

(NANO-BROWS)

AFTER-CARE INSTRUCTIONS:

After undergoing Nano Brow treatment with Michelle Vernon, it's essential to follow a comprehensive aftercare regimen to ensure optimal healing and long-lasting results. Nano Brow is a delicate procedure that involves implanting pigment into the skin using ultra-fine needles, mimicking the appearance of natural eyebrow hairs. Following these aftercare instructions diligently will promote proper healing and help you achieve your desired brow look.

Immediate Post-Procedure Care:

Avoid Moisture:

Keep your brows dry for the first 24 hours post-treatment to allow the pigment to settle properly.

Avoid Sun Exposure: Shield your brows from direct sunlight and tanning beds for at least one week to prevent fading and discoloration.

(NANO-BROWS)

AFTER-CARE INSTRUCTIONS:

Avoid Makeup:

Refrain from applying makeup to the treated area for at least one week to minimize the risk of infection and irritation.

Avoid Touching:

Resist the urge to touch, rub, or scratch your brows as this can disrupt the healing process and lead to pigment loss.

Use Provided Aftercare Products:

Michelle may provide you with specialized aftercare products to aid in the healing process. Follow her instructions on how and when to apply them.

(NANO-BROWS)

AFTER-CARE INSTRUCTIONS:

Long-Term Aftercare:

Protect from Sun:

Even after the initial healing period, continue to protect your brows from prolonged sun exposure by wearing sunscreen or a hat.

Moisturize:

Keep your brows moisturized with gentle, non-comedogenic products to prevent dryness and flakiness.

Avoid Harsh Chemicals:

Refrain from using products containing harsh chemicals, such as exfoliants or retinoids, near your brows as they can cause premature fading.

(NANO-BROWS)

AFTER-CARE INSTRUCTIONS:

Attend Follow-Up Appointments:

Schedule and attend your 8-week follow-up appointment with Michelle to assess the healing progress and address any touch-up needs.

Maintain Healthy Lifestyle:

Stay hydrated, eat a balanced diet rich in vitamins and minerals, and avoid smoking and excessive alcohol consumption to support optimal healing and pigment retention.

Signs of Complications:

Excessive Swelling or Redness:

While some swelling and redness are normal post-treatment, excessive swelling or redness may indicate an infection or allergic reaction.

(NANO-BROWS)

AFTER-CARE INSTRUCTIONS:

Prolonged Pain or Discomfort:

If you experience prolonged pain or discomfort that does not subside with over-the-counter pain relievers, contact Michelle immediately.

Pigment Changes:

Any unexpected changes in the color or appearance of your brows, such as patchiness or fading, should be reported to Michelle promptly for assessment and correction.

Contact Michelle for Concerns:

If you experience any complications or have questions about your Nano Brow aftercare, don't hesitate to reach out to Michelle Vernon.

You can call or text her at (913) 514-4353 during normal business hours for guidance and support.
