Such sales are to be by public (including online) auction or by sealed bid to the highest responsible bidder, however, a negotiated price process may be used in the case of selling such items to a public agency. Revenues from surplus and scrap sales shall be credited to the appropriate fund. 2. Best price
3. Features and the quality of the item(s) or service(s)

ATTN: Honorable Mayor Mary Wiles & Board of Alderman Members

**RE: Engineer's Review and Recommendation for Change Order No. 1
Dixon WWTP Phase 1 Improvements**

Dear Mayor Wiles & Board Members,

During the Summer of 2022, the City of Dixon submitted an application for American Recovery Plan Act of 2021 (ARPA) grant monies to finance improvements to the Dixon WWTP. These improvements were identified during a facility planning process as necessary to meet a schedule of compliance for disinfection, address an Abatement Order on Consent (AOC) agreement with the Missouri Department of Natural Resources (MDNR) regarding sludge discharges to the receiving stream and return deteriorated process equipment to proper working order. Based on a competitive ranking with other ARPA applicants, Dixon was initially awarded \$849,000 and placed on the waitlist for additional funds. In July 2024, the City was notified that additional ARPA funds were available for a total construction cost of \$1.4 million. Plans were developed with multiple deductive alternates to accommodate the maximum utilization of the available grant monies. **On November 14, 2025 bids were opened for the Phase 1 Improvements project and the total construction cost for the proposed improvements was \$2.25 million. The contract was awarded to Midstate Pipeline Maintenance, LLC., of Belle, Missouri.** Upon, subsequent MDNR review of the Phase 1 Improvements bidding process, it was determined that additional \$1.55 million of ARPA grant monies were available for construction.

Several stipulations were established for utilization of the additional grant monies. First, the proposed improvements could not result in the construction permit for the project to be reopened for evaluation. Secondly, the proposed work must be completed by August 2026 as this is legislative mandate associated with the funding. To accommodate these two criteria, the Headworks Screening Structure and Grit Chamber process were selected for implementation. A request for information document was developed containing technical specifications and plan drawings for the proposed improvements necessary to implement the two unit processes. RFI-E-02 was issued to the Contractor on April 18, 2025 for the development of a proposal to complete the proposed work. On May 15, 2025 the Contractor submitted a proposal for scope of work contained within the RFI-E-02. A summary of the Contractor's proposal, as well as the Engineers estimate for the proposed work is listed below in Table 1.

Table No. 1 – Change Order No. 1 Summary

Item	Contractor Proposal (05-15-25)	Engineers Estimate (12-04-24)
Headworks Screening Structure	\$688,350.00	\$632,000.00
Grit Chamber	\$804,390.00	\$920,000.00
Total	\$1,492,740.00	\$1,522,000

An evaluation of the RFI-E-02 proposal has been performed. The Contractor's proposal is within 4 percent of the Engineer's December 2024 opinion of probable project cost, with minor variances between the individual unit processes. Based on discussions with the Contractor, lead-times for equipment fabrication, delivery to the site, installation and start-up appear to be adequate to afford utilization of grant monies by the legislative deadline. Consultation with the MDNR ARPA grant coordinator for this project has revealed that the proposed work is eligible for reimbursement. **It is recommended that the City execute Change Order No. 1 for a total contract increase in \$1,492,740.00. The total contract amount for the Dixon WWTP Phase 1 Improvements project shall be \$3,742,740.00.**

Archer-Elgin appreciates the opportunity to serve the City and looks forward to completing a successful project for the Dixon Community. We welcome any questions or comments.

Respectfully,

Archer-Elgin Engineering, Surveying and Architecture

Dixon WWTP Phase 1 Improvements - Influent Screening

Dixon WWTP Phase 1 Improvements - Influent Screening: These improvements include the construction of a influent screening process adjacent to the existing screen. Screen shall be a perforated plate, spiral screen unit with integral washer compactor unit and shall be install in the main flow channel. A manual bar screen shall be installed in an emergency bypass channel. Flow control gates shall be installed to afford isolation of the main channel from service. The Influent Screening structure shall incorporate flow measurement and peak flow splitting. An operator adjustable downward opening weir gate shall be installed which will direct flow in excess of the operator selected treatment train volumetric flow to the wet weather treatment system. A 6" Parshall flume shall be installed to establish a working water surface elevation in the process and afford operator feedback regarding influent flows.
