

What happened in California?

(2023 Oakland School Board Race)

“Programming Errors” = A New Winner

In this botched election, candidate Nick Resnick was declared the winner. But two months later, a recount revealed there was an issue with the algorithm, resulting in an error—the error being Resnick’s victory. Mike Hutchinson, who had finished third, was now the winner. Due to the confusion, the Board of Supervisors had to direct a recount of every election using ranked-choice voting.

What happened in Maine?

(2018 Congressional Race)

More Than 8,000 Ballots Not Counted

The Republican who won the first round lost the second when they did the recount using the ranked-choice voting scam. The result: More than 8,000 voters were cheated out of the right to have their vote counted.

What happened in Alaska?

(2022 Congressional Special Election)

15,000 Votes Eliminated

Another 15,000 votes were eliminated under the banner of ranked-choice voting. 60% of voters supported Republicans but somehow with the magic of ranked-choice voting, the Democrat won.

Have you heard about Arlington County, Virginia?

Probably not, because **they dumped ranked-choice voting after ONE election!** The very liberal Arlington County Board enacted ranked-choice voting in December 2022, tried it out in June 2023, and had dumped it by July, just one month later!

The lessons are clear—steer clear of ranked choice voting. It’s an assault on our elections and an attack on Idaho’s democracy.
