

The logo consists of the letters 'TTS' in a white, bold, sans-serif font, centered within a dark teal rectangular box. This box is itself centered within a larger, lighter teal trapezoidal shape that tapers to the right.

TTS

MASER's TTS solution is a unique integrated system for fuel products transportation, control and monitoring. By integrating top-grade magnetostrictive probes, electronic seals, GPS tracking, multiple sensors and a system for event data logging, we accomplish virtually unmatched level of security, accountability and fraud & theft prevention.

**Main features and added value:**

- Fuel entry and exit points security with Electronic seals - ATEX zone 0 certified
- Magnetostrictive probes for product, water and temperature monitoring
- Centralized real-time-data graphic interface monitoring system
- Easy, cost-effective wireless installation
- Depot-to-site product monitoring with real-time communication
- Automated and secured data logs

# TANK SMART

Our TankSmart system for fuel depots and petrol stations applies the best technology for real-time automated control and monitoring of your fuel stock. We offer top-grade magnetostrictive probes (up to 22 meters) as part of a complete automated HW/SW solution. The built-in alarms and alerts empower you to plan all your fuel orders and deliveries ahead.

## Main features and benefits:

- Automated:
  - data reading and/or transcription
  - detection and control of contaminated fuel dispensing
  - sludge and water detection and monitoring
  - management of minimum levels
- Verification of the temperature with relative compensation at 15°
- Detailed and customized reports on all fuel products
- Secure real-time communication with HQ ERP systems
- Built-in preemptive alerts (phone/sms/e-mail)
