BROWN B. LLC

F Precision crafted German stainless steel instruments

- F Surgical instrument pattern is equal to or better than industry standard
- F All instruments put through our stringent inspection process

to ensure consistent high quality

- F Continuous quality improvements

F INDUSTRY BEST WARRANTY

Surgical instruments are guaranteed to be free of defects in materials and workmanship for the life of the instrument

F FREE LIFETIME SHARPENING on Gold Series biopsy punches

Customer sends the biopsy punch with return address to Brown B LLC and we take care of the rest

- F Customer issues handled to their complete satisfaction

Scan this QR Code with your smartphone or tablet and connect with us online!

BROWN B. LLC • Spartanburg, South Carolina 29301 Office 864-764-1758

Limited Warranty

Brown B. LLC instruments are guaranteed to be free of defects in materials and workmanship for the life of the instrument.

Any instrument found to be defective will be repaired or replaced at Brown B LLC discretion. This guarantee is void if the instrument is not used for its intended surgical purpose or is serviced by anyone other than Brown B LLC.

Brown B. LLC Floor Grade (Economy) Instruments are limited use instruments and not covered under the above warranty

STAINLESS STEEL INSTRUMENT CLEANING & CARE

Required Cleaning Items:

- Distilled water with a neutral pH of 6-8 .
- Enzymatic Cleaning Solution with a neutral pH of 6-8 is highly recommended .
- Detergent with a neutral pH of 6-8 .
- Lubricant or Instrument Milk .
- Nylon brush or approved stainless steel bristles .

New Instruments: Should be disassembled and thoroughly cleaned BEFORE sterilization to remove manufacturing residue or foreign debris .

Distilled Water: Immediately after use, submerge instrument(s) in distilled water . Keep submerged until the cleaning steps begin .

Enzymatic Soak: Disassemble instruments and submerge them in an approved enzymatic solution following the manufacturer's recommendation . All instruments must be in the unlocked, un-ratcheted, jaws-open position to expose as much of the instruments' surfaces as possible . This helps to keep blood, debris and protein matter from sticking to the instrument surfaces and crevices .

Rinse to Remove the Enzymatic Solution and Loose Bio-debris: Rinse the instruments with warm tap water before instrument cleaning/scrubbing begins .

Cleaning Instruments: Instruments should be scrubbed using approved brushes and a detergent with a neutral pH of 6-8 . Immerse instrument in the detergent solution and clean with a small nylon bristled brush concentrating on the box-lock, hinged areas, ratchets, serrated jaws and tip areas . Use caution while cleaning sharp tip instruments and instruments with teeth so not to damage those delicate areas . A soft cloth or lap sponge can be used to clean the shafts and shanks of the instrument . Stainless steel wire brushes approved for use on surgical instruments can be used for cleaning difficult areas such as serrations, bone rasp and instrument handles with grooved areas .

Rinse: Immediately after scrubbing, rinsing the instruments in distilled water is preferred . If using tap water be sure to wipe and dry the instrument with a soft cloth . Open the instruments to expose all surfaces to ensure all the detergent residues are wiped off all possible surfaces . Pay particular attention to the box lock, hinged areas, and small crevice areas .

Inspection: Visually inspect each instrument to ensure cleanliness and performance . Inspection should include checking scissor blade closure, thumb forceps with 1x2 teeth and with serrations, and are properly aligned when closed . Hemostats and needle holders should open and close smoothly with uniform jaw closure .

Drying by Hand: Instruments must be thoroughly dried before being wrapped or placing them in a basket for sterilization .

IMPORTANT STEP: Any cleaning moisture left on the instruments may contain detergents or minerals that will cause spotting, staining, discoloration, corrosion and will lower the performance and life expectancy of the device .

Lubrication: Lubrication should be applied before each sterilization . Instruments should be soaked or sprayed with water soluble instrument milk on the hinges and sliding parts of the instruments . This helps the instruments move freely during use . The instrument lubricant also helps build up a Passivation layer on the instrument surface . This layer acts like a wax coating to help resist blood, debris and/or other protein matter from sticking to the instruments . It also helps resist mineral deposits on the instrument surface . Silicon or Petroleum based lubricants are not recommended for surgical instruments . Instruments can now be made ready for the sterilizer .

Sterilization: Sterilize as recommended by the AAMI Standards and Recommended Practices, Volume 1, 1992, and the sterilizer manufacturer's written instructions for cycle parameters including pH balanced distilled water .

Sterilization of instruments may be accomplished by Autoclave or Ethylene Oxide . Time and temperature parameters required for sterilization vary according to type of sterilizer, cycle design, and packaging material .

- Do not sterilize instruments at temperatures over 141°C (285°F) .
- All ring handled instruments must be autoclaved in the fully open position to prevent cracking of the box lock .
- Always verify parameters with sterilizer manufacturer's written instructions .

Parameters for Wrapped Instruments in Steam Sterilization

Sterilization	Temperature	Exposure	Drying
Gravity Displacement	121°C (250°F)	30 Minutes	45 Minutes
	182°C (270°F)	15 Minutes	46 Minutes
Pre-vacuum Sterilization	132°C (270°F)	4 Minutes	30 Minutes
	136°C (275°F)	3 Minutes	16 Minutes

Parameters for Wrapped Instruments in Ethylene Oxide (ETO) Sterilization

Concentration	Temperature	Exposure	Humidity
600 (100%)	55°C (131°F) to 2°C (3.6°F)	145 Minutes	55% to 5%

Storage:

- After Sterilization, instruments should remain in sterilization wrap and be stored in a clean, dry cabinet or storage case .
- Care must be taken to protect the jaws from damage .

COMMON INSTRUMENT POST CLEANING COMPLAINTS AND CAUSES

Corrosion: Bio-debris, residues and high alkaline water and chloride based detergents used for cleaning or sterilization that is not pre-cleaned and thoroughly dried and dried before sterilization or short drying cycles that leaves the instruments moist and left to dry outside the sterilizer .

Pitting: The most common causes of pitting are chloride based detergents, saline solutions and blood left on the instruments due to improper cleaning and scrubbing .

Rust: Sterilizing instruments of different metals in the same cycle will cause rusting . An electrolytic action will transfer carbon particles from exposed non-stainless to stainless metals . The rapid oxidation of those carbon particles results in a surface film of rust .

Stains: It is common for instruments to become stained or spotted even when following standard protocol . In most cases these problems are resulting from mineral deposits on the instrument surfaces . Following proper Care & Handling techniques can help prevent and minimize most staining situations .

Brown Stains: Most brown stains are from detergents that contain phosphates and dissolve copper elements in the sterilizer which result in copper being deposited on the instruments by an electrolytic reaction .

Blue Stains: These are usually the result of cold sterilization techniques . It is necessary to follow exact instructions and mixture levels according to the manufacturer .

Black Stains: These stains are typically the result of contact with ammonia . This may also be the result of amine deposits from the steam in the sterilizer . Amine solutions are often used to clean the sterilizers . Distilled water cycled through the sterilizer can help eliminate the amine problem .

Other Spotting: Other spotting situations can be the result of slow water vaporization or condensation on the instruments . Distilled water will also help eliminate these spots .

REPAIR SERVICE

Worn or damaged instruments can usually be restored to serviceable use by our skilled instrument repair technicians . This service is offered on all surgical instruments, regardless of manufacturer . To provide you with prompt service on sharpening or repairs, please go to our website at www.brownbllc.com, click on the tab INSTRUMENT REPAIR, and fill out the online form to begin the process .

RETURN POLICY

BR Surgical will offer credit for: unused/unsterilized items, in the original packaging, and requested within 30 calendar days from the date of invoice . Restocking fees may apply. Contact BR Surgical for complete details of our return policy .Please go to our website at www.brownbllc.com, click on the tab SERVICES/RETURNS, and fill out the online form to begin the process .

ENDOSCOPE CLEANING & STERILIZING INFORMATION

Cleaning: The Endoscope has three optical surfaces that must be cleaned routinely to ensure both maximum transmission of illumination, and a high quality image.

All should be cleaned with warm water and mild soap. If stains are still present, a mixture (1:1) of methyl alcohol and acetone may be used. A fine woven cloth or lens tissue should be used for cleaning. Dry with a soft woven cloth. By reflecting light off all optical surfaces, you can detect any foreign matter or scratches that would degrade image quality.

Note: Any foreign matter present on the fiber surface after cleaning may tend to burn and discolor the surface when the high intensity lamp is in use.

Note: To avoid fogging during surgery, the rear portion of the scope must be entirely free of moisture before attachment to the camera or coupler. Extreme heat from steam autoclaving and high intensity lamp will cause debris on the optical surfaces to discolor, burn, and harden. The lock of the endoscope should remain free of debris to ensure solid locking of components. Use a bristle brush with warm soapy water to clean these components.

Removing deposits on optical surfaces: Due to insufficient cleaning or foreign matter in steam, deposits may develop on the three optical surfaces during the autoclaving process. Any foreign matter remaining on the optical surfaces will reduce the optical performance of the endoscopes and may lead to a cloudy picture. These deposits can easily be removed using the biocompatible polishing past which is enclosed in the endoscope. To remove deposits, dab some polishing paste onto a clean cotton tabbed swab. Press gently onto the optical surface to be cleaned and scrub the window in circles. Rinse the optical surfaces with tap water to remove any remaining polishing paste.

Note: Cleaning with polishing paste should not be part of your routine cleaning procedures and should only be performed when the range – as viewed through the scope – is cloudy.

Chemical Disinfection and Steris Process: The scope is immersible and should be disinfected using the process obtained from the individual chemical manufacturer. Scopes are materially compatible with the Steris process. The endoscope should be rinsed after soaking with sterile water and dried with a sterile cloth.

Sterilization: Important: Be sure that the scope is cleaned thoroughly before sterilizing. The endoscopes should be sterilized or disinfected in a container which secures the instrument in place. Be sure the needle portion does not experience any force or stress which can destroy the delicate internal lenses.

Gas Sterilization: Follow standard hospital procedures for gas sterilization. Place scopes separately from instruments in a container approved for general use with gas sterilization (such as perforated metal tray), with gauze or loosely woven cloth inserts folded around each item and stabilized to avoid movement.

Following 10/90 ethylene oxide/Oxyfume 2002 sterilization cycle is validated.

Preconditioning Parameters:

Temperature: 55+/-2°C (131 +/-5°F)
Relative Humidity: >=35%
Vacuum: 21+/-1 in Hg
Pre-conditioning time: 1 hour

Sterilization Parameters:

Ethylene Oxide Carrier: Oxyfume 2002
Temperature: 55 +/- 2°C (131 +/- 5°F)
Relative Humidity: >=35%
Pressure (PSIG Start): 19 +/- 1 PSIG
Ethylene Oxide Concentration: 736 mg/l
Gas exposure time: (full cycle)
Aeration: 11 hours at 54°C (129°F) minimum

Autoclaving: Caution: Scopes cannot be steam autoclaved unless “autoclavable” is engraved on the endoscope body. Otherwise this method will permanently damage optical components.

Endoscopes must be carefully cleaned before autoclaving, as foreign matter will impede sterilization and harden into a crust which is difficult to remove (refer to section 2). Endoscopes which are not cleaned properly before autoclaving will experience reduced optical performances and shortened service lives.

Place clean endoscope in a suitable sterilization tray. A suitable tray will hold the endoscope firmly but gently. The endoscope should not be allowed to be in intimate contact with the metal tray. This will result in direct heat transfer from the tray to the instrument, which can cause damage to the instrument.

Gravity Steam Sterilization: Follow standard hospital procedure for gravity steam sterilization (Double wrapped in muslin) at 132°C - 135°C (270°F - 275°F) for 10 minutes.

Pre-vacuum Sterilization: Follow standard hospital procedure for pre-vacuumed steam sterilization (double wrapped in muslin) at 132°C - 135°C (270°F - 275°F) for 3 minutes.

Standard Procedures for Steam Sterilization: If these procedures are not observed, the endoscope may be destroyed and the warranty may be voided. After completing the sterilization, the endoscope should be cooled slowly in the autoclave to room temperature. Do not immerse or rinse instruments in cold water or any other liquid to accelerate cooling.

Note: Sterilizer functioning should be monitored at regular intervals with biological indicators to ensure products have been subject to sterilization conditions.

Warning: High-energy radiated light emitted from illuminating fiber at the distal end of the scope may give rise to temperatures exceeding 41°C within 8 mm in front of the scope. Burns may occur if you leave the tip of the scope in direct contact with patient tissue or combustible materials. Lower the light source output when working in close proximity to the object.

BROWN B. LLC proudly provides quality repair service for worn or damaged instruments from all instrument manufacturers.

Our skilled factory repair specialists will make every effort to repair or restore damaged instruments to its normal or optimal working condition. Any instrument deemed unrepairable can be returned "as-is", or can be replaced with a comparable BROWN B. LLC instrument at the customer's discretion.

**To start the process, simply go to our website at
www.BrownBLLC.com**

After submission of the online form, you will be contacted with a repair ticket number and further instructions.

You will be responsible to ship the instrument to us, and we will take care of the return postage.

Instruments must be sterilized/disinfected before shipping to BROWN B. LLC.

HYSTEROSCOPY VIDEO SYSTEM

BR900-1101

Endoscopic Video Camera, 1CCD, including camera head and coupler with Built-In USB Image Capture

BR900-2252HLS

High quality construction and superior optics make this scope a long-lasting value. Excellent customer service and support make it a smart purchase.

BROWN B, LLC is pleased to offer premium-quality Flexible Rhinolaryngoscopes designed for the needs of the physician in daily practice. High resolution and a specially designed multilens objective ensures the optimum picture quality you expect from a high-precision scope.

Endoscope Express Repair/Exchange Program

For your peace of mind, we offer a repair or exchange program. When we receive your scope we investigate whether repair is possible or replacement is indicated for economical or safety reasons. You are contacted, a decision made and your endoscope is back on the way to you!

- Exclusively designed for alternate care market
- Repaired by original endoscope manufacturer
- Repaired with original manufacturer parts "traceability"
- Repaired by highly trained repair technicians
- Minimal downtime = No interruptions of procedures
- No hidden repair cost = No surprises for customer

Level 1 Exchange

- Cleaning & Alignment

Level 2 Exchange

- Insert Tube Replacement (Except Fiber Bundle)

Level 3 Exchange

- Complete Insertion Tube Replacement

Lifetime Sharpening*
on any BROWN B, LLC
Gold Series Instrument

High quality construction and superior optics make this scope a long-lasting value. Excellent customer service and support make it a smart purchase.

BROWN B, LLC guarantees a German engineered endoscope with premium image brightness and optical clarity that is designed and constructed for long lasting performance. Our service team is dedicated to keeping you in business with fast, fair and cost effective service solutions.

Clearly a better scope.

SUPERIOR VISUALIZATION & DURABILITY:

We can guarantee a brilliant high definition image because we control the construction of your endoscope from start to finish, from optical calculation to glass rod production. BROWN B. LLC Endoscopes provide maximum protection against degrading influences of reprocessing.

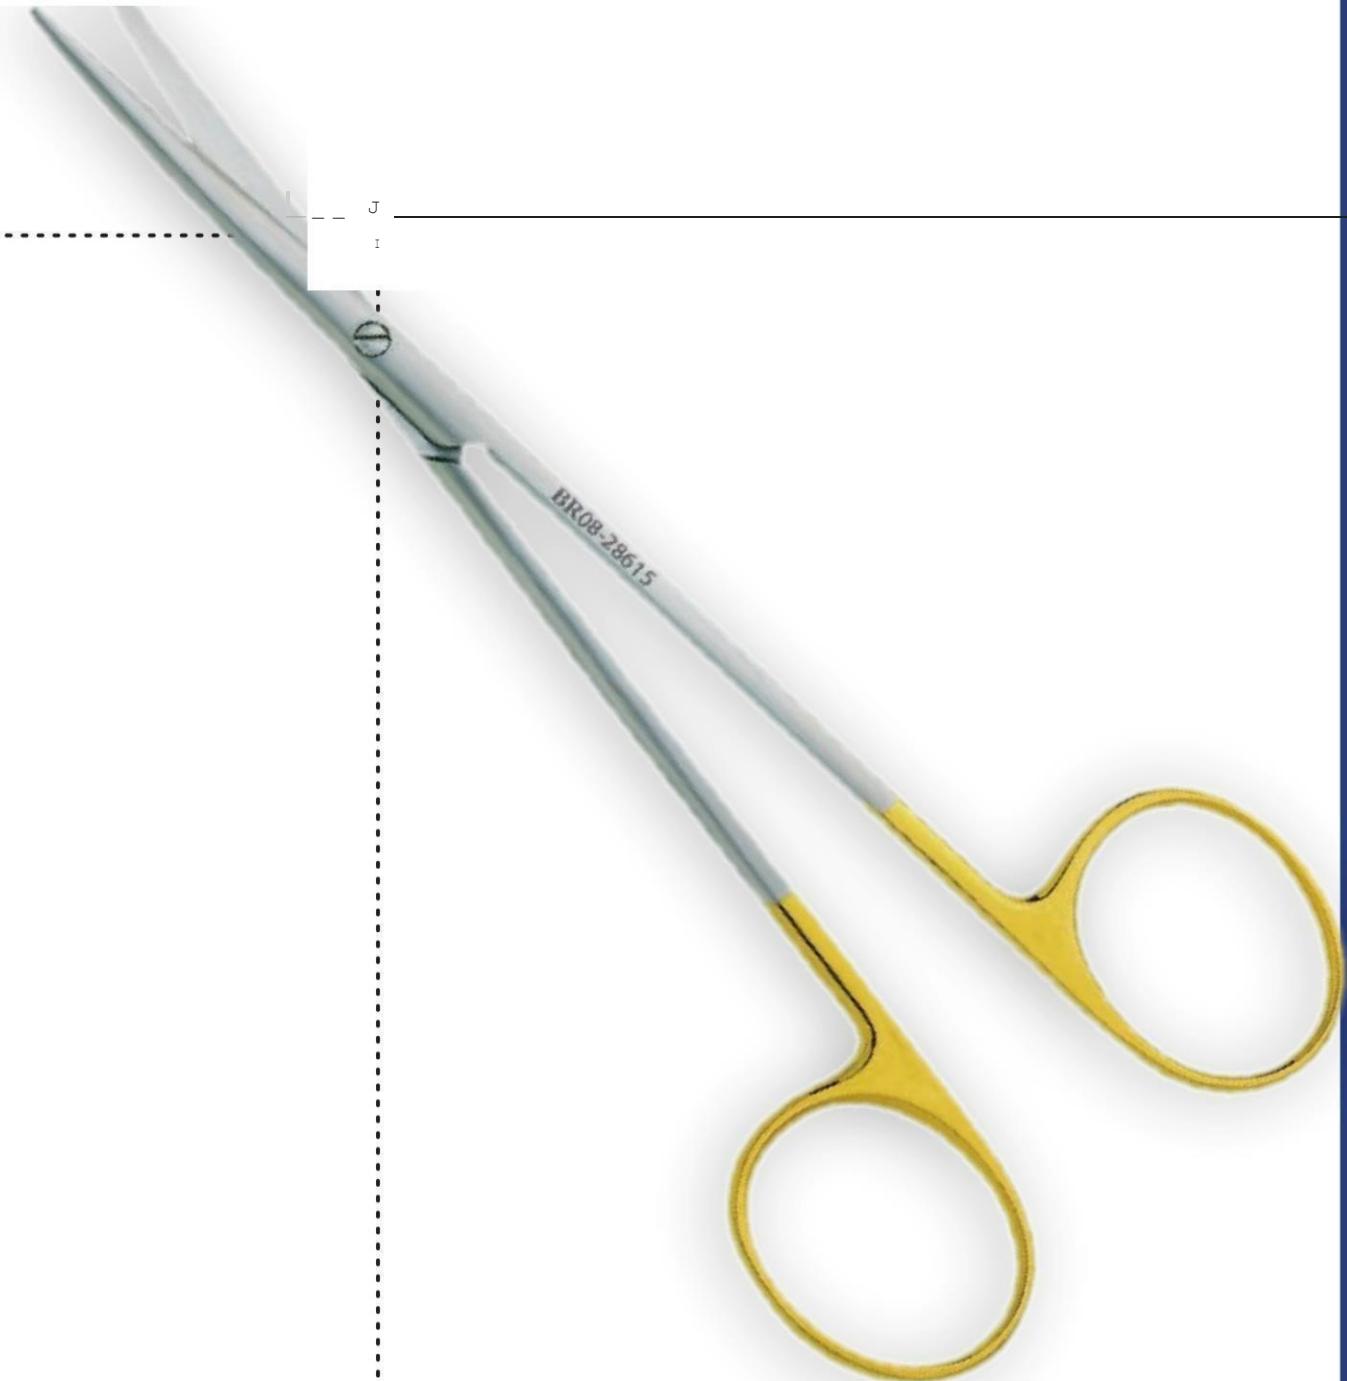

FIBER OPTICS & ILLUMINATION:

- **Fiber cone tape red** better light amplification
- **High transmission wide angle illumination** for peerless light transmission

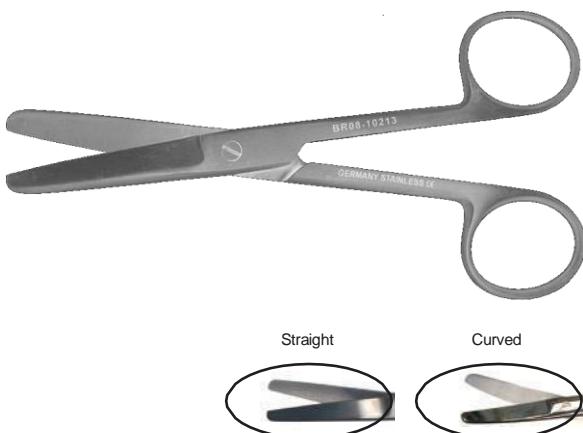

LONG LASTING PERFORMANCE:

- **Proximal & distal sapphire window** scratch resistance, no glass corrosion
- **Phynox medical grade stainless steel tubing**, more durable material
- **No Coatings** eliminates chance of coatings coming off during reprocessing over time
- **Laser welded joints** seal fiber optic illumination bundles hermetically from the optical train, to avoid humidity and chemical penetration
- **Laser welded joints** increase strength between scope body and sheath
- **Hydrophilic gas filled optical -traanitni** fogging device

Tungsten Carbide (TC) Scissors are manufactured with Tungsten Carbide Inserts in the blades of the Scissot. Tungsten Carbide is much harder and longer lasting than Stainless Steel and is designed to provide a longer lasting sharp edge on the Scissor blade for many years. **Tungsten Carbide Scissors are designated by Gold Ring Handles.**

Scissors available with supercut and serrations.

SuperCut Scissors are manufactured with a razor edge on one blade and micro serrations on the other blade. The razor edge blade is designed to provide a smooth, precise and less traumatic cutting of tissue and the micro serrated blade is designed to reduce slippage of tissue within the blades of the scissor . The SuperCut is only recommended for tissue not for suture or gauze .

SuperCut Scissors are designated by Black Ring Handles

MAYO SCISSORS • SUPERCUT

BROWN B. LLC is proud to introduce our new SuperCut/Serrated Iris Scissor hand-made from Germany, featuring a Razor Edge on one side, with Micro Serrations on the other, allowing you to feel the precise cutting action all the way to the tips of the blades.

The feathered "Razor Edge" blade provides the sharpest edge available in any scissor blade, designed to provide a smooth and precise feel, with less traumatic cutting of tissue when used in a surgical procedure .

The "Micro Serrations" are designed to reduce slippage of tissue within the blades of the scissor, and to hold the tissue in the jaws to allow for exact cutting, trimming and excision .

The SuperCut is only recommended for tissue and not for suture or gauze .

BROWN B. LLC introduces their NEW line of Ceramic Coated SuperCut Iris Scissors that provide "State of the Art" in cutting performance on every procedure. The smooth Ceramic Coating provides less friction on the surface of the scissors, ensuring an effortless "Glide Action" of the scissor blades while cutting through tissue . The high performance ultra-hard surface provides better durability against wear and tear on the scissors, extending the life Finally, the matte black coat and reflection during use .

BROWN B. LLC's Ultra

- 1) Non Sticking Cutting Performance
- 2) Smoother Glide Action through the tissue
- 3) Extended Lifetime of Instrument Performance

Tungsten Carbide (TC) Needle Holders are manufactured with Tungsten Carbide Inserts in the jaws of the Needle Holder. Tungsten Carbide is much harder and longer lasting than Stainless Steel and provides sharper teeth which are designed to provide a more precise and secure grip on the needles.
Tungsten Carbide Needle Holders are designated by Gold Ring Handles.

BROWN B. LLC proudly provides quality repair service for worn or damaged instruments from all instrument manufacturers.

Our skilled factory repair specialists will make every effort to repair or restore damaged instruments to its normal or optimal working condition. Any instrument deemed unrepairable can be returned "as-is", or can be replaced with a comparable BROWN B. LLC instrument at the customer's discretion.

**To start the process, simply go to our website at
www.BrownBLLC.com**

After submission of the online form, you will be contacted with a repair ticket number and further instructions.

You will be responsible to ship the instrument to us, and we will take care of the return postage

Instruments must be sterilized/disinfected before shipping to BROWN B. LLC

BR900-3100 FIBER OPTIC XENON HEADLIGHT

- with bifurcated cable & deluxe-plus headband
- Variable focus (20mm to 110mm) variable spot
 - Rotating ring allows for complete control of the spot size without losing intensity
 - Sterilizable joystick for position control
 - Choice of ratchet adjustment or clip style crown adjustment
 - Ergonomic design
 - Foam-backed comfort liners
 - Ratchet adjustment in rear
 - 3 .5mm Fiberoptic cable

BR900-3110 FIBER OPTIC LED/HALOGEN HEADLIGHT

- with bifurcated cable & standard headband
- Variable focus (20mm to 80mm) variable spot
 - Rotating ring allows for complete control of the spot size without losing intensity
 - Sterilizable joystick for position control
 - 5 .0mm Fiberoptic cable
 - Rear Ratchet adjustment & clip style crown adjustment
 - Economical design with plastic matte finish
 - Foam-backed comfort liners

Also available in 11".

CYSTOSCOPE BRIDGES

- BR50-050-000 Cystoscope Bridge, diagnostic
 - BR50-050-001 Cystoscope Bridge, 1 instrument channel
 - BR50-050-002 Cystoscope Bridge, 2 instrument channels
-

CYSTOSCOPES

- BR966-2900-302 Cystoscope, autoclavable, Ø 2.9mm, 0°, 302mm
- BR966-2912-302 Cystoscope, autoclavable, Ø 2.9mm, 12°, 302mm
- BR966-2930-302 Cystoscope, autoclavable, Ø 2.9mm, 30°, 302mm
- BR966-4000-302 Cystoscope, autoclavable, Ø 4mm, 0°, 302mm
- BR966-4012-302 Cystoscope, autoclavable, Ø 4mm, 12°, 302mm
- BR966-4030-302 Cystoscope, autoclavable, Ø 4mm, 30°, 302mm
- BR966-4070-302 Cystoscope, autoclavable, Ø 4mm, 70°, 302mm

CYSTOSCOPE-URETHROSCOPE SHEATHS

- BR50-015-010 Cystoscope-Urethroscope Sheath, 2 fixed stopcocks (Luer-Lock), & Obturator, Ø 15FR
- BR50-017-010 Cystoscope-Urethroscope Sheath, 2 fixed stopcocks (Luer-Lock) & Obturator, Ø 17FR
- BR50-019-010 Cystoscope-Urethroscope Sheath, 2 fixed stopcocks (Luer-Lock) & Obturator, Ø 19FR
- BR50-021-010 Cystoscope-Urethroscope Sheath, 2 fixed stopcocks (Luer-Lock) & Obturator, Ø 21FR
- BR50-023-010 Cystoscope-Urethroscope Sheath, 2 fixed stopcocks (Luer-Lock) & Obturator, Ø 23FR
- BR50-025-010 Cystoscope-Urethroscope Sheath, 2 fixed stopcocks (Luer-Lock) & Obturator, Ø 25FR

VISUAL OBTURATORS

- BR50-017-017 Visual Obturator, for Ø 17FR cystoscope-urethroscope sheath
- BR50-019-017 Visual Obturator, for Ø 19FR cystoscope-urethroscope sheath
- BR50-021-017 Visual Obturator, for Ø 21FR cystoscope-urethroscope sheath
- BR50-023-017 Visual Obturator, for Ø 23FR cystoscope-urethroscope sheath
- BR50-025-017 Visual Obturator, for Ø 25FR cystoscope-urethroscope sheath

ENDOSCOPE STERILIZATION TRAY

- BR970-2000-000 Endoscope Sterilization Tray, with silicone scope holders for rigid scopes, 17½" x 1¾" x 3½"

ENDOSCOPIC CLEANING BRUSH

- BR980-9010 Endoscopic Cleaning Brush, disposable, non-sterile, Ø 1.5mm x 180cm (brush Ø 3.0mm), 10 per package (for cystoscopes & hysteroscopes)

CYSTOSCOPY DRAPE

- BR980-9222 Cysto Drape, under buttocks drape with pouch, non-sterile, 5 per box

FLEXIBLE SCISSORS

BR980-7010-003 Flexible Scissor, single action jaws, 3FR x 40cm

BR980-7010-005 Flexible Scissor, single action jaws, 5FR x 40cm

FLEXIBLE GRASPING FORCEPS

BR980-7013-003 Flexible Grasping Forcep, with serrations, double-action jaws, 3FR x 40cm

BR980-7013-005 Flexible Grasping Forcep, with serrations, double-action jaws, 5FR x 40cm

FLEXIBLE BIOPSY SPOONS

BR980-7014-003 Flexible Biopsy Spoon, double-action jaws, 3FR x 40cm

BR980-7014-005 Flexible Biopsy Spoon, double-action jaws, 5FR x 40cm

FLEXIBLE SCISSOR

BR980-7018-005 Flexible Scissor, single-action jaws, Ø 5FR x 60cm

FLEXIBLE STONE GRASPING FORCEP

BR980-7020-005 Flexible Stone Grasping Forcep, double-action jaws,
Ø 5FR x 60cm

URETERO-RENOSCOPE STONE GRASPING FORCEP

BR980-7021-005 Flexible Uretero-Renoscope Stone Grasping Forcep,
for larger stones, double-action jaws, Ø 5FR x 60cm

FLEXIBLE BIOPSY FORCEP

BR980-7022-005 Flexible Biopsy Forcep,
double-action jaws, Ø 5FR x 60cm

BR966-7801-800 Flexible Biopsy Forcep,
double-action jaws, Ø 5FR x 80cm

FLEXIBLE ALLIGATOR GRASPER

BR966-7800-600 Flexible Alligator Grasper,
double action jaws, 5FR x 60cm

BR966-7800-800 Flexible Alligator Grasper,
double action jaws, 5FR x 80cm

CYSTOSCOPY VIDEO SYSTEM

- BR900-1101** Endoscopic Video Camera, 1CCD, including camera head and coupler with Built-In USB Image Capture
- BR900-2252HLS** Halogen 250 Watt Light Source, Dual Lamp, Storz port
- BR900-5050** Fiber Light Cable, 5mm x 7 1/2 ft.
- BR900-4421** SONY Medical Grade Flat Panel Monitor, Wide-View, 21"
- BR900-9170** Endoscopic Video Cart w/Flat Panel Mount, 3 shelves

Video Camera has **Built-In Image Capture System** that provides image capture capability with push button control on the Camera Head .

CYSTOSCOPES, BRIDGES & SHEATHS

BR Sheaths are manufactured to the highest quality standard and specifications, they are available for diagnostic and operative procedures.

- BR966-2900-302** Cystoscope, autoclavable, Ø 2.9mm, 0°, 302mm
- BR966-2912-302** Cystoscope, autoclavable, Ø 2.9mm, 12°, 302mm
- BR966-2930-302** Cystoscope, autoclavable, Ø 2.9mm, 30°, 302mm
- BR966-4000-302** Cystoscope, autoclavable, Ø 4mm, 0°, 302mm
- BR966-4012-302** Cystoscope, autoclavable, Ø 4mm, 12°, 302mm
- BR966-4030-302** Cystoscope, autoclavable, Ø 4mm, 30°, 302mm
- BR966-4070-302** Cystoscope, autoclavable, Ø 4mm, 70°, 302mm

- BR50-050-000** Cystoscope Bridge, diagnostic
- BR50-050-001** Cystoscope Bridge with 1 instrument channel
- BR50-050-002** Cystoscope Bridge with 2 instrument channels

- BR50-017-010** Cystoscope-Urethroscope sheath with 2 fixed stopcocks (Luer-Lock) & Obturator, Ø 17FR
- BR50-019-010** Cystoscope-Urethroscope sheath with 2 fixed stopcocks (Luer-Lock) & Obturator, Ø 19FR
- BR50-021-010** Cystoscope-Urethroscope sheath with 2 fixed stopcocks (Luer-Lock) & Obturator, Ø 21FR
- BR50-023-010** Cystoscope-Urethroscope sheath with 2 fixed stopcocks (Luer-Lock) & Obturator, Ø 23FR
- BR50-025-010** Cystoscope-Urethroscope sheath with 2 fixed stopcocks (Luer-Lock) & Obturator, Ø 25FR

BR980-7014-003 Flexible Biopsy Spoon, double-action, 3FR x 40cm

BR980-7014-005 Flexible Biopsy Spoon, double-action, 5FR x 40cm

BR980-7008-005 Semi-Rigid Biopsy Spoon, double action, 5FR x 40cm

ENDOSCOPIC CLEANING BRUSH

BR980-9010 Endoscopic Cleaning Brush, disposable, non-sterile,
Ø 1.5mm x 180cm (brush Ø 3.0mm), 10 per package
(for cystoscopes & hysteroscopes)

HYSTEROscopy TUBING SETS

BR980-9200 Hysteroscopy Tubing Set, inflow and outflow tubing,
sterile, 10 per box
BR980-9201 Hysteroscopy Single Line Irrigation Tubing,
sterile, 10 per box

OB DRAPE

BR980-9222 OB Drape with Pouch, non-sterile, 5 per box

SEALING CAP

BR980-92689 Sealing Cap for Sheaths, 5 per box
(Hysteroscopy and Cystoscopy)

ENDOSCOPIC SEALING CAPS

BR980-92705 Endoscopic Sealing Caps, single use, sterile,
latex-free, double seal, 10 per box
(Hysteroscopy and Cystoscopy)

MINOR HYSTEROSCOPY PROCEDURE KIT

- BR980-9502 MINOR Hysteroscopy Procedure Kit, 5 per box, consisting of;
hysteroscopy tubing, OB drape w/pouch and endoscopic cleaning brush

MAJOR HYSTEROSCOPY PROCEDURE KIT

- BR980-9515 MAJOR Hysteroscopy Procedure Kit, 5 per box, consisting of;
hysteroscopy tubing, OB drape pouch, endoscopic cleaning brush
and 800cc fluid canister

"Closed System" for safe disposal of liquids and body fluids.

HYSTEROSCOPY CONVENIENT SET

- BR980-9520 Hysteroscopy Convenient Set, 5 per box, consisting of;
hysteroscopy tubing set, under buttock drape

HYSTEROSCOPY PROCEDURE KIT

- BR980-9600 Hysteroscopy Sterile Procedure Kit (5 per box) consisting of;
hydro tubing set, drapes (under buttock, video, back table),
OR towels, control syringes, spinal needle, rayon swab,
gauze, alcohol prep, PVP prep, gloves

HYSTEROSCOPY DRAPE KIT

- BR980-9601 Hysteroscopy Sterile Drape Kit (5 per box) consisting of;
hydro tubing set, drapes (under buttock, video, back table), OR towels

HYSTEROSCOPY IN-OFFICE PACK

- BR980-9604 In Office Hysteroscopy Sterile Pack (5 per box) consisting of;
hydro tubing set, (2) leggings, drapes (under buttock, video, drape
sheet, back table), PVP paint sponge stick pouch, (2) blue OR towels,
alcohol swabstick, tray, pouch

BROWN B. LLC INSTRUMENT LUBRICANT

Rust Inhibitor: extends lifespan of instruments, resulting in fewer repairs .

Non-Silicone Lubricant .

Environmentally-Friendly:

Biodegradable, phosphate-free, non-polluting formula .

Our unique rust inhibitor and lubricant contains corrosion inhibitors that protect all types of metal instruments, including carbon steel . No rinsing or wiping of instruments is necessary .

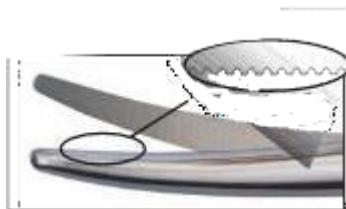

BROWN B. LLC Instrument lubricant can be used with sterilization and maintains free working instruments .

BR82-12050

BROWN B. LLC Instrument Lubrication, (12) 8 oz . bottles per box

BROWNB. LLC is proud to introduce our new SuperCut/Serrated Iris Scissor hand-made from Germany, featuring a Razor Edge on one side, with Micro Serrations on the other, allowing you to feel the precise cutting action all the way to the tips of the blades.

The feathered "Razor Edge" blade provides the sharpest edge available in any scissor blade, designed to provide a smooth and precise feel, with less traumatic cutting of tissue when used in a surgical procedure .

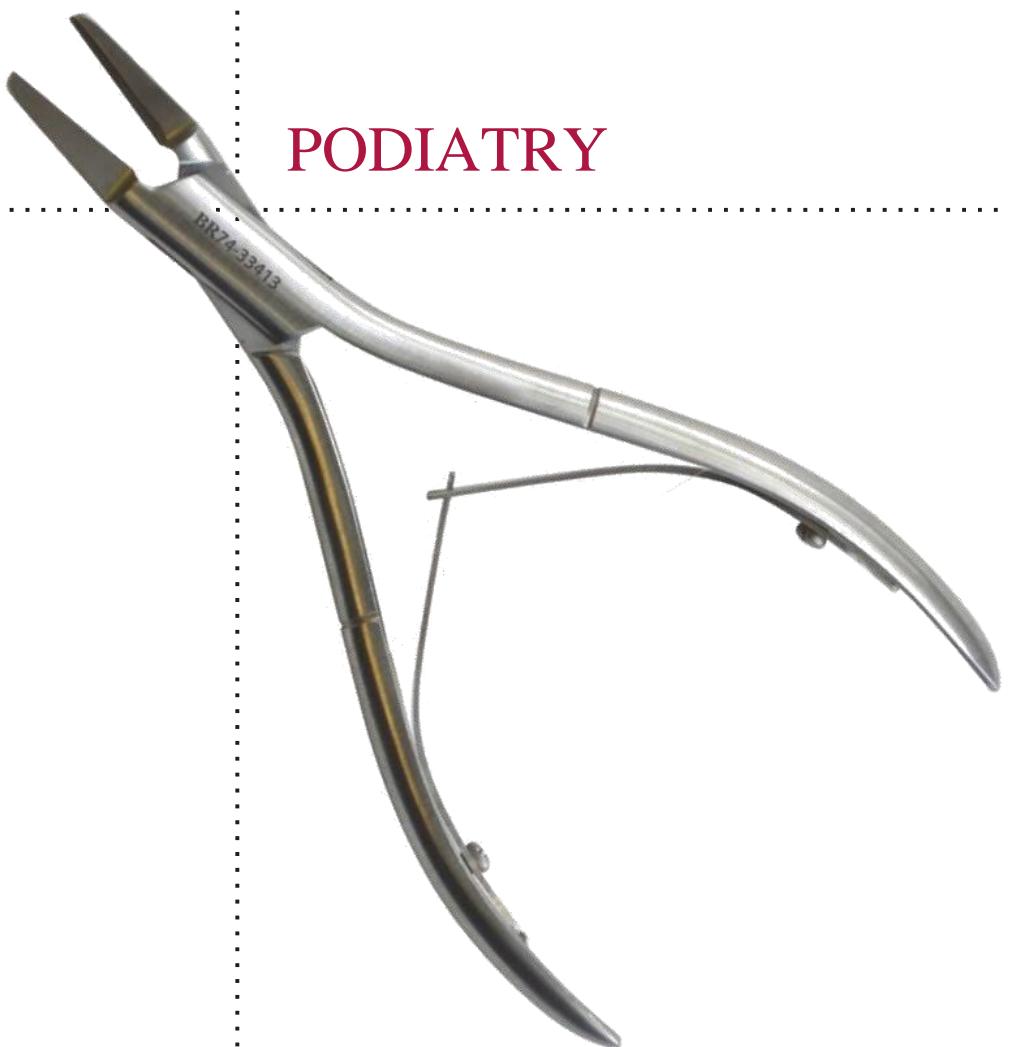

The "Micro Serrations" are designed to reduce slippage of tissue within the blades of the scissor, and to hold the tissue in the jaws to allow for exact cutting, trimming and excision .

The SuperCut is only recommended for tissue and not for suture or gauze

BR ENDOSCOPIC INSTRUMENTS • D-SHAFT SERIES

The BROWN B. LLC D-SHAFT SERIES consists of a reusable handle and a disposable sheath/tip assembly, delivering best price-quality ratio and therefore making it the most visionary concept of laparoscopic instrumentation available.

- No cleaning and sterilization of sheath is needed . All parts with imminent exposure to the patient are single use
- All dangers associated with degradation of insulating material is reduced and reliable performance ensured . Sheath/tip assembly is economically replaced after every use
- No repair or maintenance costs
- Sheath and tip are fully insulated to prevent arching
- Maximum articulation due to 360° rotation
- Excellent handle to blade responsiveness
- Easy assembly/disassembly due to ball-and-socket connection between sheath and handle
- The reusable high quality handle provides superior feel and full compatibility with our disposable D-SHAFT inserts
- Featuring a large variety of jaws such as double action scissors, graspers and forceps
- D-SHAFT instruments are designed to be compatible with 5mm trocars and come in working lengths of 330 and 450 mm

BR ENDOSCOPIC INSTRUMENTS • RS SERIES

The BROWN B. LLC RS SERIES is our economic line of reusable endoscopic instruments, consisting of a car-bon fiber handle, insulated outer sheath, and a range of jaw inserts. Featuring a three-piece reusable system, the RS SERIES offers an excellent value for the money without compromises in quality.

- Fully rotatable
- Finger tang handle
- HF port
- Fully reusable
- Featuring a large variety of jaws such as double action scissors, graspers and forceps
- D-SHAFT instruments are designed to be compatible with 5mm trocars and come in working lengths of 330 and 450 mm

ENDOSCOPIC VIDEO

ENDOSCOPIC VIDEO CAMERA

BR900-1100

Endoscopic Video Camera, 1CCD,
including camera head and coupler

ENDOSCOPIC VIDEO CAMERA

BR900-1101

Endoscopic Video Camera, 1CCD,
including camera head and coupler
with Built-In USB Image Capture

BR900-1103

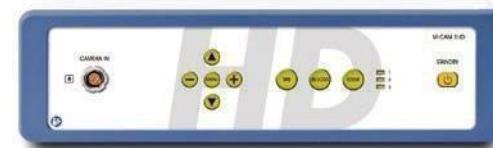

Endoscopic Video Camera, 1CCD,
including camera head and coupler
with Built-In USB Image Capture
and Video Recording System

ENDOSCOPIC HD VIDEO CAMERA

BR900-12001HD

HD Video Camera with Full 1080-HD Video
Output, with coupler, camera head with
function buttons

INTEGRATED LIGHT SOURCE - CAMERA - MONITOR

BR900-1113

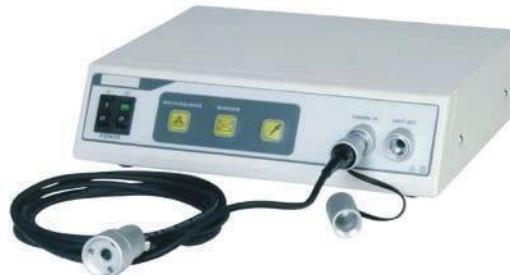

Integrated Endoscopic Video Camera, 1 CCD, including
camera head and coupler, 50-watt Xenon light source,
10.5" monitor, with built-in USB image capture and
video system .

CAMERA - LIGHT SOURCE COMBINATION

BR900-1105

Camera and Coupler (F30), with built-in
50-watt Xenon light source

Video Nasolaryngoscope and HD Camera System

The video camera includes built-in image capture and streaming video capabilities with the push of a button control on the camera head. Images and video are stored internally, but can also be saved to an external USB drive (included) for convenient viewing on a computer. No additional software is required.

This new video nasolaryngoscope has been developed in close cooperation with clinical users in order to provide maximum benefits for both patients and users. For patients, the ultra-slim scope provides an extremely gentle insertion, meaning minimal discomfort and time in procedure. For users, the ergonomic handle design and the integrated LED illumination ensure effortless use as well as optimal performance at minimum operating expense.

CMOS for optimal cost/performance ratio

- ▶ Most advanced video technology
- ▶ Chip on the tip design
- ▶ Enhanced durability

Integrated LED illumination

- for optimal operating expense
- ▶ No need for separate light source
 - ▶ Optimal illumination performance
 - ▶ Alternative: light guide version

Ultra-slim-line for gentle insertion

- ▶ Diameter distal tip 3.2 mm
- ▶ Diameter insertion tube 3.4 mm
- ▶ Atraumatic tip design

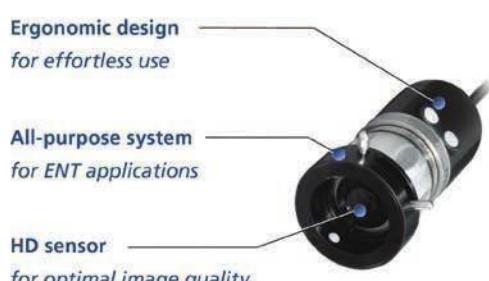

Ergonomic handle design for effortless use

- ▶ Rotatable cable outlet
- ▶ Convenient handling of U-bend adjust-

Precise motion for perfect control

- ▶ Smooth-running bending section
- ▶ High precision mechanics
- ▶ Bending range of distal tip 130° up/down

VIDEO NASOLARYNGOSCOPE AND HD CAMERA SYSTEM

BR900-1114

Flexible Video Rhinolaryngoscope with Integrated LED Illumination, HD Video Camera with built-in USB image capture/streaming video, CMOS camera head, 28mm coupler

MEDICAL GRADE MONITORS

- BR900-4415 SONY Medical Grade Flat Panel Monitor,
Wide-View, 15"
- BR900-4419 Medical Grade Flat Panel Monitor,
Wide-View, 19"

LIGHTSOURCES & HEADLIGHTS

PORTABLE LED LIGHT SOURCE

- BR900-7400 Portable LED Light Source,
Storz adapter
(includes rechargeable battery
and charger)

BATTERY CHARGER

- BR900-2001 Battery Charger for Portable Lightsource Battery
(BR900-2002)
BR900-2002 Rechargeable Battery for Battery Charger (BR900-2001)

LED LIGHT SOURCES

- BR900-2450 LED 50 Watt Light Source, Storz port
BR900-2453 LED 50 Watt Light Source, 4 port turret
(ACMI, Olympus, Storz, Wolf)

XENON LIGHT SOURCES

- BR900-2180XLS Xenon 180 Watt Light Source, 4 port turret
BR900-2300XLS Xenon 300 Watt Light Source, 4 port turret

HALOGEN LIGHT SOURCE

BR900-2150HLS Halogen 150 Watt Light Source, Storz port

HALOGEN LIGHT SOURCE

BR900-2252HLS Halogen 250 Watt Light Source, Dual Lamp, Storz port

FIBER OPTIC LIGHT SOURCE CABLES

BR900-5050	Fiber Light Cable, standard, Storz/Storz (Scope/Source) fitting, 5mm x 7½ ft .
BR900-5050-10	Fiber Light Cable, standard, Storz/Storz (Scope/Source) fitting, 5mm x 10 ft .
BR900-5050-ACMI	Fiber Light Cable, standard, ACMI/ACMI (Scope/Source) fitting, 5mm x 7½ ft .
BR900-5050-ACO	Fiber Light Cable, standard, ACMI/Olympus (Scope/Source) fitting, 5mm x 7½ ft .
BR900-5050-ACS	Fiber Light Cable, standard, ACMI/Storz (Scope/Source) fitting, 5mm x 7½ ft .
BR900-5050-AS	Fiber Light Cable, standard, Storz/ACMI (Scope/Source) fitting, 5mm x 7½ ft .
BR900-5050- MAL	Fiber Light Cable, standard, ACMI/ACMI (Scope MALE/Source MALE) fitting, 5mm x 7½ ft .
BR900-5050-OLAC	Fiber Light Cable, standard, Olympus/ACMI (Scope/Source) fitting, 5mm x 7½ ft .
BR900-5050-OLY	Fiber Light Cable, standard, Storz/Olympus (Scope/Source) fitting, 5mm x 7½ ft .
BR900-5050-OLY-10	Fiber Light Cable, standard, Storz/Olympus (Scope/Source) fitting, 5mm x 10 ft .
BR900-5050-PIL	Fiber Light Cable, standard, Storz/Pilling (Scope/Source) fitting, 5mm x 7½ ft .
BR900-5050-PTX	Fiber Light Cable, standard, Storz/Pentax (Scope/Source) fitting, 5mm x 7½ ft .
BR900-5050-UNV	Fiber Light Cable, standard, Wolf/Olympus (Scope/Source) fitting, 5mm x 7½ ft .
BR900-5050- WOL	Fiber Light Cable, standard, Storz/Wolf (Scope/Source) fitting, 5mm x 7½ ft .

XENON FIBER OPTIC HEADLIGHT

- BR900-3100 Fiberoptic Headlight (Xenon) w/ 3 .5mm bifurcated 9-foot cable, 20mm-110mm spot size, & deluxe headband, Wolf fitting

HALOGEN/LED FIBER OPTIC HEADLIGHT

- BR900-3110 Fiberoptic Headlight (LED/Halogen)
w/ 5mm bifurcated 9-foot cable,
20mm-80mm spot size & deluxe headband, ACMI port

LIGHT SOURCE FLOOR STANDS

- BR900-3200 Light Source Floor Stand (for Xenon light sources)
BR900-3201 Light Source Floor Stand (for LED light sources)

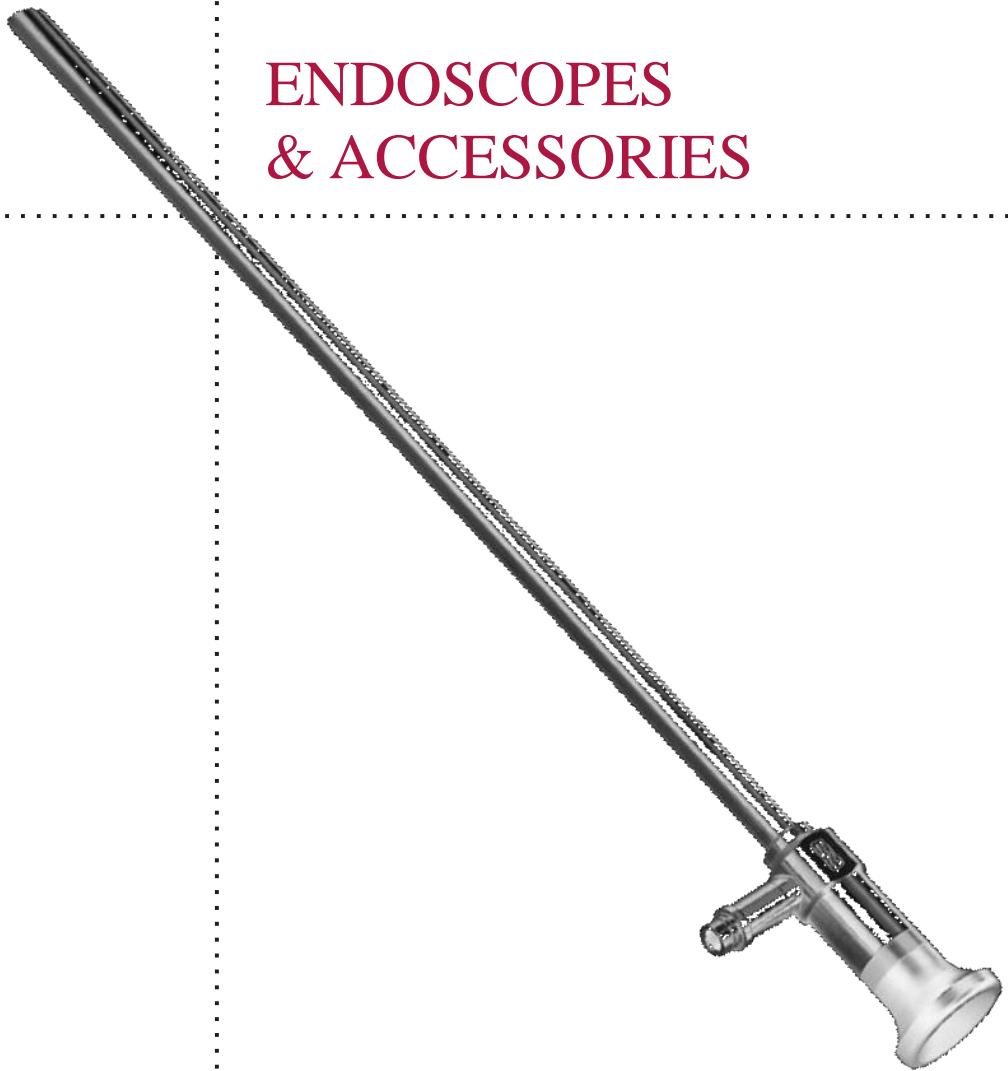

JOYSTICK

- BR900-3125 Joystick for use with Fiber Optic Headlight System, Sterile (10 per pack)

ENDOSCOPE STERILIZATION TRAY

BR970-2000-000

Endoscope Sterilization Tray, with
silicone scope holders for rigid scopes,
17½" x 1¾" x 3½"

SOAK & STORAGE SYSTEM

BR82-11010 Soak/Storage System, single, for rigid sinus/arthroscope, vapor lid, ¾" x 10"

BR82-11014 Soak/Storage System, single, for rigid hysteroscope and cystoscope, vapor lid, ¾" X 14"

BR82-11020 Soak/Storage System, double, for rigid sinus/arthroscope, and flexible rhinolaryngoscope, vapor lid, one 20" tube and one 9" tube

BR82-12014 Soak/Storage System, double, for rigid hysteroscope and cystoscope, vapor lid, ¾" X 14"

BR82-12020 Soak/Storage System, single, for flexible rhinolaryngoscope, vapor lid, 1¼" x 20"

BR82-12022 Soak/Storage System, single, for flexible cystoscope, vapor lid, 2" x 27"

BR82-12070 Soak/Storage System, single, for flexible rhinolaryngoscope with working channel, vapor lid, 2" x 20"

BR82-12235 Soak/Storage System, single, for esophagoscope and bronchoscope, vapor lid, 2" x 35"

BR82-13030 Soak/Storage System, double, for rigid sinus/arthroscope, vapor lid, ¾" x 10"

BR82-14040 Soak/Storage System, double, for flexible rhinolaryngoscope, vapor lid, 1¼" x 20"

BR82-14070 Soak/Storage System, double, for flexible rhinolaryngoscope with working channel, vapor lid, 2" x 20"

BR82-14235 Soak/Storage System, double, for esophagoscope and bronchoscope, vapor lid, 2" x 35"

BR82-14242 Soak/Storage System, double, for flexible cystoscope, vapor lid, 2" x 27"

BR82-14343 Soak/Storage System, triple, for flexible rhinolaryngoscope, vapor lid, 1¼" x 20"

BR82-15050 Soak/Storage System, quad, for rigid hysteroscope or cystoscope, and flexible rhinolaryngoscope, vapor lid, two 20" tubes and two 14" tubes

BR82-18081 Soak/Storage System, single, for digital flexible cystoscope, with camera yoke/cable support holder, 2½" X 27"

CLEANING BRUSHES FOR SOAK/STORAGE SYSTEM

BR82-11210 Cleaning Brush, for Soak/Storage 10" tubes

BR82-12220 Cleaning Brush, for Soak/Storage 20" tubes

BR82-13230 Cleaning Brush, for Soak/Storage 27" to 35" tubes

Protect Your Investment.

Cleaning is extremely important in extending the life of your instruments.

INSTRUMENT CLEANING BRUSHES

BR82-17004

Instrument Cleaning Brush, stainless steel bristles, autoclaveable, 7 1/4" (Set of 3)

BR82-17005

Instrument Cleaning Brush, nylon bristles, autoclaveable, 7 1/4" (Set of 3)

BROWN B. LLC INSTRUMENT LUBRICANT

Rust Inhibitors: tends lifespan of instruments, resulting in fewer repairs .

Non-Silicone Lubricant patient-safe .

Environmentally-Friendly:

Biodegradable, phosphate-free, non-polluting formula .

Our unique rust inhibitor and lubricant contains corrosion inhibitors that protect all types of metal instruments, including carbon steel . No rinsing or wiping of instruments is necessary .

BROWN B. LLC Instrument Lubricant does not interfere with sterilization and maintains free working instruments .

BR82-12050

BROWN B. LLC Instrument Lubrication, (12) 8 oz . bottles per box
