

WELCOME TO ELITE AUTOMATION

TURNKEY SYSTEM INTEGRATION

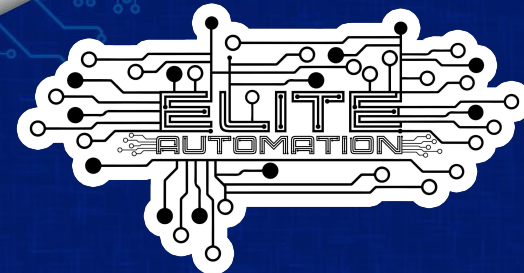

We specialize in the design, programming, and installation of Industrial Automation systems. Press Cycle Start & you have an operational system.

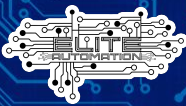

CUSTOM EQUIPMENT

We have produced entire custom Industrial Automation lines as well as adding a single robot, robot cell, vision system, conveying system, plus much more.

PAST SYSTEM

Our system have included robot, plc, vision system (inspection & location), line tracking conveying, safety systems and other Industrial Automation systems.

Our business model is primarily focused on new system design/installation; however, we integrate into existing systems and provide service work as well. We specialize in robotic cells with advanced automation technologies such as machine vision, line tracking, AMRs & collaborative robots. All robot cells include state of the art safety systems including CIP Safety, safety processors, door interlocks, laser scanners, light curtains, and safeguarding. We also provide automation consulting - a service so that we can act as an extension of your engineering team. If you or your company are in need of training we offer Allen Bradley PLC & Fanuc Robot Training. For other inquiries please contact us. Online Official Courses Coming Soon!
