Nursing Certification**

A 360° Approach to Emergency Readiness

You aren't just learning textbook theory. You are learning real-time crisis management frameworks directly from a former Head Nurse.

The Chain of Survival Integration

Aligning Training Modules to Clinical Realities

	Training Interventions						
Emergency Categories	Basic CPR	AED Usage	FBAO (Choking)	Basic First Aid	Patient Transfer	Critical Patient Care	Elderly Care
Cardiac Arrest	✓	✓				✓	
Respiratory Blockage			✓				
Physical Trauma/Accidents				✓	✓		
Vulnerable Populations						✓	✓

A modular architecture designed to provide 360-degree risk mitigation for any facility.

Pillar 1: Acute Lifesaving Interventions

CPR

Cardiopulmonary
Resuscitation

Essential techniques for
artificially restoring blood
circulation and breathing.

AED

Automated External
Defibrillator Usage

Precise, confident
operation of life-saving
electrical shock devices.

FBAO

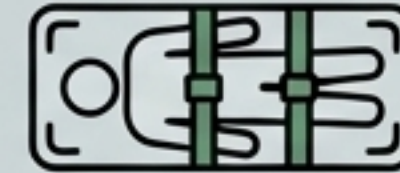

Clearing the Airway
Immediate mechanical
interventions to remove
foreign body airway
obstructions (choking).

Pillar 2: Trauma Management & Specialized Care

Basic First Aid

Immediate stabilization techniques for workplace injuries and physical trauma.

Patient Transfer

Ergonomic and clinically safe methods for moving injured individuals without causing secondary trauma.

Critical Patient Care

Advanced observational and stabilization skills for patients in acute distress while awaiting EMS.

Elderly Care

Tailored emergency protocols designed specifically for the physiological frailties of older adults.

Nationwide Deployment for Every Sector

Corporate Workplaces
Factories, offices, and high-risk industrial sites.

Educational Institutions
Schools and university campuses.

Communities
Local municipalities and residential organizations.

**Taught by a Registered Nurse with over 10 years of direct instructional experience.
Available for deployment nationwide.**
