About Us

Unimet Metal is engaged in manufacturing since 2005 based on the requirements of industry, combines quality and comfort and develops its innovative design according to different tastes.

From the fact that an individual spends most of its time sleeping, Unimet adds aesthetics to the comfort of sleep. It aims at raising the standards through a wide range of bedsteads, marketing approach and experience in the industry. Unimet provides the different without compromising the quality and has followed a stable process since it first put its products on the international markets. Unimet is very sensitive to the consumer demands, thus, it takes firm steps.

Unimet is proud to offer its customer satisfaction-oriented and innovative products to you valuable consumers based on a catchword **"We don't speak about but produce the quality"**.

METAL BED FRAMES WITH WOODEN SLATS

Most frequent complains about metal bedsteads-sofa daybed-bunk etc.
are squeaking and squeaking noise by the time.

Screw link system or slide connection system are used mostly for this products.

After some time there may be squeaking and noise issues occur with a affect of movement.
As is not screw or slide linking system on Unimet products, 'tapered passing system' is used.
This is a system that widening from bottom to the up and tapered top lock connection on top.
As it makes it so easy product assembly, and the link between pieces of furniture is becoming
more stronger at the same time.

All these, eliminate squeaking and noises issues easily.

Main lifter sheets are twisted side sheet's traverses.
