

# WAGE

**(We All Gotta Eat)**

**Ticker: \$WAGE**  
Built on Base Network

Two Worlds. One Philosophy.

# 1. Overview

WAGE — *We All Gotta Eat* — is a community-driven digital asset built on the Base Network. It exists as an independent on-chain ecosystem aligned philosophically with the open-world game **WAGE: Crimson Streetz**, developed by **Urban Interactive Adventure Technologies LLC (UIA TECH)**.

The token and the game are separate systems.  
They do not rely on each other contractually or financially.

But they share a cultural spine:

Ambition. Survival. Ownership. Movement.

WAGE reflects real-world hustle energy in digital form.

---

## 2. Project Philosophy

We All Gotta Eat.

In the real world, that means work, grind, ownership, participation.  
In the Crimson Streetz universe, it means survival, strategy, and movement.

The \$WAGE token represents:

- Economic participation
- Long-term conviction
- Community-driven growth
- Ownership without centralized control

The game builds narrative.  
The token builds economic presence.

Two independent ecosystems.  
One unified identity.

## 3. Token Details

- **Token Name:** WAGE (We All Gotta Eat)  
**Ticker:** \$WAGE
- **Network:** Base
- **Total Supply:** 1,000,000,000 (1 Billion)
- **Contract:** Public and verified

No minting.

No tax.

No hidden mechanics.

Fixed supply.

---

## 4. Token Allocation

### 900,000,000 — Liquidity (90%)

Allocated to public liquidity.

Planned long-term lock (1–2 years).

Purpose:

- Market transparency
  - Trust stability
  - Eliminate rug risk narrative
  - Signal long-term intent
- 

### 50,000,000 — Founder Allocation (5%)

Locked for 1 year.

Purpose:

- Demonstrate commitment
- Remove short-term sell pressure
- Align founder incentives with long-term growth

## **50,000,000 — Community & Promotion (5%)**

Reserved for:

- Airdrops
- Strategic partnerships
- Influencer campaigns
- Game-related promotional synergy
- Ecosystem expansion

This wallet supports growth — not extraction.

---

## **5. Why Lock Liquidity & Founder Allocation?**

Locking liquidity and founder allocation serves a purpose beyond optics.

It establishes:

- Long-term integrity
- Reduced volatility risk
- Clear commitment to holders
- Time for ecosystem growth

Liquidity lock provides stability.

Founder lock removes suspicion.

Both act as structural discipline mechanisms — not marketing tricks.

Holders gain a psychological relief valve:  
Knowing supply movement is predictable.

That stability builds conviction.

Conviction builds community.

---

## 6. Relationship to WAGE: Crimson Streetz

WAGE: Crimson Streetz is an open-world reactive crime universe.

The \$WAGE token appears in-game as environmental storytelling:  
Billboards, signage, city assets.

The token does NOT power gameplay mechanics (at launch).

Instead, it exists as:

- A cultural mirror
- A brand amplifier
- A parallel economic identity

The game builds an audience.

The token builds ownership participation.

Two systems.

One philosophy.

---

## 7. Roadmap

### Phase 1 – Foundation

- Smart contract deployment
  - Liquidity establishment
  - Contract verification
  - Token metadata indexing
  - Website launch
- 

### Phase 2 – Stabilization

- Liquidity lock (1–2 years)
- Founder lock (1 year)
- Community wallet activation
- Branding & narrative rollout
- Controlled organic discovery

## Phase 3 – Expansion

- Broader Base ecosystem visibility
  - DEX indexing optimization
  - Community campaigns
  - Strategic collaborations
  - Increased liquidity growth
- 

## Phase 4 – Integration Concepts (Future Exploration)

Potential long-term ideas:

- Optional in-game cosmetic purchases via \$WAGE
- Limited digital collectibles tied to Crimson Streetz
- Community-based competitions with token incentives
- WAGE merchandise purchasing utility
- Partner integrations within the Base ecosystem

Utility is roadmap-driven — not forced.

---

# 8. Governance & Transparency

WAGE is not a centralized profit scheme.

It is:

- Public
- Fixed supply
- On-chain
- Transparent

All liquidity and locks are verifiable on-chain.

Urban Interactive Adventure Technologies LLC builds the game.

The token exists as a parallel economic layer.

Clear separation.

Shared philosophy.

## 9. Long-Term Vision

WAGE aims to become:

A recognizable Base ecosystem brand

A cultural digital asset

A symbol of economic participation

It is not dependent on hype cycles.

It is built for those who understand:

We All Gotta Eat.

---

## 10. Closing Statement

WAGE represents the ownership mindset.

It aligns real-world ambition with digital opportunity.

It stands independently.

It grows collectively.

It moves deliberately.

Two worlds.

One philosophy.

**WAGE — We All Gotta Eat.**
