DataΛffect

erwin®
the data governance company

Powerful Data Governance Solutions

erwin has been the most trusted name in data modeling for more than 30 years. As a stand-alone company since 2016, we've developed the only unified platform that combines data governance, enterprise architecture, business process and data modeling. These solutions work together to unlock data as a strategic asset and transformational tool for greater visibility, control and value across the enterprise. With our expertise and focus, we are **the data governance company**.

erwin Data Governance

A SaaS solution that expands data governance beyond IT to ensure all stakeholders discover, understand, govern and socialize data assets. With integrations to our enterprise architecture, business process and data modeling solutions, erwin DG provides data impact analysis to reduces risks and realize results.

erwin DM NoSQL

The only enterprise-class data modeling solution supporting the fastest-growing NoSQL database platform, MongoDB. With the SaaS-based erwin DM NoSQL solution, deploy new MongoDB applications and migrate MongoDB infrastructure to the cloud quickly, while maintaining the underlying data's integrity, quality and governance.

erwin Enterprise Architecture Agile

A full-featured, cloud-based set of enterprise architecture tools for translating an organization's strategic goals into a blueprint of IT capabilities. erwin EA Agile can be deployed quickly and uses industry platforms, such as TOGAF® and ArchiMate® 3.0, out of the box.

erwin CloudCore

Cloud-based hosting services for erwin data modeling and enterprise architecture solutions. Pay-as-you-go versions of erwin DM, EA and BP also available via erwin CloudCore plus bring-your-own-license support for existing customers.

erwin Data Modeler

The industry-leading data modeling solution with visual design and documentation capabilities for any data from anywhere across an organization. With a unified view of strategic data assets through erwin DM, mission-critical information will be used, understood and trusted across the enterprise.

erwin Enterprise Architecture

A complete suite of model-driven, repository-based, user friendly and collaborative enterprise architecture tools to plan, govern and manage change with greater flexibility and cost-effectiveness. erwin EA is an on-premise solution that can be highly customized for integration into the customer environment.

erwin Business Process

Business process modeling software for visualizing system interactions, business processes and organizational hierarchies to ensure alignment with business objectives. With these insights from erwin BP, better operational decisions can be made based on a central source of facts.

erwin Web Portal

A simple, customizable, web-based collaboration platform. erwin WP enables business and technical users to share models and metadata stored within erwin DM.
