25 Years Experience
Cedar Siding & Cedar Shake Restoration

Wood Restoration --- Caltex manufactures a one step process to clean and restore outdoor wooden structures without using any high pressure washing or harmful chemicals. Our LVLP technology is used on redwood, pressure treated lumber, pine, mahogany, epi, and birch among others. We clean cedar siding, decks, log homes, cedar shakes, gazebos, fences, and docks. Our products are natural, organic, non-toxic, environmentally safe, and USDA approved. They are safe to use around children, pets, swimming pools, and plants.

The Caltex System

The Caltex deck care method brings the wood deck back to its natural honey tones without damaging the surface. The Caltex Deck Cleaning System has been used extensively for the last two decades by over 900 dealers/dealers across the United States and Canada. Literally millions of wooden surfaces have been cleaned and sealed using The Caltex System. The use of wood in residential settings (decks, fences, patios, gazebos, sidings, tiles, shakes, and playgrounds) has increased 10 fold since the early 1970s.

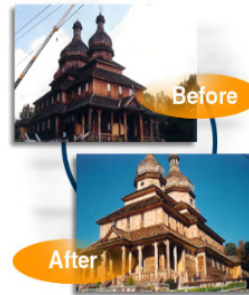

The Caltex System cleans wooden surfaces by restoring the wood to its natural honey tones and retarding the regrowth of mold, mildew, and lichens.
