the most accurate, economically priced portable hardness tester on the market today. Fast test speeds coupled with memory and output, this unit is a hand's down winner whether you are out in the field or in the QC shop.

Item	Description
PHT-1800	Digital Portable Hardness Tester which can perform tests that easily convert to the most popular hardness scales (Rockwell, Brinell, Vickers, Shore, etc.). Includes: Base instrument, Impact device D, Calibrated test block, Custom carry case, Cleaning brush and Operation manual

# FLAWED TEST SPECIMENS

## STANDARD SPECIMEN KITS

FlawTech Standard Kit Specimens are designed to enhance the training and development of new and veteran technicians. Kits will assist with basic flaw detection and sizing of real flaws found in common weld geometries.

Item	NDT Method	Specimens/Kit	Discontinuities
DK-1	NDT Demonstration Kit (Includes x-ray film for RT pipe specimen)	5 (3 Plates, 1 Tee and 1 Pipe)	11 (2 each plates & tee, 3 in pipe)

## PRACTICAL EXAM SPECIMENS

- Practical exam specimens are larger than our “standard” kit specimens
- 12 UT and 12 MT / PT specimens to choose from
- Each specimen will contain 3 randomly placed “real” flaws
- Designed to enhance the training and qualification of level I & II personnel with regards to ISO9712, PCN & TC - 1A
- Purchase any combination of specimens to make your set
- Custom specimens are available upon request
