THE TOTAL
SYSTEM SOLUTION

 Franklin Fueling Systems

A complete line of cutting edge tank gauge consoles and state-of-the-art leak detection make INCON brand Fuel Management Systems the industry's premier brand for total system control. Compliance, inventory management and leak detection monitoring are made easy for every user with the industry's most intuitive tank gauge user interface.

Products include:

- Tank gauge consoles
- Probes
- Sensors
- Float kits
- External alarms
- Remote monitoring services

FUEL MANAGEMENT SYSTEMS

FUEL MANAGEMENT EVOLVED

TS-550 evo™ brings a new level of usability and functionality to fuel management systems. Revolutionary features make everything from daily functions to advanced programming simple for every user.

- Highly intuitive touch screen user interface
- Compliance tracking for proactive system monitoring
- Franklin Auto Setup Tool (F.A.S.T.) for quick and accurate programming

TS-550 evo™

PROBES & SENSORS

With its wide array of probes and sensors, Franklin has the right solution to fit any containment sump or interstitial space monitoring application.

- Leak detection and inventory control probes
- Water, phase separation, and density measurement float kits
- Discriminating and non-discriminating liquid and vapor detection sensors

TS-LL2 Liquid Level Probe

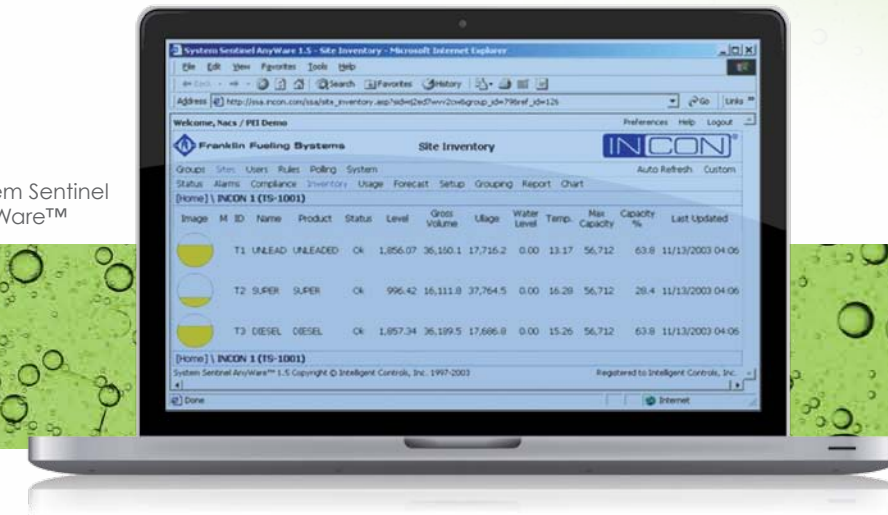

TSP-ULS Liquid Sensor

REMOTE MONITORING

System Sentinel AnyWare™ is a web-based fuel management package that provides unparalleled remote monitoring and control capabilities.

- Specific data in a user-defined polling schedule or in real-time
- Accurate delivery forecasting
- Centralized control of an unlimited number of sites with customizable data export features
