

SAFEMEDWASTE®

EASY ONSITE DESTRUCTION OF CONTROLLED SUBSTANCE WASTAGE

HOW IT WORKS

MedWaste is a patented chemical digestion technology for onsite molecular destruction of controlled substance wastage. When treated with SafeMedWaste, wastage is rendered permanently and irreversibly non-retrievable and is no longer effective in humans or animals. The destruction byproduct is non-hazardous waste.

PROVEN RESULTS

Every drug on the SafeMedWaste compatible drug list has been tested at an independent DEA-licensed, cGMP certified laboratory to confirm safety and destruction efficacy when used with SafeMedWaste. Test results are available for review by qualified interested parties.

THE BENEFITS OF USING SAFEMEDWASTE

LIMIT DIVERSION RISK

Compatible drugs added to SafeMedWaste are SafeMedWaste dramatically reduces the lifespan immediately rendered non-retrievable. Liquid drugs of the drug molecule, eliminating the risk of are destroyed in <24 hours and solid drugs are non-compliance that could result from improper destroyed in <72 hours.* handling and management of active drug molecules.

SIMPLIFY COMPLIANCE

REDUCE HAZARDOUS WASTE

The SafeMedWaste destruction byproduct is Fast, complete onsite destruction of the drug waste non-hazardous waste, pH neutral, no longer effective can help reduce the required footprint for secured in humans or animals, and contains no derivatives or onsite storage and complex handling requirements, remnants that can be used to resynthesize the original while lowering the cost of transport and incineration.** drug.

LOWER COSTS

*Time is dependent on drug type, volume, concentration, and combinations. **Subject to facility and regulatory requirements.

INDUSTRIES SERVED

HEALTHCARE

The SafeMedWaste healthcare formulation is effective for liquid and solid drugs on the Compatible Drug List, including pills, capsules, troches, sublingual films, patches, and suppositories. The product is available in a variety of sizes, with optional aluminum locking wall mounts for added security and spill prevention. The healthcare product is also suitable for use in Law Enforcement, Military, and other government organizations.

PHARMA MANUFACTURING

SafeMedWaste pharma formulations are specifically designed to meet the high volume and API concentration demands of pharmaceutical manufacturing. Immediate non-retrievability and fast onsite destruction can lower the drug-related risks of diversion, non-compliance, and environmental contamination.

SINGLE-USE PRODUCT

The SafeMedWaste single-use product is a fast, easy-to-use solution for safe destruction of unused prescription drugs in the home, or other environments that require quick destruction of small volume solid drug waste. When used as directed, the used bottle and its contents can be safely discarded in standard trash receptacles.*

*Subject to facility and regulatory requirements when used by registrants or entities not classified as an ultimate user.

CUSTOMIZATION

Scan QR Code below to view the list of controlled substances that can be destroyed by SafeMedWaste. Testing of additional Schedule I-V drugs is ongoing. Custom formulation development and packaging design are also available.
