Awning & Canopy Cleaning

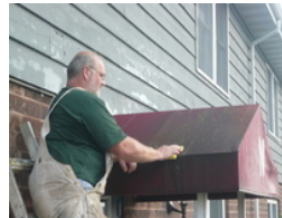

Awning Cleaning Have you ever gone out on a balmy summer evening to a restaurant and sat on the deck? Many restaurants and even residential homes have either retractable or non-retractable awnings. Awnings prevent dirt, leaves, mold, and even rain from falling upon you. However, these biological agents that fall on the awning discolor it, adhere to its surface, and cause the growths to start eating into the surface! The Caltex System removes these growths, cleans the surface, and restores it to a "like new" appearance. A regular maintenance schedule is a plus to maintain these awnings in their like new state. Often in commercial facilities, awnings and decks go together.
