

AGILE

101

Course Structure

Agile101 is a great introductory course on understanding the fundamentals of Agile tools, techniques and concepts.

Get to know the history and evolution of Agile along with 12 Agile principles and how Agile thinking is reshaping many industries globally.

In addition to awesome content the course features a number of interactive exercises designed to give learners a deeper understanding of how Agile techniques can be applied in a variety of business contexts.

Delivery Format

2-hour mentored learning **virtual** class delivered **via Zoom**

Typically featuring **dual facilitator** with a **primary facilitator** providing the training and a secondary facilitator for moderation support

Content
