Our voluntary participation in rigorous quality certifications and independent testing is further assurance you have made an excellent selection for your home.

A MORE SUSTAINABLE CHOICE

The home that protects you can also help protect the environment. As a durable product with a long service life, vinyl siding such as those manufactured by Gentek have been shown in a cradle-to-grave Life Cycle Assessment study commissioned by the Polymeric Exterior Products Association (formerly the Vinyl Siding Institute) to have a smaller environmental footprint relative to competing materials.¹ And because it never needs to be painted, vinyl siding also helps prevent paint, stain and other maintenance-related products from being released to the environment.
