

(LIP BLUSHING)

AFTER-CARE INSTRUCTIONS:

Following your Lip Blushing session with Michelle Vernon, meticulous after-care is paramount to ensure optimal healing and long-lasting results. Immediately after the procedure, avoid touching or rubbing your lips to prevent irritation and maintain pigment integrity. Refrain from consuming hot or spicy foods, as well as drinking through straws, to minimize irritation and promote healing.

For the first week post-treatment, apply a thin layer of recommended aftercare ointment to your lips several times a day to keep them moisturized and aid in healing. Avoid exposing your lips to direct sunlight and extreme temperatures, as this can affect pigment retention and lead to discomfort. Be gentle when cleansing your face, and avoid using harsh products or exfoliants on the treated area.

Attend your 8-week follow-up appointment with Michelle to evaluate healing progress and address any touch-up needs. This appointment is crucial for maintaining the vibrancy and symmetry of your Lip Blushing results. Michelle may recommend additional follow-up appointments or annual touch-ups to preserve the beauty of your lip color over time.

AFTER-CARE INSTRUCTIONS:

Throughout the healing process, it's essential to stay hydrated and maintain a healthy lifestyle to support optimal healing and pigment retention. Avoid smoking and excessive alcohol consumption, as these can negatively impact healing and compromise the longevity of your Lip Blushing results. If you experience any discomfort, swelling, or unusual symptoms, contact Michelle promptly for guidance and support.

As a certified and experienced permanent makeup artist, Michelle Vernon is dedicated to ensuring your satisfaction and comfort throughout the Lip Blushing process. Trust in her expertise and follow her after-care instructions diligently to achieve beautiful, long-lasting results that enhance your natural beauty and confidence.
