

# PASTURE PROTECTION - BEAT BACK PESTS!

LEAFY SPURGE

- 1** Check for and remove plant parts and seeds from your clothing, horses, stock dogs, equipment and vehicles before leaving an area with known invasive plant infestations.
  - 2** Try to minimize livestock and human activities such as haying, trailing, camping and the use of ATVs in riparian areas that are at risk of infestations from adjacent areas.
  - 3** Implement grazing strategies that promote the growth and vigour of native and desirable species in riparian areas, pastures and haylands to avoid bare spots where invasive plants can take root
- !** **To get the remaining 7 tips from in our special guide, call or write and we'll send out the article FREE. There's no cost or obligation.**
